Dairy Committee Appointments Made

On January 6, Secretary Tom Vilsack announced the appointment of 17 members to the Dairy Industry Advisory Committee. Over the next two years, the committee will review the issues of farm milk price volatility, dairy farmer profitability and consolidation, and offer suggestions on ways USDA can best address the needs of a struggling dairy industry. Representatives will include: producers and producer organizations, processors and processor organizations, handlers, consumers, academia, retailers, and state agencies involved in organic and non-organic dairy at the local, regional, national, and international levels.

"USDA has worked tirelessly to assist dairy farmers during these tough times," said Vilsack. "We've increased support prices under the Dairy Product Price Support Program, reactivated the Dairy Export Incentive Program, and bought 200 million pounds of nonfat dry milk for federal feeding programs. This committee, whose members come from all aspects of the dairy industry, will work to find long term solutions to assist this struggling industry."

Producer members appointed to the committee are: Erick Coolidge (Pa.), Timothy den Dulk (Mich.), Debora Erb (N.H.), James Goodman (Wis.), James Krahn, (Ore.), Edward Maltby (Mass.), Manuel Souza (Calif.), Ed Welch (Minn.), and James Williams (Ga.).

Representatives from the processing industry include: Jay Bryant (Va.), Patricia Stroup (Calif.), Sue Taylor (Colo.), and Robert Wills. (Wis.).

Members representing state government, retail, academia, and consumers are: Rodney Nilsestuen (Wis.), Robert Schupper (Pa.), Andrew Novakovic (N.Y.), and Paul Bourbeau (Vt.).

All members will serve two-year terms, beginning in January 2010. The committee will hold its first meeting in early 2010. The meeting will be open to the public and USDA encourages public participation. For more information check the committee website at www.ams.usda.gov/AMSV1.0/DairyAdvisoryCommittee.

Uniform Price

The uniform price in Hillsborough County, Florida, was \$18.99 per hundredweight for milk at 3.5 percent butterfat for the month of December. This represents an increase of \$1.19 compared with the previous month and an increase of \$0.11 from December 2008.

Class I utilization was 87.65 percent in December, an increase of 2.71 percent compared with last month and an increase of 3.17 percent from December 2008.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in November was 15.06 billion pounds, a decrease of 1.0 percent from November 2008 and a increase of 0.9 percent when compared with October 2009 on a daily average basis. Total cheese output (excluding cottage cheese) was 844 million pounds, 1.9 percent above November 2008 and 1.2 percent above October 2009 on a daily average basis. Butter production was 121 million pounds, 9.7 percent below November 2008 but 10.4 percent above October 2009 on a daily average basis.

Nonfat dry milk powder production was 101 million pounds in November, 24.7 percent less than November 2008 and 13.8 percent higher than October 2009 on a daily average basis. Dry whey production was 86.0 million pounds, 0.5 percent below November 2008 and 0.2 percent above October 2009 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.38 in December 2009, up 0.15 points from the previous month's revised ratio of 2.23.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in December 2009 is \$18.99 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.18 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5171 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In December, Class I use accounted for 89.06% of all producer skim milk (priced to handlers at \$9.31 per hundredweight, plus the Class I differential and 50.26% of producer butterfat (priced to handlers at \$1.4310 per pound plus Class I differential). Class II use accounted for 7.36% of all producer skim milk (\$9.14 per hundredweight) and 33.15% of producer butterfat (\$1.5503 per pound). Class III use accounted for 0.23% of all producer skim milk (\$9.93 per hundredweight) and 1.16% of producer butterfat (\$1.5433 per pound). Class IV use accounted for 3.35% of all producer skim milk (\$9.96 per hundredweight) and 15.43% of producer butterfat (\$1.5433 per pound).

Receipts of producer milk during December 2009 totaled 254.4 million pounds, 10.3 million pounds less than was pooled in December of last year. Florida producers supplied 151.9 million pounds of milk in November 2009 or 61.15% of the total producer milk pooled in Florida. In November 2008, Florida producers supplied 61.81% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for December 2009. In-area Class I route disposition totaled 245.7 million pounds in November 2009, 16.7 million more than November 2008 and an increase of 6.71 percent after adjusting for calendar composition.

USDA Announces New Dairy Economic Loss Assistance Payment Program to Provide Financial Relief to Struggling Dairy Producers

On December 17, 2009, Secretary Tom Vilsack announced the implementation of the new Dairy Economic Loss Assistance Payment (DELAP) program. The 2010 Agricultural Appropriations Bill authorized \$290 million for loss assistance payments to eligible producers. Eligible producers will receive a one-time direct payment based on the amount of milk both produced and commercially marketed by their operation during the months of February through July 2009. Production information from these months will be used to estimate a full year's production for an operation to calculate the payments, using a 6-million pound per dairy operation limit.

Based on current information, Farm Service Agency estimates that 875 million hundredweight (cwt) of milk production will be eligible for payment. The reserve will cover new applicants and appeals. The expected payment rate is approximately \$0.32 per cwt.

To be eligible for DELAP, the dairy producer and the dairy operation in which the producer has a share:

- Must have produced milk in the United States and marketed milk commercially at any time from February through July 2009;
- Must have milk production data for those months;
- Must certify to all milk production produced and marketed by the dairy operation during that time.

Also, any dairy producer who has an annual average adjusted gross nonfarm income of more than \$500,000 for calendar years 2006 through 2008 is not eligible for DELAP. For more information and eligibility requirements on the new DELAP program, please visit your local FSA county office or www.fsa.usda.gov.

WASDE Dairy Report 1/

WASDE - 478 January 12, 2010

The milk production forecast is raised for 2010 reflecting the relatively slow pace of cow liquidation in late 2009. Commercial dairy exports for 2009 are adjusted reflecting stronger skim-basis sales, but slightly weaker fat-basis sales. Import forecasts are reduced for 2009. Trade forecasts are unchanged for 2010. Fat and skim-solids ending stocks are forecast higher for 2009. Ending stocks for 2010 are raised on a skim-solids basis but are lowered on a fat-basis. Forecasts of butter and cheese prices are lowered as milk production forecasts are raised.

However, relatively strong international demand should support prices for nonfat dry milk (NDM) and whey. The 2010 Class III price is lowered from last month as lower expected cheese prices more than offset stronger whey prices. The Class IV price forecast for 2010 is raised from last month as stronger NDM prices more than offset weaker butter prices. The all milk price is reduced to \$16.20 to \$17.00 for 2010.

Volume 11—No. 2

Final Rule on Organic Access to Pasture

The USDA has announced details of the final regulation regarding access to pasture for organic livestock operations. This rule amends the National Organic Program (NOP) regulations to clarify the use of pasture in raising organic ruminants.

The main components of the rule include: a) animals must graze pasture during the grazing season, which must be at least 120 days per year; b) animals must obtain a minimum of 30 percent dry matter intake from grazing pasture; c) producers must have a pasture management plan and manage pasture as a crop to meet the feed requirements; and, d) livestock are exempt from the 30 percent dry matter intake requirements during the finish feeding period.

The final rule becomes effective 120 days after publication, June 17, 2010. Comments on the exceptions for finish feeding of ruminant slaughter stock may be submitted before April 19, 2010. More information is available on the NOP website at <http://www.ams.usda.gov/NOP>.

New Framework for Animal Disease Traceability Announced

The USDA has announced it will develop a new, flexible framework for animal disease traceability in the United States, and undertake several other actions to further strengthen its disease prevention and response capabilities.

The framework provides the basic tenets of an improved animal disease traceability capability in the United States. USDA's efforts will: a) only apply to animals moved in interstate commerce; b) be administered by the States and Tribal Nations to provide more flexibility; c) encourage the use of lower-cost technology; and d) be implemented transparently through Federal regulations and the full rulemaking process. More information on USDA's new direction on animal traceability and the steps to improve disease prevention and control is available at <http://www.aphis.usda.gov/traceability>.

Uniform Price Increases

The uniform price in Hillsborough County, Florida, was \$19.42 per hundredweight for milk at 3.5 percent butterfat for the month of January. This represents an increase of \$0.43 compared with the previous month and an increase of \$0.50 from January 2009.

Class I utilization was 85.46 percent in January, a decrease of 2.19 percent compared with last month and an increase of 3.82 percent from January 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in December was 15.76 billion pounds, a decrease of 0.9 percent from December 2008 and an increase of 1.2 percent when compared with November 2009 on a daily average basis. Total cheese output (excluding cottage cheese) was 862 million pounds, 0.1 percent below December 2008 and 1.1 percent less than November 2009 on a daily average basis. Butter production was 150 million pounds, 4.3 percent below December 2008 but 20.2 percent above November 2009 on a daily average basis.

Nonfat dry milk powder production was 126.4 million pounds in December, 18.6 percent less than December 2008 and 20.9 percent higher than November 2009 on a daily average basis. Dry whey production was 91.2 million pounds, up slightly from December 2008 and 2.0 percent above November 2009 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.45 in January 2010, up 0.03 points from the previous month's revised ratio of 2.42.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in January 2010 is \$19.42 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.56 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5345 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In January, Class I use accounted for 87.00% of all producer skim milk (priced to handlers at \$9.82 per hundredweight, plus the Class I differential and 45.27% of producer butterfat (priced to handlers at \$1.5874 per pound plus Class I differential). Class II use accounted for 6.37% of all producer skim milk (\$10.52 per hundredweight) and 32.20% of producer butterfat (\$1.4475 per pound). Class III use accounted for 0.52% of all producer skim milk (\$9.80 per hundredweight) and 3.72% of producer butterfat (\$1.4405 per pound). Class IV use accounted for 6.11% of all producer skim milk (\$9.13 per hundredweight) and 18.81% of producer butterfat (\$1.4405 per pound).

Receipts of producer milk during January totaled 264.9 million pounds, 21.3 million pounds less than was pooled in January of last year. Florida producers supplied 167.5 million pounds of milk in December 2009 or 65.82% of the total producer milk pooled in Florida. In December 2008, Florida producers supplied 66.83% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for January 2010. In-area Class I route disposition totaled 253.3 million pounds in December 2009, 8.1 million more than December 2008 and an increase of 4.09 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE - 479 February 9, 2010

The milk production forecasts are raised for 2010. The forecast for 2010 reflects recent USDA estimates of fourth-quarter production. Milk production is forecast higher for 2010 based on the higher-than-expected January 1 dairy replacement heifer estimate. Herds are not expected to decline as rapidly as forecast last month, boosting milk production. Dairy exports on a skim-solids basis for 2010 are raised, reflecting higher sales of cheese and nonfat dry milk. Import forecasts are lowered for 2010. Fat and skim-solids ending stocks are estimated higher for 2009 and stocks for 2010 are raised in the face of higher production. Cheese and butter price forecasts for 2010 are little changed from last month. The Class III price is raised from last month due to higher forecast whey prices, but the Class IV price forecast is lowered reflecting weaker nonfat dry milk prices. The all milk price is forecast at \$16.20 to \$16.90 for 2010.

March 2010

Volume 11—No. 3

Final Decision on Amendments to All Federal Milk Marketing Orders Issued

The USDA has issued a final decision to amend the producer-handler definition in all Federal milk marketing orders. These amendments were considered in a recommended decision published October 21, 2009.

This decision amends the producer-handler definition of all Federal milk marketing orders to limit exemption from pooling and pricing provisions of the orders to those producer-handlers with total route disposition and sales of packaged fluid milk products to other plants of 3 million pounds or less per month. The exempt plant definition would continue to limit route disposition and sales of packaged fluid milk products to other plants to 150,000 pounds or less per month.

Before incorporating these changes, each amended Federal order must be approved either by two-thirds of producers supplying milk to the Federal order or by producers who supply two-thirds of the milk to that order. If approved, USDA will issue a final rule. If the amended Federal order is not approved, USDA will terminate that order.

The decision was published in the March 4, 2010 Federal Register and is available for viewing at www.ams.usda.gov/AMSV1.0/dairy. To request that a copy of this recommended decision be mailed to you, please contact this office.

Dairy Advisory Committee Update

The USDA Dairy Industry Advisory Committee has announced a meeting will be held April 13-15, 2010 in Washington, DC. The meeting will be open to the public and registration will begin upon publication of the Federal Register Notice, at least 15 days prior to the meeting. The Farm Service Agency (FSA) has set up a website that contains the most up-to-date information on the Committee's activities at www.fsa.usda.gov/diac.

Uniform Price Increases

The uniform price in Hillsborough County, Florida, was \$19.65 per hundredweight for milk at 3.5 percent butterfat for the month of February. This represents an increase of \$0.23 compared with the previous month and an increase of \$4.63 from February 2009.

Class I utilization was 87.75 percent in February, an increase of 2.29 percent compared with last month and an increase of 6.38 percent from February 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in January was 16.04 billion pounds, a decrease of 0.6 percent from January 2009 and an increase of 1.7 percent when compared with December 2009. Total cheese output (excluding cottage cheese) was 842 million pounds, 2.2 percent above January 2009 but 2.3 percent below December 2009. Butter production was 162 million pounds, 7.2 percent below January 2009 but 7.5 percent above December 2009.

Nonfat dry milk powder production was 127.9 million pounds in January, 17.3 percent less than January 2009 and 1.6 percent higher than December 2009. Dry whey production was 85.5 million pounds, up 8.0 percent from January 2009 and 0.4 percent above December 2009.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.38 in February, up 0.07 from the previous month's revised ratio.

National Dairy Board Appointments

Secretary Vilsack has announced the appointment of 12 members to the National Dairy Promotion and Research Board to serve 3-year terms beginning immediately. Visit www.fmmlanta.com and click on the 'What's New' link for more information.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in February 2010 is \$19.65 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$15.09 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4541 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In February, Class I use accounted for 89.31% of all producer skim milk (priced to handlers at \$10.27 per hundredweight, plus the Class I differential and 46.42% of producer butterfat (priced to handlers at \$1.4090 per pound plus Class I differential). Class II use accounted for 6.87% of all producer skim milk (\$10.97 per hundredweight) and 33.59% of producer butterfat (\$1.4474 per pound). Class III use accounted for 0.37% of all producer skim milk (\$9.57 per hundredweight) and 2.31% of producer butterfat (\$1.4404 per pound). Class IV use accounted for 3.45% of all producer skim milk (\$8.14 per hundredweight) and 17.68% of producer butterfat (\$1.4404 per pound).

Receipts of producer milk during February totaled 234.4 million pounds, 33.2 million pounds less than was pooled in February of last year. Florida producers supplied 173.4 million pounds of milk in January 2010 or 65.45% of the total producer milk pooled in Florida. In January 2009, Florida producers supplied 67.76% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for February 2010. In-area Class I route disposition totaled 262.8 million pounds in January 2010, 1.7 million more than January 2009 and an increase of 3.26 percent after adjusting for calendar composition.

1/ These figures are based on the consumption of fluid milk products in Federal milk order marketing areas and California, which represents approximately 92 percent of total fluid milk sales in the United States. An estimate of total U.S. fluid milk sales is derived by interpolating the remaining 8 percent of sales from the Federal milk order and California data. The procedure used for estimating U.S. fluid milk sales by the Agricultural Marketing Service is different from that used by the Economic Research Service (ERS) of USDA. Consequently, the sum of the monthly figures presented here may differ from the annual figures published by ERS. The ERS data series can be found at <http://www.ers.usda.gov/Data/FoodConsumption/Spreadsheets/dyfluid.xls>. 2/ Some data for January-March 2009 have been revised due to changes in the information from some reporting areas. 3/ Total fluid milk products include the products listed plus miscellaneous products and eggnog. 4/ Sales volumes and percent changes have been adjusted for calendar composition; see <http://www.ams.usda.gov/AMSV1.0/aetfile?dDocName=STELDEV3023272>

WASDE Dairy Report 1/

WASDE - 480 March 10, 2010

The milk production forecast is raised for 2010 with milk production expected to be fractionally above 2009. Cow slaughter is relatively low and January milk cow numbers were higher than expected. The pace of herd reduction is slowed from last month. Dairy exports on both a fat and skim-solids basis for 2010 are lowered, due to slightly weaker-than-expected international demand during the early part of the year. Imports for 2009 are adjusted to reflect December trade. Fat and skim-solids ending stocks are forecast higher for 2010 as production is increased and exports are reduced. Cheese prices are reduced as higher stocks are expected to pressure prices. Butter price forecasts are raised slightly on the strength of current demand although higher milk supplies and weaker cheese prices may encourage higher butter production pressuring prices later in the year. Nonfat dry milk (NDM) prices are forecast lower as export demand lags. Whey prices are raised slightly reflecting recent market strength. The Class III price is reduced as weaker cheese prices more than outweigh gains in whey prices. The Class IV price forecast is lowered reflecting weaker NDM prices which more than offset higher butter prices. The all milk price for 2010 is forecast at \$15.55 to \$16.15 per cwt.

1/ The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

USDA Outlook: “Further Dramatic Price Increases Are Unlikely”

The drawdown in the size of the U.S. dairy herd, which began last year, is forecast to continue in 2010. The contraction is expected to be larger in the first half, with the year-over-year reduction reaching 1.7 percent following a 1.2 percent contraction in 2009. The milk-feed price ratio is expected to recover smartly in 2010 compared with the 1.72 ratio calculated for 2009. The improved milk-feed ratio will likely support a continuing rise in output per cow in 2010.

Producers will continue to push for additional output per animal before expanding herd size. While larger operations seem to be adding cows, some of that increase may be a freshening of herds, which would also contribute to increasing output per animal. On balance, the rise in output per cow to a projected 20,950 pounds—balanced against a reduction in the national herd size to an estimated 9,045 thousand cows for the year—will result in 189.5 million pounds of milk, about 150,000 pounds more milk in 2010 compared with 2009.

The overall demand outlook is one of recovery. Forecast growth in commercial use of dairy products overall is expected to be moderate in 2010. While milk supplies have tightened since 2009, there is still sufficient milk to meet expected demand, both foreign and domestic.

Since milk production appears ample for meeting expected demand, prices are expected to be higher than 2009, but are unlikely to rise to 2007 or 2008 levels.

The preceding was adapted from the Livestock, Dairy, & Poultry Outlook (LDP-M-189) of March 19, 2010 published by the Economic Research Service, USDA.

Uniform Price Declines

The uniform price in Hillsborough County, Florida, was \$19.13 per hundredweight for milk at 3.5 percent butterfat for the month of March. This represents a decrease of \$0.52 compared with the previous month and an increase of \$4.94 from March of last year.

Class I utilization was 87.06 percent in March, a decrease of 0.69 percent compared with last month and an increase of 3.17 percent from March 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in February was 14.77 billion pounds, an increase of 0.1 percent from February 2009 and an increase of 1.8 percent compared with January 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 777 million pounds, 1.0 percent above February 2009 and 2.2 percent higher than January 2010 on a daily average basis. Butter production was 141 million pounds, 3.1 percent below February 2009 and 3.6 percent below January 2010 on a daily average basis.

Nonfat dry milk powder production was 117 million pounds in February, 4.9 percent less than February 2009 and 0.5 percent above January 2010 on a daily average basis. Dry whey production was 78 million pounds, up 4.4 percent from February 2009 and 0.5 percent above January 2010 on a daily average basis. Whey protein concentrates production was 31.3 million pounds, up 0.2 percent from February 2009 and 0.1 percent below January 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.26 in March, down 0.09 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in March 2010 is \$19.13 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.30 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5243 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In March, Class I use accounted for 88.52% of all producer skim milk (priced to handlers at \$9.60 per hundredweight, plus the Class I differential and 47.34% of producer butterfat (priced to handlers at \$1.4515 per pound plus Class I differential). Class II use accounted for 7.08% of all producer skim milk (\$9.39 per hundredweight) and 36.88% of producer butterfat (\$1.5417 per pound). Class III use accounted for 1.85% of all producer skim milk (\$7.68 per hundredweight) and 4.02% of producer butterfat (\$1.5347 per pound). Class IV use accounted for 2.55% of all producer skim milk (\$7.82 per hundredweight) and 11.76% of producer butterfat (\$1.5347 per pound).

Receipts of producer milk during March totaled 262.3 million pounds, 16.1 million pounds less than was pooled in March of last year. Florida producers supplied 162.4 million pounds of milk in February 2010 or 69.28% of the total producer milk pooled in Florida. In February 2009, Florida producers supplied 66.56% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for March 2010. In-area Class I route disposition totaled 238.7 million pounds in February 2010, 5.0 million less than February 2009 and a decrease of 2.05 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE - 481 April 9, 2010

The milk production forecast is raised for 2010 as the pace of herd reduction is reduced from last month. Dairy exports on a skim-solids basis are lowered due to weaker-than-expected sales early in the year. Both fat and skim-solids basis imports are reduced from last month due to weaker-than-expected imports of cheese. Fat and skim stocks are forecast higher for 2010 as cheese stocks have not declined as expected. Product price forecasts are generally lowered from last month as milk production is forecast higher and demand is weaker than expected. The cheese price is reduced as stocks remain high. The butter price forecast is about unchanged from last month as stronger prices in the first half of the year may largely be offset by lower second-half prices as butter production increases. The nonfat dry milk (NDM) price is forecast lower as export demand lags. The whey price is lowered slightly. The Class III price is reduced due to lower cheese and whey prices while the lower price forecast for NDM results in a reduced Class IV price. The all milk price for 2010 is forecast at \$15.45 to \$15.95 per cwt.

May 2010

Volume 11—No. 5

USDA Issues Final Rule

On April 23, 2010 the U.S. Department of Agriculture issued a final rule amending the producer-handler definition in all Federal milk marketing orders. Producers in all Federal milk marketing orders approved the amendments in referenda held in March 2010.

This rule amends the producer-handler definition to limit exemption from pooling and pricing provisions of the orders to those producer-handlers with total route disposition and sales of packaged fluid milk products to other plants of 3 million pounds or less per month.

These amendments were considered in a recommended decision published October 21, 2009, and adopted by a final decision published March 4, 2010. The final rule appeared in the April 23, 2010 Federal Register. The amendments will be effective June 1, 2010. For more information on the final rule, visit www.ams.usda.gov/dairy.

Comments Sought on Request to Extend Transportation Credits to June 2010

The Atlanta Market Administrator has received a request to extend the Transportation Credit Balancing Fund payout period to June 2010. The request is being considered and in accordance with Section 1007.82(b) of the Order Regulating the Handling of Milk in the Southeast Marketing Area, is inviting written data, views, and comments regarding the request.

The request, made by the Southern Marketing Agency, Inc., is available online at www.fmmatlanta.com (click on 'What's New'). Please submit comments by the close of business on May 26, 2010 via fax to (770) 822-1038, via email to smosley@fmmatlanta.com, or via mail to Market Administrator, 1550 North Brown Road Suite 120, Lawrenceville, GA 30043.

Uniform Price Declines

The uniform price in Hillsborough County, Florida, was \$18.20 per hundredweight for milk at 3.5 percent butterfat for the month of April. This represents a decrease of \$0.93 compared with the previous month and an increase of \$3.09 from April of last year.

Class I utilization was 88.74 percent in April, a increase of 1.68 percent compared with last month and an increase of 2.94 percent from April 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in March was 16.58 billion pounds, an increase of 0.6 percent from March 2009 and an increase of 1.5 percent when compared with February 2010 on a daily average basis. Total cheese output was 890 million pounds, 2.3 percent above March 2009 and 3.7 percent above February 2010 on a daily average basis. Butter production was 141 million pounds, 4.3 percent below March 2009 and down 9.7 percent compared to February 2010 on a daily average basis.

Nonfat dry milk powder production was 137.5 million pounds in March, up slightly from March of last year and 5.5 percent above February 2010 on a daily average basis. Dry whey production was 93.6 million pounds, up 13.1 percent from March 2009 and 6.0 percent above February 2010 on a daily average basis. Whey protein concentrates production was 36.3 million pounds, up 3.0 percent from March 2009 and 4.5 percent above February 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.51 in April, down 0.04 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in April 2010 is \$18.20 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.13 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5801 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In April, Class I use accounted for 90.17% of all producer skim milk (priced to handlers at \$8.19 per hundredweight, plus the Class I differential and 49.50% of producer butterfat (priced to handlers at \$1.5179 per pound plus Class I differential). Class II use accounted for 6.66% of all producer skim milk (\$8.52 per hundredweight) and 37.11% of producer butterfat (\$1.5883 per pound). Class III use accounted for 2.09% of all producer skim milk (\$7.65 per hundredweight) and 5.07% of producer butterfat (\$1.5813 per pound). Class IV use accounted for 1.08% of all producer skim milk (\$8.49 per hundredweight) and 8.32% of producer butterfat (\$1.5813 per pound).

Receipts of producer milk during April totaled 242.0 million pounds, 16.8 million pounds less than was pooled in April of last year. Florida producers supplied 183.7 million pounds of milk in March 2010 or 70.04% of the total producer milk pooled in Florida. In March 2009, Florida producers supplied 70.86% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for April 2010. In-area Class I route disposition totaled 264.9 million pounds in March 2010, 73 thousand pounds less than March 2009 and a decrease of 2.14 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE - 482 May 11, 2010

Milk production for 2011 is forecast to increase as producers respond to improving returns. Cow numbers are projected lower than 2010, but the rate of decline is expected to slow, especially in the latter part of the year. Milk per cow is forecast to increase at a rate similar to 2010. Commercial exports are forecast to increase as the global economy improves. Imports will also increase slightly. An improving economy will support increased domestic use, reducing stocks below 2010 levels. Cheese, nonfat dry milk (NDM), and whey prices are forecast higher in the face of improved demand and tighter supplies. However, butter prices are expected to be below 2010 levels. Nonetheless, both Class III and Class IV prices are forecast to be higher than 2010 as higher cheese and whey prices support the Class III price and stronger NDM prices more than offset weaker butter prices and support the Class IV price. The all milk price is forecast at \$15.70 to \$16.70 per cwt for 2011.

Forecast milk supply in 2010 is raised slightly from last month reflecting a slower decline in cow numbers and stronger expected growth in milk per cow. Cheese and whey price forecasts are lowered, resulting in a lower Class III price. Butter and NDM price forecasts are raised and the Class IV price increased. The all milk price is forecast to average \$15.65 to \$16.15 per cwt.

June 2010

Volume 11—No. 6

Fluid Milk Product Definition Decision Issued

The USDA has issued a final decision to amend the definition of Class I fluid milk products in all Federal milk marketing orders. These amendments were considered in a recommended decision published May 17, 2006.

Under the final decision, a product will meet the compositional standards for fluid milk products if it contains at least 6.5 percent nonfat milk solids or 2.25 percent true milk protein. This decision also amends the fluid milk product definition to provide exemptions for drinkable yogurt products containing at least 20 percent yogurt (by weight), kefir, and products intended to be meal replacements. The decision clarifies how milk and milk-derived ingredients should be priced under all Federal milk marketing orders when used in fluid milk products.

The final decision was published in the June 14 Federal Register. These amendments are subject to producer approval before they can be implemented. For additional information, visit www.fmmatlanta.com and click on 'What's New'.

DOJ and USDA Dairy Workshop

The Department of Justice and the USDA have announced additional details regarding the June 25, 2010 public workshop in Madison, Wisconsin, which will examine competition and regulatory issues in the dairy industry. The workshop will be held in the Union Theater at the University of Wisconsin – Madison, 800 Langdon Street, Madison, Wisconsin.

This is the third in a series of five joint public workshops. The first workshop was held in March in Ankeny, Iowa, with a focus on row crops and hogs. The second workshop focused on issues in the poultry industry and was held in Normal, Alabama, last month.

The workshops, which (*continued on Page 4*)

Uniform Price Higher in May

The uniform price in Hillsborough County, Florida, was \$18.73 per hundredweight for milk at 3.5 percent butterfat for the month of May. This represents an increase of \$0.53 compared with the previous month and an increase of \$3.08 from May of last year.

Class I utilization was 84.93 percent in May, a decrease of 3.81 percent compared with last month and a decrease of 0.75 percent from May 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in April was 16.39 billion pounds, an increase of 1.5 percent from April 2009 and an increase of 2.1 percent when compared with March 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 863 million pounds, 1.8 percent above April 2009 but essentially unchanged from March 2010 on a daily average basis. Butter production was 139 million pounds, 2.5 percent below April 2009 but 3.2 percent higher than March 2010 on a daily average basis.

Nonfat dry milk powder production was 152.2 million pounds in April, up 7.7 percent from April of last year and 14.7 percent above March 2010 on a daily average basis. Dry whey production was 90.8 million pounds in April, an increase of 9.1 percent from April 2009 and 1.4 percent above March 2010 on a daily average basis. Whey protein concentrates production was 35.7 million pounds in April, up 8.4 percent from April 2009 and 1.4 percent above March 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.20 in May, up 0.02 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in May 2010 is \$18.73 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.32 per hundredweight plus 3.5 times the uniform butterfat price of \$1.6803 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In May, Class I use accounted for 86.25% of all producer skim milk (priced to handlers at \$8.53 per hundredweight, plus the Class I differential and 48.12% of producer butterfat (priced to handlers at \$1.5920 per pound plus Class I differential). Class II use accounted for 6.46% of all producer skim milk (\$9.23 per hundredweight) and 34.55% of producer butterfat (\$1.7128 per pound). Class III use accounted for 4.27% of all producer skim milk (\$7.68 per hundredweight) and 6.62% of producer butterfat (\$1.7058 per pound). Class IV use accounted for 3.02% of all producer skim milk (\$9.66 per hundredweight) and 10.71% of producer butterfat (\$1.7058 per pound).

Receipts of producer milk during May totaled 239.9 million pounds, 7.9 million pounds less than was pooled in May of last year. Florida producers supplied 172.6 million pounds of milk in April 2010 or 71.30% of the total producer milk pooled in Florida. In April 2009, Florida producers supplied 73.88% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for May 2010. In-area Class I route disposition totaled 245.1 million pounds in April 2010, 10.8 pounds less than April 2009 and a decrease of 5.58 percent after adjusting for calendar composition.

DOJ and USDA Dairy Workshop

(continued from Page 1) were first announced by Attorney General Eric Holder and Agriculture Secretary Tom Vilsack on Aug. 5, 2009, are the first joint Department of Justice/USDA workshops ever to be held to discuss competition and regulatory issues in the agriculture industry. The goals of the workshops are to promote dialogue among interested parties and foster learning with respect to the appropriate legal and economic analyses of these issues, as well as to listen to and learn from parties with experience in the agriculture sector. Attendance at the workshops is free and open to the public. The general public and media interested in attending the Wisconsin workshop should register at www.surveymonkey.com/s/V3FHXPY.

U.S. Attorney General Eric Holder, U.S. Agriculture Secretary Tom Vilsack and Assistant Attorney General for the Justice Department's Antitrust Division Christine Varney will participate in a roundtable discussion to open the Wisconsin workshop. Senators Herb Kohl and Russell Feingold, Representatives Ron Kind, Steve Kagen and Tammy Baldwin, Governor Jim Doyle, and Wisconsin Agriculture Secretary Rod Nilsestuen have tentatively accepted invitations to join this roundtable discussion. Invitations have been extended to Representatives Thomas Petri and David Obey. The remaining panels will feature farmers, processors, academics and other dairy industry stakeholders. Additional details on the schedule and panelists will be provided at a later date.

The Justice Department and USDA will hold the next public workshop in Fort Collins, Colorado, where the focus will be on the livestock industry. This will be followed by a workshop on margins in agriculture in Washington.

Please visit the Antitrust Division's events website, www.justice.gov/atr/events.htm, or contact agriculturalworkshops@usdoj.gov for more information.

WASDE Dairy Report 1/

WASDE – 483 June 10, 2010

Forecast milk production for 2010 is raised slightly from last month reflecting a slower decline in cow numbers and stronger expected growth in milk per cow. Milk production for 2011 is unchanged. Exports for 2010 and 2011 are raised on both a fat and skim solids basis. Product exports were higher than expected in the first quarter of 2010, and with generally tight world supplies, U.S. exports are expected to remain strong into 2011. Import forecasts are lowered for 2010 and 2011. Imports are reduced largely because of smaller-than-expected cheese imports in the first-quarter 2010 and expectations that imports will remain weak into 2011 due to relatively low U.S. prices and tight world supplies.

The Class III price forecast for 2010 is reduced slightly on a lower whey price forecast as international whey prices are weaker. The Class IV price forecast for 2010 is raised on higher butter and nonfat dry milk (NDM) price forecasts. The all milk price for 2010 is forecast to average \$15.75 to \$16.15 per cwt. The 2011 forecasts for Class III and IV prices and the all milk price are raised. Improving domestic and export demand is expected to support NDM prices. The cheese price forecast is raised as higher butter/powder values are expected to divert milk from cheese production. Coupled with higher forecast exports and lower imports, tighter supplies are expected to support prices. The all milk price forecast for 2011 is raised to \$15.80 to \$16.80 per cwt.

1/ The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

Volume 11—No. 7

Higher Milk Production To Keep Prices Moderate Despite Improving Demand

Feed prices are expected to remain moderate in both 2010 and 2011. Corn prices are projected to be \$3.45 to \$3.65 per bushel for the 2009/10 crop year and to rise to average \$3.30 to \$3.90 per bushel in 2010/11. Likewise, soybean meal prices are expected to average \$295 per ton this year and average \$230 to \$270 per ton 2010/2011. Prices for feed ingredients have pushed the price of the 2010 benchmark 16-percent protein dairy feed ration 10 percent below 2009. Early forecasts are that the price of the ration will increase only slightly in 2011.

Moderate feed costs may slow the rate of decline in the number of cows in the dairy herd. The May Livestock Slaughter report showed dairy cow slaughter in April above the corresponding month in 2009. The relatively high slaughter rate, combined with the large number of retained heifers, as indicated in the January Cattle report, suggest that the U.S. dairy herd was being freshened. The U.S. herd is expected to average 9,075 thousand cows in 2010 and contract fractionally to average 9,040 in 2011. This represents a small year-over-year contraction compared with the 1.2 percent and 1.4 percent year-over-year declines observed in 2009 and 2010. The Cooperatives Working Together program is offering another herd buyout, with the majority of cows purchased expected to move to market during the summer quarter.

The herd liquidation appears to be slowing; however, the feed price forecast for both this year and next, along with herd freshening, will combine to boost output per cow. Milk production per cow is expected to increase nearly 2 percent in 2010 over 2009 to about 20,980 pounds per cow. In 2011, production per cow (*continued on Page 4*)

Uniform Price Up \$1.12

The uniform price in Hillsborough County, Florida, was \$19.85 per hundredweight for milk at 3.5 percent butterfat for the month of June. This represents an increase of \$1.12 compared with the previous month and an increase of \$4.89 from June of last year.

Class I utilization was 83.72 percent in June, a decrease of 1.21 percent compared with last month and a decrease of 5.02 percent from June 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in May was 16.98 billion pounds, an increase of 1.1 percent from May 2009 and an increase of 0.2 percent when compared with April 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 878 million pounds, 2.5 percent above May 2009 and 1.4 percent below April 2010 on a daily average basis. Butter production was 131 million pounds, 5.6 percent below May 2009 and 4.5 percent below April 2010 on a daily average basis.

Nonfat dry milk powder production was 154.4 million pounds in May, an increase of 2.6 percent from May of last year and 1.9 percent below April 2010 on a daily average basis. Dry whey production was 89.7 million pounds, up 2.9 percent from May 2009 and 4.3 percent below April 2010 on a daily average basis. Whey protein concentrates production was 35.9 million pounds in May, up 3.4 percent from May 2009 and 2.6 percent below April 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.33 in June, up 0.14 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in June 2010 is \$19.85 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.22 per hundredweight plus 3.5 times the uniform butterfat price of \$1.7496 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In June, Class I use accounted for 84.97% of all producer skim milk (priced to handlers at \$9.61 per hundredweight, plus the Class I differential and 49.26% of producer butterfat (priced to handlers at \$1.7155 per pound plus Class I differential). Class II use accounted for 7.31% of all producer skim milk (\$10.31 per hundredweight) and 37.97% of producer butterfat (\$1.7304 per pound). Class III use accounted for 4.52% of all producer skim milk (\$7.86 per hundredweight) and 7.01% of producer butterfat (\$1.7234 per pound). Class IV use accounted for 3.20% of all producer skim milk (\$9.76 per hundredweight) and 5.76% of producer butterfat (\$1.7234 per pound).

Receipts of producer milk during June totaled 225.0 million pounds, 3.6 million pounds more than was pooled in June of last year. Florida producers supplied 168.9 million pounds of milk in May 2010 or 70.39% of the total producer milk pooled in Florida. In May 2009, Florida producers supplied 76.23% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for June 2010. In-area Class I route disposition totaled 240.8 million pounds in May 2010, 2.8 million pounds more than May 2009 and an increase of 1.40 percent after adjusting for calendar composition.

Higher Milk Production To Keep Prices Moderate Despite Improving Demand

(continued from Page 1) is forecast to rise another 1.8 percent to 21,355 pounds. The expected increase in milk per cow will provide 190.4 billion pounds of milk in 2010 and 193 billion pounds in 2011; both forecasts represent yearly increases in milk production from a slightly smaller herd compared with recent years.

Lower milk production in Oceania has tightened world supplies of major dairy products. The impact on U.S. markets is to lower milk equivalent imports on both a fats and skims-solids basis and support exports. Exports of cheese, butter, and nonfat dry milk (NDM) were all higher in April, and the difference between U.S. and international prices remain favorable for U.S. exports. However, the strong U.S. dollar relative to the Euro and relatively large European Union (EU) intervention stocks of powder could be factors that limit U.S. powder exports. Notably, the EU did not accept any bids for skim milk powder in its most recent intervention tender. Milk equivalent exports are projected to reach just over 5.0 billion pounds this year and 5.1 billion in 2011 on a fats basis. The corresponding export forecasts on a skims-solids basis are about 26 billion pounds and 27.1 billion pounds. All forecasts represent increases from 2009. Milk equivalent imports both this year and next will likely be below 2009. Imports are forecast at 4.8 billion pounds this year and 4.9 billion in 2011 on a fats basis and 4.4 billion pounds and 4.8 billion pounds for 2011 on a skims-solids basis.

Ending commercial stocks on a fats basis are expected to be drawn down both this year and next, reflecting climbing domestic commercial use, which is forecast to rise 1.2 percent in 2010 and by 1.5 percent next year. This suggests a recovery in domestic cheese use. On a skims-solids basis, ending stocks are expected to change very little this year and next, reflecting virtually flat domestic commercial use this year compared with 2009 and about a 1-percent increase in 2011.

WASDE Dairy Report 1/

WASDE – 484 July 9, 2010

Forecast milk production for 2010 and 2011 is raised slightly from last month. Milk cow numbers have remained higher than expected and milk per cow is expected to increase more rapidly than previously forecast. Exports for 2010 are raised reflecting strong sales of dairy products but fat-basis exports for 2011 are unchanged from last month as production of fat-based products by competing exporters is expected to increase in 2011. However, the forecast of skim basis exports is raised for 2011 as nonfat dry milk (NDM) exports will likely reflect improving economic conditions. Fat-basis imports for 2010 and 2011 are forecast lower reflecting tight world supplies and growing international demand.

The Class III price forecast for 2010 is reduced on a lower cheese price forecast, but the Class IV price forecast is raised as the price forecast for butter is raised, more than offsetting a reduction in the NDM price. The 2011 forecast for butter is raised slightly but forecasts for other products are unchanged. The Class III and Class IV price forecasts are raised. The all milk price is forecast to average \$15.80 to \$16.10 per cwt for 2010 and \$15.90 to \$16.90 per cwt for 2011.

USDA: 'Long-Term Growth in U.S. Cheese Consumption May Slow'

A new report from USDA's Economic Research Service examines data on cheese production and marketings to determine the factors influencing cheese consumption. Income, age and other demographic characteristics of the U.S. population are found to play significant roles in the growth of cheese consumption over the past thirty years. Given the changing demographics of the nation, the reports main finding is that long-term growth in cheese consumption may slow down. The report may be downloaded at www.ers.usda.gov/Publications/ by entering the publication date, August 12, 2010 in the search box.

The following is an excerpt from the report:

"[T]o the extent increases in consumers' food expenditure transfers into higher cheese expenditures then it is expected that total cheese consumption also will rise.

Race and ethnicity are important factors that may have significant impacts on cheese purchases and consumption. Our findings show that Whites purchased more total cheese in 2005 than other races or ethnic groups in the United States. To the extent that the non-White population is forecast to increase more rapidly than the White population, average per capita cheese consumption in the U.S. may reflect a shift toward patterns of lower cheese consumption (U.S. Department of Commerce, 2008). The implication behind this change in ethnic demographics is a possible per capita reduction in cheese purchases and consumption.

Regional population is another factor that has affected cheese purchase and consumption in the past and will likely play some role in the future. As the results suggest, there *(continued on Page 4)*

Uniform Price Up \$1.02

The uniform price in Hillsborough County, Florida, was \$20.87 per hundredweight for milk at 3.5 percent butterfat for the month of July. This represents an increase of \$1.02 compared with the previous month and an increase of \$5.79 from July of last year.

Class I utilization was 89.51 percent in July, an increase of 5.79 percent compared with last month and an increase of 0.60 percent from July 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in June was 16.32 billion pounds, an increase of 2.4 percent from June 2009 and a decrease of 0.8 percent when compared with May 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 882 million pounds, 5.2 percent above June 2009 and 3.6 percent above May 2010 on a daily average basis. Butter production was 118 million pounds, 5.6 percent below June 2009 and 6.3 percent below May 2010 on a daily average basis.

Nonfat dry milk powder production was 136.1 million pounds in June, down 6.8 percent from June 2009 and 8.9 percent below May 2010 on a daily average basis. Dry whey production was 85.8 million pounds, down 7.4 percent from June 2009 and 1.0 percent below May 2010 on a daily average basis. Whey protein concentrates production was 34.3 million pounds in June, down 0.8 percent from June 2009 and 1.3 percent less than May 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.31 in July, up 0.03 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in July 2010 is \$20.87 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$15.04 per hundredweight plus 3.5 times the uniform butterfat price of \$1.8157 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In July, Class I use accounted for 90.84% of all producer skim milk (priced to handlers at \$10.12 per hundredweight, plus the Class I differential and 53.17% of producer butterfat (priced to handlers at \$1.6839 per pound plus Class I differential). Class II use accounted for 6.65% of all producer skim milk (\$10.82 per hundredweight) and 37.98% of producer butterfat (\$1.9034 per pound). Class III use accounted for 1.41% of all producer skim milk (\$7.36 per hundredweight) and 4.42% of producer butterfat (\$1.8964 per pound). Class IV use accounted for 1.10% of all producer skim milk (\$9.44 per hundredweight) and 4.43% of producer butterfat (\$1.8964 per pound).

Receipts of producer milk during July totaled 224.5 million pounds, 6.9 million pounds less than was pooled in July of last year. Florida producers supplied 154 million pounds of milk in June 2010 or 68.42% of the total producer milk pooled in Florida. In June 2009, Florida producers supplied 74.07% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for July 2010. In-area Class I route disposition totaled 220.9 million pounds in June 2010, 7.0 million pounds less than June 2009 and a decrease of 1.89 percent after adjusting for calendar composition.

USDA: 'Long-Term Growth in U.S. Cheese Consumption May Slow'

(continued from Page 1) "are regional differences in cheese consumption, and assuming the U.S. total population continues to grow, where that growth takes place can affect the magnitude of cheese consumption. For example, if the South and Northeast are expected to have the largest increase in population over the next decade, then one can expect that there will be a greater demand for processed cheese, and other cheeses (the non-Italian varieties), all else being equal.

A final factor that may influence future cheese consumption is age. Improved medical treatments have allowed people to live longer and, in some cases, healthier lives. As people grow older, most tend to adjust their lifestyles, including their diets. As Baby Boomers move into the 60-yearsold and older age group, it is expected that they will continue to consume cheese to obtain the vitamin D and/or calcium needed for strong bones. The Nielsen data indicate that per capita total cheese purchases for male heads of household ages 65 and older are highest among all male heads of household and female heads of household ages 65 and older are second-highest among all female heads of household. The expectations of more cheese being consumed by that age group also would suggest more milk needed for cheese. Stronger increases, or perhaps even a gradual increase in total cheese production, would require processing/manufacturing adjustments for both cheese and milk.

Future patterns of cheese consumption have implications for the dairy industry, particularly given the large (and growing) share of U.S. milk production that has been used to manufacture cheese products. If consumer expenditure and/or total population should grow and demand for dairy products other than cheese remain as they are, the dairy industry will need to adjust to the growing demand for cheese."

WASDE Dairy Report 1/

WASDE – 485 August 12, 2010

Forecast milk production for 2010 and 2011 is raised from last month. Producers continue to add cows to the herd and the rate of growth in milk per cow has increased. Exports for 2010 and 2011 are raised sharply as June exports were strong, global supplies remain relatively tight, and demand in a number of markets is expected to support higher than previously forecast sales. However, sales in 2011 will be dampened by increased competition.

Strong demand for butter and cheese resulted in higher forecast prices for 2010 but the prices for nonfat dry milk (NDM) and whey are lowered from last month. The Class III price forecast for 2010 is raised as the higher cheese price more than offsets the lower whey price, but the Class IV price forecast is reduced as the lower NDM price more than offsets the higher butter price. For 2011, cheese, NDM, and whey price forecasts are reduced but butter is raised. For 2011, the Class III and Class IV price forecasts are lowered. The all milk price is forecast to average \$15.90 to \$16.10 per cwt for 2010 and \$15.55 to \$16.55 per cwt for 2011.

Volume 11—No. 9

USDA Issues Final Rule on Class I Fluid Milk Product Definition

The U.S. Department of Agriculture has issued a final rule amending the definition of Class I fluid milk products in all Federal milk marketing orders effective January 1, 2011.

These amendments, which were approved by producers, maintain the current 6.5 percent nonfat milk solid standard and incorporate an alternative 2.25 percent true milk protein criterion to determine whether a product meets the compositional standard for fluid milk products. This rule also amends the fluid milk product definition to provide exemptions for drinkable yogurt products containing at least 20 percent yogurt (by weight), kefir, and products intended to be meal replacements. The decision clarifies how milk and milk-derived ingredients should be priced under all Federal milk marketing orders when used in fluid milk products. The final rule appeared in the August 24, 2010 Federal Register and is available at www.fmmatlanta.com under 'What's New'. If you have questions regarding this announcement, please contact this office directly.

Dairy Industry Advisory Committee Update

The Dairy Industry Advisory Committee has announced two additional public meetings to be held in the near future to discuss farm milk price volatility, dairy farmer profitability, review proposals and analysis, and hear public comments. The public meetings will be on September 23 and 24, 2010, and October 12 and 13, 2010 in Washington, D.C. You must register by September 21, 2010 and by October 8, 2010, to attend the respective public meetings. The Dairy Committee is responsible for making recommendations to the Secretary on policy issues impacting the dairy industry. Find more information at www.fsa.usda.gov/DIAC.

Uniform Price Lower

The uniform price in Hillsborough County, Florida, was \$20.74 per hundredweight for milk at 3.5 percent butterfat for the month of August. This represents a decrease of \$0.13 compared with the previous month and an increase of \$5.86 from August of last year.

Class I utilization was 86.56 percent in August, a decrease of 2.95 percent compared with last month and a decrease of 0.49 percent from August 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in July was 16.48 billion pounds, an increase of 2.9 percent from July 2009 and a decrease of 2.4 percent when compared with June 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 882 million pounds, 4.7 percent higher than July 2009 and 3.1 percent below June 2010 on a daily average basis. Butter production was 111 million pounds, 2.9 percent below July 2009 and 8.4 percent lower than June 2010 on a daily average basis.

Nonfat dry milk powder production was 131.8 million pounds in July, 1.0 percent lower than July 2009 and 6.3 percent less than June 2010 on a daily average basis. Dry whey production was 87.5 million pounds, a decrease of 6.5 percent compared with July 2009 and 1.6 percent below June 2010 on a daily average basis. Whey protein concentrates production was 34.9 million pounds in July, down 0.8 percent from July 2009 and 1.2 percent less than June 2010 on a daily average basis.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.36 in August, up 0.04 from the previous month's revised ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in August 2010 is \$20.74 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.26 per hundredweight plus 3.5 times the uniform butterfat price of \$1.9930 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In August, Class I use accounted for 87.94% of all producer skim milk (priced to handlers at \$9.49 per hundredweight, plus the Class I differential and 49.06% of producer butterfat (priced to handlers at \$1.8899 per pound plus Class I differential). Class II use accounted for 6.93% of all producer skim milk (\$10.19 per hundredweight) and 36.95% of producer butterfat (\$2.0406 per pound). Class III use accounted for 2.53% of all producer skim milk (\$8.35 per hundredweight) and 6.99% of producer butterfat (\$2.0336 per pound). Class IV use accounted for 2.60% of all producer skim milk (\$8.80 per hundredweight) and 7.00% of producer butterfat (\$2.0336 per pound).

Receipts of producer milk during August totaled 232.9 million pounds, 10.0 million pounds less than was pooled in August of last year. Florida producers supplied 157.3 million pounds of milk in July 2010 or 70.08% of the total producer milk pooled in Florida. In July 2009, Florida producers supplied 70.07% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for August 2010. In-area Class I route disposition totaled 236.6 million pounds in July 2010, 2.4 million pounds less than July 2009 but an increase of 0.38 percent after adjusting for calendar composition.

Packaged Class I Route Sales in Marketing Area

Product Description	Pounds	Percent

USDA Enhances Enforcement of Organic Standards

The U.S. Department of Agriculture's Agricultural Marketing Service has issued new procedures that will increase the effectiveness of enforcing national organic standards. Operating procedures are now in effect for the National Organic Program (NOP) to ensure that all complaints of alleged violations and civil penalties are consistently handled.

In the past, complaints of alleged standards violations were referred to accredited certifying agents for investigation and enforcement. With the implementation of new procedures, the NOP will collaborate with accredited certifying agents in investigating cases while handling all enforcement actions.

"The changes we are making will ensure that all parties are given due process while increasing the effectiveness of enforcing organic standards," said Miles McEvoy, NOP deputy administrator. "At the same time we want to take steps so that those who are abiding by the regulations and rightfully marketing their foods as organic are not put at a disadvantage by those falsely labeling their products. It allows us to perform our job of assuring consumers they can trust the USDA organic label."

The new complaint handling procedures were put into effect as part of a continued effort by the NOP to increase enforcement actions and ensure greater compliance of the organic regulations. Since Jan. 2010, the NOP has closed 87 complaints and issued three civil penalties. The NOP accredits about 100 certifying agents around the world to evaluate agricultural production and handling operations and determine their compliance with the national organic standards.

It is USDA's policy to investigate all complaints that allege violations of rules and regulations, whether submitted by independent claimants, filed by an accredited certifying agent, or initiated by the NOP itself. Any person may file a complaint if he or she believes a violation has occurred.

WASDE Dairy Report 1/

WASDE – 486 September 10, 2010

Forecast milk production for 2010 and 2011 is raised from last month. Producers continue to add cows to the herd and inventories are forecast to increase into mid-2011. The rate of growth in milk per cow is also increased from last month. Fat basis export forecasts for 2010 are raised on strong sales of butterfat and cheese, but 2011 exports are lowered. Skim-solids exports for 2010 and 2011 are forecast higher than last month. Imports are reduced from last month due to higher U.S. production and strong demand in other importing countries. Ending stocks for 2011 are increased as U.S. production is forecast higher.

Strong demand for cheese and tight supplies of butter support higher forecast prices for 2010 and 2011. Stronger demand is forecast to absorb most of the increased production although prices are expected to be tempered during the latter part of 2011. Price forecasts for nonfat dry milk (NDM) are raised for 2010, but the 2011 forecast is unchanged from last month as increased supplies limit price gains. The whey price forecast is unchanged. Both Class III and Class IV price forecasts for 2010 and 2011 are raised due to the higher product prices. The all milk price is forecast to average \$16.25 to \$16.45 per cwt for 2010 and \$15.85 to \$16.85 per cwt for 2011.

1/ *The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.*

Secretary Vilsack Commends Dairy Industry for Efforts to Reduce Carbon Footprint

In a speech on September 23, Agriculture Secretary Tom Vilsack commended U.S. dairy farmers and processors for their commitment to economic and environmental sustainability following the unveiling of a landmark carbon footprint study of the U.S. fluid milk sector.

"American agriculture can play an important role in reducing carbon emissions and improving the environment, and the dairy industry in particular has been a leader on these issues," Vilsack said. "This carbon footprint study will be very helpful to all stakeholders in the dairy industry and I look forward to working with dairy producers, processors and the entire value chain on efforts that benefit the environment and improve the economic viability of the industry." (continued on page 4)

USDA Seeks Nominations

The USDA is asking fluid milk processors and other interested parties to nominate candidates for the National Fluid Milk Processor Promotion Board. The Secretary of Agriculture will appoint six individuals from those nominated to succeed members whose terms expire June 30, 2011. Appointed members will serve 3-year terms from July 1, 2011 through June 30, 2014.

Nominees for the five regional positions must be active owners or employees of a fluid milk processor. The one at-large position may be either a fluid milk processor or a member from the general public. The geographic regions are: Region 2 (New Jersey and New York); Region 5 (Florida); Region 8 (Illinois and Indiana); Region 11 (Arkansas, Iowa, Kansas, Missouri, Nebraska and Oklahoma); and Region 14 (Northern California). Nominations are due by October 31. Blank nomination forms and additional information are available at www.ams.usda.gov/Dairy.

Uniform Price Rises

The uniform price in Hillsborough County, Florida, was \$21.04 per hundredweight for milk at 3.5 percent butterfat for the month of September. This represents an increase of \$0.30 compared with the previous month and an increase of \$5.46 from September 2009.

Class I utilization was 87.86 percent in September, an increase of 1.30 percent compared with last month and an increase of 2.18 percent from September 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in August was 16.16 billion pounds, an increase of 2.7 percent from August 2009 and a decrease of 2.0 percent when compared with July 2010. Total cheese output (excluding cottage cheese) was 881 million pounds, 3.5 percent higher than August 2009 but 0.1 percent lower than July 2010. Butter production was 102 million pounds, 0.6 percent above August 2009 but a decrease of 8.4 percent compared to July 2010.

Nonfat dry milk powder production was 120.0 million pounds in August, 12.1 percent higher when compared with August 2009 and 9.0 percent less than July 2010. Dry whey production was 81.9 million pounds in August, which is a decrease of 0.8 percent compared with August 2009 and 6.5 percent below July 2010. Whey protein concentrates production was 35.3 million pounds in August, an increase of 0.9 percent from August 2009 but down 1.8 percent compared to July 2010.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.24 in September, up 0.13 from the previous month's revised ratio of 2.37.

Southeast Market Summary

The minimum order uniform price for payment to producers supplying the Southeast Order marketing area during September 2010 is \$19.38 per hundredweight for milk with a 3.5% butterfat test in Fulton County, Georgia. This is .965 times the uniform skim milk price of \$11.90 per hundredweight plus 3.5 times the uniform butterfat price of \$2.2551 per pound. Payment to producers may be reduced by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In September, Class I use, which is primarily bottled or packaged fluid milk, accounted for 75.24% of all producer skim milk (priced to handlers at \$8.79 per hundredweight, plus the Class I differential, see page 2) and 41.23% of producer butterfat (priced to handlers at \$2.0047 per pound plus Class I differential). Class II use, which is milk used in fluid cream products and miscellaneous manufacturing, accounted for 7.89% of all producer skim milk (\$9.49 per hundredweight) and 25.63% of producer butterfat (\$2.4114 per pound). Class III use, mostly milk used to produce cheese, accounted for 15.49% of all producer skim milk (\$8.13 per hundredweight) and 20.75% of producer butterfat (\$2.4044 per pound). Class IV use, generally milk processed into butter and powder, accounted for 1.38% of all producer skim milk (\$8.65 per hundredweight) and 12.39% of producer butterfat (\$2.4044 per pound).

Packaged Class I Route Sales in Marketing Area

Product Description	Pounds	Percent
August 2010		
Whole Milk	130,712,600	30.79%
Fat Free Milk	51,409,858	12.11%
Lowfat Milk (incl. 1%)	37,850,158	8.92%
Reduced Fat Milk (incl. 2%)	152,217,073	35.85%
Cultured Fluid Milk (incl. Buttermilk)	7,802,177	1.84%
Flavored Drinks and Milk	44,567,116	10.50%
Total Disposition in Marketing Area	424,558,982	100.00%
Total Disposition by Pool Plants	345,499,983	81.38%
Total Disposition by Nonpool Plants	79,058,999	18.62%
Total Disposition in Marketing Area	424,558,982	100.00%

Receipts of producer milk during September totaled 530.0 million pounds. There were 24 regulated pool distributing plants, 2 pool supply plants and 14 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for September 2010. Class I route disposition in the area was 424.6 million pounds in August 2010.

Secretary Vilsack Commends Dairy Industry for Efforts to Reduce Carbon Footprint

(continued from page 1) The fluid milk carbon footprint study, the first of its kind for a U.S. agricultural product, was presented on September 22 at the International Food Life Cycle Assessment Conference. The study is the dairy industry's initial step in a comprehensive, science-based approach to measure and improve its carbon footprint. It will provide a scientific basis to identify research needs and enable the industry to identify and measure management practices and technologies that are most effective in increasing productivity and reducing greenhouse gas emissions. Together with data from additional studies, the carbon footprint study indicates that total U.S. dairy greenhouse gas emissions are approximately 2 percent of total U.S. emissions.

The Innovation Center for U.S. Dairy commissioned the University of Arkansas' Applied Sustainability Center to conduct the fluid milk carbon footprint study. It is a life cycle assessment (LCA) that measured the greenhouse gas emissions created from the production of milk -- from when crops are grown to feed cows all the way to the disposal of the milk carton by the consumer. One of its key findings is that the increased adoption of best management practices along the entire fluid milk supply chain can increase profitability while improving environmental sustainability.

Last December, USDA and the Innovation Center for US Dairy signed an MOU to work together on sustainability issues and to reduce the industry's carbon footprint. The U.S. dairy industry has a long history of environmental stewardship. According to Cornell University, the carbon footprint of milk production dropped by 63% between 1944 - 2007 as a result of production efficiencies, nutrition management and other on-farm improvements.

More information about the U.S. fluid milk carbon footprint study is available at www.usdairy.com/sustainability.

WASDE Dairy Report 1/

WASDE – 487 October 8, 2010

Forecast milk production for 2010 is raised slightly from last month as higher milk per cow more than offsets lower cow numbers. The forecast for 2011 is reduced as higher feed prices are expected to slow the rate of growth in cow numbers and milk per cow compared with last month. Import and export forecasts are unchanged. Fat basis stocks are reduced for 2010 as stocks of butter are forecast to be tight. Skim solids stocks are unchanged.

Continued strength in demand for cheese and relatively tight supplies of butter support higher forecast prices for 2010 and 2011. Price forecasts for nonfat dry milk (NDM) are raised for 2010 and 2011 as supplies are tighter. The 2010 whey price forecast is increased slightly but is unchanged for 2011. Both Class III and Class IV price forecasts for 2010 and 2011 are raised due to the higher product prices. The all milk price is forecast to average \$16.45 to \$16.55 per cwt for 2010 and \$16.00 to \$16.90 per cwt for 2011.

NASS: “Large Operations Increase Share of Inventory and Milk Production”

The following are excerpts from “Overview of the United States Dairy Industry” by the National Agricultural Statistics Service (NASS) which was released on September 22, 2010.

“The dairy industry in the United States has undergone significant structural change over the past eight years. Total milk cow operations have declined significantly, while the number of large operations has increased. This report compares 2009 production year data to the 2001 data released in the U.S. Dairy Herd Structure report, published in September 2002.”

“The number of milk cow operations continues to decline in the United States. There were 65,000 milk cow operations in 2009 compared to 97,460 in 2001, a decline of 33 percent. Despite the large decrease in milk cow operations during this time period, both milk production and milk cow numbers have been on the rise. Milk production increased 15 percent, from 165,332 million pounds in 2001 to 189,320 million pounds in 2009. Milk cow inventory showed a smaller increase of 1 percent, from 9.10 million head in 2001 to 9.20 million head in 2009.

Although the overall number of milk cow operations has declined since 2001, the number of operations with 500 or more head of milk cows has increased. Since 2001, the number of operations with 500 or more head increased by 20 percent, from 2,795 to 3,350 in 2009. The largest size group, places with 2,000 or more head, showed the greatest percentage change from 2001, increasing from 325 places in 2001 to 740 in (cont. on page 4)

Southern Dairy Conference 2011

The 37th Annual Southern Dairy Conference will be held in Atlanta, GA on January 25-26, 2011. Go to www.southerndairyconference.com for registration and other conference information.

Uniform Price Rises

The uniform price in Hillsborough County, Florida, was \$21.46 per hundredweight for milk at 3.5 percent butterfat for the month of October. This represents an increase of \$0.42 compared with the previous month and an increase of \$4.23 from October 2009.

Class I utilization was 85.57 percent in October, a decrease of 2.29 percent compared with last month and a decrease of 2.83 percent compared with October 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in September was 15.53 billion pounds, an increase of 3.3 percent from September 2009 and a decrease of 0.4 percent when compared with August 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 879 million pounds, 4.3 percent above September 2009 and 3.7 percent above August 2010 on a daily average basis. Butter production was 110 million pounds, 16.7 percent above September 2009 and 12.3 percent above August 2010 on a daily average basis.

Nonfat dry milk powder production was 108.9 million pounds in September, 24.0 percent higher than September 2009 and 5.9 percent less than August 2010 on a daily average basis. Dry whey production was 78.2 million pounds in September, a decrease of 1.0 percent compared with September 2009 and 1.3 percent below August 2010 on a daily average basis. Whey protein concentrate production was 35.8 million pounds in September, an increase of 2.8 percent compared with September 2009 and 4.9 percent above August 2010 on a daily average basis.

The milk-feed price ratio was 2.23 in October, down 0.15 from September’s revised value.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in October 2010 is \$21.46 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.41 per hundredweight plus 3.5 times the uniform butterfat price of \$2.4327 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In October, Class I use accounted for 87.10% of all producer skim milk (priced to handlers at \$8.62 per hundredweight, plus the Class I differential and 45.80% of producer butterfat (priced to handlers at \$2.3594 per pound plus Class I differential). Class II use accounted for 6.57% of all producer skim milk (\$9.32 per hundredweight) and 31.23% of producer butterfat (\$2.4506 per pound). Class III use accounted for 3.43% of all producer skim milk (\$8.69 per hundredweight) and 10.37% of producer butterfat (\$2.4436 per pound). Class IV use accounted for 2.90% of all producer skim milk (\$8.91 per hundredweight) and 12.60% of producer butterfat (\$2.4436 per pound).

Receipts of producer milk during October totaled 244.0 million pounds, 5.9 million pounds less than was pooled in October of last year. Florida producers supplied 136.9 million pounds of milk in September 2010 or 59.54% of the total producer milk pooled in Florida. In September 2009, Florida producers supplied 55.60% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for October 2010. In-area Class I route disposition totaled 237.9 million pounds in September 2010, 1.1 million pounds more than September 2009 and an increase of 0.83 percent after adjusting for calendar composition.

NASS: "Large Operations Increase Share of Inventory and Milk Production"

(continued from page 1) "2009, a gain of 128 percent. While larger operations were growing in number, smaller operations declined in number. Places with less than 500 head went from 94,665 in 2001 to 61,650 in 2009, a decline of over 33,000 operations, or 35 percent.

As large operations have become more numerous, the share of inventory accounted for by large operations has also increased. In 2009, operations with 500 or more head accounted for 56 percent of total milk cow inventory compared with only 35 percent in 2001. Operations with 2,000 or more head accounted for 30 percent of inventory in 2009, up from only 12 percent in 2001. Places with less than 500 head accounted for 44 percent of total milk cow inventory in 2009, down from 65 percent in 2001.

As with inventory, the share of milk production accounted for by large operations has steadily increased. Operations with 500 or more head accounted for nearly 60 percent of all milk produced in 2009, up from 39 percent in 2001. Production on places with 2,000 or more head has increased from only 13 percent in 2001 to 31 percent of total milk production in 2009. Smaller operations continue to produce a smaller share of production. Places with less than 500 head accounted for nearly 41 percent of milk production in 2009, down from 61 percent in 2001."

"Milk production continues to shift to the western half of the United States., although the upper mid-west region has experienced greater milk production also. The milk-feed ratio, an indicator of the profitability of milk production, has been on a general downward trend since 2005 due to a combination of higher feed prices and lower milk prices."

For the full report, including graphical depictions of the trends towards larger dairy operations, visit www.nass.usda.gov or <http://usda.mannlib.cornell.edu/MannUsda/viewDocumentInfo.do?documentID=1831>.

WASDE Dairy Report 1/

WASDE – 488 November 9, 2010

Forecast milk production for 2010 is unchanged from last month. However, for 2011 production is lowered from last month as forecast cow numbers are reduced from last month. Milk per cow is adjusted slightly higher in early 2011 but higher feed prices and lower forecast milk prices limit the rate of growth in 2011. Exports in 2010 are forecast higher due to strong growth in butter, cheese, and fluid milk/cream. For 2011, continued global economic recovery and a favorable exchange rate should support exports. Revisions have been made to historical export aggregations, resulting in higher estimated exports. Import forecasts are raised on the strong pace of imports.

Cheese and butter prices for both 2010 and 2011 are forecast lower. The 2010 forecast for nonfat dry milk is unchanged from last month but stronger expected exports support a higher forecast for 2011. The whey price forecast is unchanged. Both Class III and Class IV price forecasts for 2010 are lowered due to the lower cheese and butter price forecasts. The Class III price forecast is lowered for 2011 but the Class IV price forecast is raised as the higher nonfat price more than offsets the lower butter price forecast. The all milk price is forecast to average \$16.30 to \$16.40 per cwt for 2010 and \$15.95 to \$16.85 per cwt for 2011.

USDA's Latest Dairy Outlook

The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's market outlook for major U.S. and global agriculture commodities. Excerpts of the dairy market outlook from the December 10, 2010 report are provide below and are also available at www.usda.gov/oce/commodity/wasde/index.htm.

"Forecast milk production for 2010 and 2011 is little changed last month. Fat-basis imports for 2010 are lowered primarily due to lower imports of cheese but skim-solids imports are unchanged due to higher imports of expected imports of other products. Fat basis exports for 2010 are raised as sales of cheese and fluid milk and cream are strong and skim-solids exports are boosted by strong sales of cheese and nonfat dry milk (NDM). Exports for 2011 are forecast higher due to expected growth in butter and nonfat dry milk sales. Ending stocks for 2010 are raised to reflect higher-than expected stocks of cheese.

For 2010, cheese and whey prices are unchanged from last month. NDM prices are forecast higher but the butter price forecast is reduced reflecting recent sharp declines in butter prices. With no change in either the cheese or whey price, the Class III price forecast is unchanged. However, the Class IV price forecast is reduced, due to a lower butter price forecast which more than offsets a higher expected NDM price. For 2011, the range of the cheese price forecast narrowed but whey is forecast higher. The butter price is reduced as current price weakness spills into early 2011. NDM prices are forecast higher. The ranges of the Class III and Class IV price forecasts are narrowed from last month. The all milk price is forecast to average \$16.25 to \$16.35 per cwt for 2010 and \$15.90 to \$16.70 per cwt for 2011."

Southern Dairy Conference 2011

The 37th Annual Southern Dairy Conference will be held in Atlanta, GA on January 25-26, 2011. Go to www.southerndairyconference.com for registration and other conference information.

Uniform Price Rises

The uniform price in Hillsborough County, Florida, was \$21.61 per hundredweight for milk at 3.5 percent butterfat for the month of November. This represents an increase of \$0.15 compared with the previous month and an increase of \$3.81 from November 2009.

Class I utilization was 86.61 percent in November, an increase of 1.04 percent compared with last month and an increase of 1.67 percent compared with November 2009.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in October was 15.87 billion pounds, an increase of 2.9 percent from October 2009 and a decrease of 1.1 percent when compared with September 2010 on a daily average basis. Total cheese output (excluding cottage cheese) was 893 million pounds, 3.5 percent above October 2009 and 1.7 percent below September 2010 on a daily average basis. Butter production was 122 million pounds, 7.5 percent above October 2009 and 3.4 percent higher than September 2010 on a daily average basis.

Nonfat dry milk powder production was 115.3 million pounds in October, 24.2 percent higher than October 2009 and 2.1 percent higher than September 2010 on a daily average basis. Dry whey production was 79.0 million pounds in October, a decrease of 3.3 percent compared with October 2009 and 2.1 percent lower than September 2010 on a daily average basis. Whey protein concentrate production was 35.4 million pounds in October, a decrease of 1.0 percent compared with October 2009 and 4.2 percent lower than September 2010 on a daily average basis.

The milk-feed price ratio was 2.22 in November 2010, down 0.18 from the previous month's revised value.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in November 2010 is \$21.61 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.80 per hundredweight plus 3.5 times the uniform butterfat price of \$2.3682 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In November, Class I use accounted for 88.14% of all producer skim milk (priced to handlers at \$8.98 per hundredweight, plus the Class I differential and 47.03% of producer butterfat (priced to handlers at \$2.4495 per pound plus Class I differential). Class II use accounted for 7.07% of all producer skim milk (\$9.68 per hundredweight) and 33.18% of producer butterfat (\$2.2492 per pound). Class III use accounted for 2.36% of all producer skim milk (\$7.87 per hundredweight) and 9.10% of producer butterfat (\$2.2422 per pound). Class IV use accounted for 2.43% of all producer skim milk (\$9.15 per hundredweight) and 10.69% of producer butterfat (\$2.2422 per pound).

Receipts of producer milk during November totaled 247.4 million pounds, 1.1 million pounds less than was pooled in November of last year. Florida producers supplied 146.8 million pounds of milk in October 2010 or 60.15% of the total producer milk pooled in Florida. In October 2009, Florida producers supplied 55.02% of producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for November 2010. In-area Class I route disposition totaled 248.5 million pounds in October 2010, 7.2 million pounds less than October 2009 and an decrease of 0.32 percent after adjusting for calendar composition.
