Class III / IV Make Allowance Hearing Announced for All Federal Orders

The U. S. Department of Agriculture has announced a national public hearing will be held to consider, and take evidence on, a proposal seeking to amend the Class III and Class IV milk price formula manufacturing allowances applicable to all Federal milk marketing orders.

The hearing will convene at 8:30 a.m., Tuesday, January 24, 2006 at the Sheraton Suites Old Town Alexandria, 801 North Saint Asaph Street, Alexandria, Virginia 22314. For more information contact: Jack Rower, Marketing Specialist, (202) 720-2357, e-mail-address: jack.rower@usda.gov.

The Department of Agriculture has conducted a preliminary analysis to assist the industry in considering the effects of increasing manufacturing allowances, commonly referred to as 'make allowances'. The following is taken directly from that analysis:

"Increasing the make allowances will generally result in lower Federal order class and blend prices, lower all-milk prices, slightly higher manufactured dairy product prices, and slightly lower fluid milk prices. Federal order cash receipts and U.S. producer revenues decline slightly. Manufacturing plants have higher dairy product prices on the revenue side and lower Federal order class and all-milk prices on the cost side.

The scenarios [of the analysis] also demonstrate that seemingly small changes in the relative values of the various make allowances can result in possibly unexpected changes in the relative values of the manufacturing class prices."

The full text of the preliminary analysis is online at www.ams.usda.gov/dairy/hearings.htm, under the heading 'National Hearings'.

Blend Price Slides Lower

The uniform blend price in Hillsborough County, FL, was \$16.89 per hundredweight for milk at 3.5 percent butterfat for the month of December. This represents a decrease of \$0.82 from the previous month and is \$1.11 lower when compared with December 2004. Class I utilization was 88.32 percent in December, an increase of 0.09 percent compared to the previous month and 2.74 percent higher than December 2004.

National Dairy Situation

USDA estimates that the total U.S. production of milk in November was 14.20 billion pounds, an increase of 4.4 percent from November 2004 and a decrease of 2.7 percent when compared with October 2005. Total cheese output (excluding cottage cheese) was 761 million pounds, 0.9 percent above November 2004 and 0.4 percent above October 2005. Butter production was 110 million pounds, 8.6 percent above November 2004 and 2.7 percent above October 2005. Nonfat dry milk production was 89.2 million pounds in November, 6.4 percent more than November 2004 and an increase of 21.0 percent when compared with October 2005.

Year-End Review of Florida Order Prices

The year 2005 drew to a close leaving Florida Order uniform blend prices, on average, \$0.83 per hundredweight lower than 2004 (\$17.57 versus \$18.40). While this is a large decline, the 2005 average blend price was still \$1.17 higher than the historic average since Federal Order reform (\$16.40). Even after adjusting for inflation, the blend prices observed in 2005 were well above long-term expectations.

The average Class I price fell \$0.58 from 2004, along with declines in the Class II price of \$0.38, the Class III price of \$1.35 and the Class IV price of \$0.33. The chart displayed on page 4 of this publication shows annual average uniform and class prices for the Florida Order since 2000.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in December 2005 is \$16.89 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.65 per hundredweight plus 3.5 times the uniform butterfat price of \$1.6138 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In December, Class I use accounted for 89.66% of all producer skim milk (priced to handlers at \$8.03 per hundredweight, plus the Class I differential and 53.94% of producer butterfat (priced to handlers at \$1.6633 per pound plus Class I differential). Class II use accounted for 6.26% of all producer skim milk (\$8.22 per hundredweight) and 29.28% of producer butterfat (\$1.5106 per pound). Class III use accounted for 1.12% of all producer skim milk (\$8.40 per hundredweight) and 1.09% of producer butterfat (\$1.5036 per pound). Class IV use accounted for 2.96% of all producer skim milk (\$7.57 per hundredweight) and 15.69% of producer butterfat (\$1.5036 per pound).

Receipts of producer milk during December 2005 totaled 262.0 million pounds, 2.3 million pounds more than was pooled in December of last year. Florida producers supplied 164.6 million pounds of milk in November 2005 to pool plants or 66.56% of the total producer milk pooled in Florida. In November 2004 Florida producers supplied 72.92% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for December 2005. In-area Class I route disposition totaled 247.4 million pounds in November 2005, 4.4 million pounds less than November 2004. This is a decrease of 3.51 percent after adjusting for calendar composition.

February 2006

Volume 7—No. 2

2005 Review of Florida Order Producer Milk

Producer milk, that is to say milk participating in a federal order pool, increased 8.8 percent on an annualized basis between 2004 and 2005 on Federal Order 6. The 3.13 billion pound total for last year is the largest amount of producer milk pooled on the market since the inception of the Florida Order as we currently know it. The volume of milk pooled in 2005 increased by 252 million pounds over the previous year, an amount roughly equivalent to a month's worth of producer milk.

Federal Order 6 Annual Producer Milk

Because fluid milk consumption is generally stagnant, the amount of producer milk utilized in Class I has remained relative constant for many years. Given this stable amount of Class I milk and an increasing amount of *total* producer milk, the percentage of milk utilized as Class I declines.

This is what occurred on the Federal Order 6 pool last year. The average Class I utilization during 2005 was 82.31, still the highest of any federal order but it was down 2.60 percentage points from the 2004 average. When compared with the average Class I utilization observed on the Florida Order between 2000 and 2004 (87.37%), last year was over five percentage points lower.

January's Blend Price: \$16.71/cwt

The uniform blend price in Hillsborough County, FL, was \$16.71 per hundredweight for milk at 3.5 percent butterfat for the month of January. This represents a decrease of \$0.18 from the previous month and is \$2.40 lower when compared with January 2005. Class I utilization was 85.42 percent in January, a decrease of 2.90 percent compared to the previous month and 0.75 percent higher than January 2005.

National Dairy Situation

USDA estimates that the total U.S. production of milk in December was 14.85 billion pounds, an increase of 3.9 percent from December 2004 and a increase of 4.8 percent when compared with November 2005. Total cheese output (excluding cottage cheese) was 791 million pounds, 2.2 percent above December 2004 and 3.9 percent above November 2005. Butter production was 126 million pounds, 5.9 percent above December 2004 and 13.3 percent above November 2005. Nonfat dry milk production was 103 million pounds in December, 10.2 percent more than December 2004 and an increase of 15.5 percent when compared with November 2005.

Annual milk production in the nation is estimated at 176.49 billion pounds for 2005, an increase of 3.3% compared with 2004. Annual total cheese production is estimated to have increased 2.6 percent last year. American and Cheddar cheese varieties grew at less than two percent, but output of Italian varieties increased at an estimated 4.0 percent compared with 2004. Total butter production in 2005 is estimated to have increased 7.0 percent, while the amount of nonfat dry milk produced fell by 15.3 percent.

Yogurt production grew at 6.8 percent and sour cream production increased by 4.5 percent in 2005. Total ice cream production was up 1.8 percent, with increases in regular fat versions outweighing declines in reduced fat ice creams.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in January 2006 is \$16.71 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.85 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5063 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In January, Class I use accounted for 86.84% of all producer skim milk (priced to handlers at \$8.42 per hundredweight, plus the Class I differential and 48.52% of producer butterfat (priced to handlers at \$1.5016 per pound plus Class I differential). Class II use accounted for 6.33% of all producer skim milk (\$8.38 per hundredweight) and 28.49% of producer butterfat (\$1.4754 per pound). Class III use accounted for 0.80% of all producer skim milk (\$8.55 per hundredweight) and 0.54% of producer butterfat (\$1.4684 per pound). Class IV use accounted for 6.03% of all producer skim milk (\$7.32 per hundredweight) and 22.45% of producer butterfat (\$1.4684 per pound).

Receipts of producer milk during January 2006 totaled 278.6 million pounds, 8.7 million pounds more than was pooled in January of last year. Florida producers supplied 182.8 million pounds of milk in December 2005 to pool plants or 69.76% of the total producer milk pooled in Florida. In December 2004 Florida producers supplied 75.27% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for January 2006. In-area Class I route disposition totaled 255.2 million pounds in December 2005, 2.96 million pounds less than December 2004. This is a decrease of 1.79 percent after adjusting for calendar composition.

Change in Average Number of Producers Pooled by Federal Orders: '00 to '05

The chart above displays the change in the average number of *producers* pooled per month on various Federal Orders between 2000 and 2005, taken from the Federal milk order public database (available at www.ams.usda.gov/USDAMIB). Combining all Federal Orders (ALL FO's) shows a decline from 69,590 producers per month in 2000 to 53,036 producers per month in 2005, a 23.8 percent loss. The Florida Order is the only marketing area to experience positive growth in the number of producers pooled. In 2000, the average number of producers shipping milk to the Florida marketing area was 305. That number jumped to 347 in 2005, an increase of 13.9%.

March 2006

Volume 7—No. 3

USDA Issues Three 'De-Pooling' Decisions

The U.S. Department of Agriculture (USDA) has issued recommended decisions to adopt amendments to the pooling provisions of three federal orders. Each of these decisions pertains either in part or in whole to preventing handlers from withholding manufacturing milk from a marketwide pool when manufacturing milk prices exceed fluid milk prices, a practice known as 'de-pooling'. Because it is not mandatory to pool manufacturing milk, handlers (for example, a cheese plant) may choose to pool or 'de-pool' whenever it is economically advantageous. Regulated fluid milk handlers do not have this same 'de-pooling' opportunity.

In an effort to curb the practice of 'de-pooling', USDA recommended limiting the volume of milk pooled in any given month to a percentage of milk pooled in the previous month. In the Central Milk Order, for example, the volume of milk a handler could pool in any month would be capped at 125 percent of the total volume of milk pooled the previous month, if producers there approve the recommended decision. Such a provision would provide a disincentive to withhold milk from the marketwide pool because doing so would limit the potential benefits of participating in the marketwide pool in future months.

Similar to the Central Order, the Upper Midwest Milk Order has proposed limits on the volume of milk that may be pooled by a handler set at 125 percent and 135 percent of the previous month's pooled volume, dependant on the time of year. The Mideast Milk Order has proposed limits for different times of the year as well, set at 115 percent and 120 percent of the previous month's total pooled volume of milk.

The text of these three recommend decisions may be viewed at www.ams.usda.gov/dairy/ by clicking on the 'Hearings' link. Public comments must be filed by April 24, 2006.

Blend Price Falls \$0.37/cwt

The uniform blend price in Hillsborough County, FL, was \$16.34 per hundredweight for milk at 3.5 percent butterfat for the month of February. This represents a decrease of \$0.37 from the previous month and is \$0.74 lower when compared with February 2005. Class I utilization was 82.33 percent in February, a decrease of 3.09 percent compared to the previous month, but 3.21 percent higher than February 2005.

National Dairy Situation

USDA estimates that the total U.S. production of milk in January was 14.85 billion pounds, an increase of 3.3 percent from January 2005 and an increase of 5.0 percent when compared with December 2005. Total cheese output (excluding cottage cheese) was 764 million pounds, 1.3 percent above January 2005 but 3.4 percent below December 2005. Butter production was 145 million pounds, 13.1 percent above January 2005 and 15.3 percent above December 2005. Nonfat dry milk production was 102 million pounds in January, 9.2 percent more than January 2005 and a decrease of 1.0 percent when compared with December 2005.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.99 in February, down from 3.50 in February 2005 and lower, also, than January 2006's 3.18 feed price ratio.

Final Rule Issued in Producer-Handler Case

USDA has issued a final rule that amends pooling and pricing provisions of the Arizona-Las Vegas and Pacific Northwest Milk Orders. Specifically, this final rule permanently adopts a provision that will eliminate the exemption from regulations, by the Orders cited, for producer-handlers with in-area route disposition in excess of 3 million pounds per month. Having the approval of more than two-thirds of producers in these two Orders, this final rule will take effect April 1, 2006.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in February 2006 is \$16.34 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.75 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4279 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In February, Class I use accounted for 83.70% of all producer skim milk (priced to handlers at \$8.51 per hundredweight, plus the Class I differential and 46.23% of producer butterfat (priced to handlers at \$1.4771 per pound plus Class I differential). Class II use accounted for 6.18% of all producer skim milk (\$8.17 per hundredweight) and 27.62% of producer butterfat (\$1.3539 per pound). Class III use accounted for 4.64% of all producer skim milk (\$7.76 per hundredweight) and 2.51% of producer butterfat (\$1.3469 per pound). Class IV use accounted for 5.48% of all producer skim milk (\$6.62 per hundredweight) and 23.64% of producer butterfat (\$1.3469 per pound).

Receipts of producer milk during February 2006 totaled 261.9 million pounds, 2.8 million pounds less than was pooled in February of last year. Florida producers supplied 198.0 million pounds of milk in January 2006 to pool plants or 71.09% of the total producer milk pooled in Florida. In January 2005 Florida producers supplied 77.25% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for February 2006. In-area Class I route disposition totaled 259.5 million pounds in January 2006, 4.95 million pounds less than January 2005. This is a decrease of 1.59 percent after adjusting for calendar composition.

2005 U.S. Milk Production Increased 3.6 %

Total U.S. milk production in 2005 is estimated to be 176.99 billion pounds, an increase of 3.6 percent when compared with 2004. Combining an increase of 0.3 percent in the number of milking cows with a 3.3 percent increase in the average milk per cow yielded one of the largest gains in year-to-year milk output in the past decade. Volume 7—No. 4

Milk Regulatory Equity Act Signed into Law

The Milk Regulatory Equity Act of 2005 was signed into law on April 11, 2006, by President Bush. It amends the Agricultural Marketing Agreement Act of 1937 to ensure regulatory equity between and among dairy farmers and handlers for sales of packaged fluid milk in Federal milk marketing order areas and into certain unregulated milk marketing areas from Federal milk marketing areas. It essentially closes a loophole that allowed a milk processor to escape Federal order regulations based on the location of a plant.

There are three main parts of the Milk Regulatory Equity Act of 2005 that have Federal order implications. The first portion deals with how plants become subject to Federal order regulation. Generally, a plant is regulated based on where its sales are distributed. Previously, if a plant was located in a Federal milk marketing area but sold fluid milk into a state with minimum milk pricing plans, it could avoid both the Federal and state pricing laws. Under the new rules, such a plant would be subject to Federal order pooling and pricing regulations, helping to establish equitable pricing for farmers and handlers alike.

Under a second provision, producer-handlers, that is to say farmers that bottle their own milk, would be regulated by the Arizona-Las Vegas Order if the producer-handler's total milk sales exceeded 3 million pounds per month and if a portion of those sales were distributed in the Arizona-Las Vegas marketing area.

Lastly, the Act exempts the State of Nevada from Federal milk marketing order regulations.

Fluid Milk Board Appointments Made

USDA Secretary of Agriculture Mike Johanns has announced the appointment of four incumbents and five new members to the National Fluid Milk Processor Promotion Board. For additional information on the Fluid Milk Board, visit www.ams.usda.gov/dairy/dairyprp.htm.

March's Blend Price \$0.93 Lower

The uniform blend price in Hillsborough County, FL, was \$15.41 per hundredweight for milk at 3.5 percent butterfat for the month of March. This represents a decrease of \$0.93 from the previous month and is \$2.74 lower when compared with March 2005. Class I utilization was 80.76 percent in March, a decrease of 1.57 percent compared to the previous month, but 3.66 percent higher than March 2005.

National Dairy Situation

USDA estimates that the total U.S. production of milk in February was 14.28 billion pounds, an increase of 5.5 percent from February 2005 and an increase of 2.9 percent when compared with January 2006 on a daily average basis. Total cheese output was 719 million pounds, 1.6 percent above February 2005 but 7.0 percent below January 2006. Butter production was 134 million pounds, 18.1 percent above February 2005 but 9.0 percent below January 2006.

Nonfat dry milk production was 117 million pounds in February, 24.1 percent more than February 2005 and an increase of 14.7 percent when compared with January 2006. Note that when compared on a daily average basis, 27.0 percent more nonfat dry milk was produced in February than in January. The amount of nonfat dry milk produced was so large that approximately 1.3 million pounds was offered to and purchased by the Commodity Credit Corporation in March, the first support price purchases made by the government since November 2004.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.77 in March, down from 3.35 in March 2005 and lower, also, than February 2006's 2.92 feed price ratio. The value of milk used in the ratio, the all-milk price, was down \$0.70 to \$12.80 per hundredweight in March, while feed prices were generally unchanged.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in March 2006 is \$15.41 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.13 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3345 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In March, Class I use accounted for 82.07% of all producer skim milk (priced to handlers at \$7.95 per hundredweight, plus the Class I differential and 46.15% of producer butterfat (priced to handlers at \$1.3768 per pound plus Class I differential). Class II use accounted for 6.45% of all producer skim milk (\$7.52 per hundredweight) and 28.59% of producer butterfat (\$1.2666 per pound). Class III use accounted for 6.68% of all producer skim milk (\$6.94 per hundredweight) and 7.97% of producer butterfat (\$1.2596 per pound). Class IV use accounted for 4.80% of all producer skim milk (\$6.50 per hundredweight) and 17.29% of producer butterfat (\$1.2596 per pound).

Receipts of producer milk during March 2006 totaled 299.5 million pounds, 0.03 million pounds less than was pooled in March of last year. Florida producers supplied 189.5 million pounds of milk in February 2006 to pool plants or 72.35% of the total producer milk pooled in Florida. In February 2005 Florida producers supplied 76.95% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for March 2006. In-area Class I route disposition totaled 236.8 million pounds in February 2006, 3.5 million pounds less than February 2005. This is a decrease of 1.45 percent after making adjustments for calendar composition.

USDA Hurricane Assistance Programs

Department of Agriculture Secretary Mike Johanns has announced that sign-up begins May 17, 2006, for four crop and livestock assistance programs providing aid to producers affected by the destructive 2005 hurricanes. The four programs - Livestock Indemnity Program, Feed Indemnity Program, Hurricane Indemnity Program and Tree Indemnity Program - are funded through the use of \$250 million authorized in October 2005 for crop disaster, livestock, and tree assistance. Additionally, funding is being made available for aquaculture operations.

The Livestock Indemnity Program provides payments to livestock owners or growers for the death of livestock caused by the hurricanes at the rate of 75 percent of fair market value. The Feed Indemnity Program provides payments to livestock owners that incurred increased feed costs or sustained feed losses from the hurricanes. The Hurricane Indemnity Program provides additional payments to those who suffered crop losses, provided they have already received compensation from a Federal crop insurance program. The Tree Indemnity Program will provide payments to owners of commercially grown fruit trees, nut trees, bushes and vines that were lost or damaged due to the hurricanes.

Producers in Alabama, Florida, Louisiana, Mississippi, North Carolina, and Texas counties declared primary presidential or secretarial disaster areas in 2005 because of hurricanes are eligible for the new programs. A complete list of the counties is posted online at www.fsa.usda.gov/PAS/news/releases/. Producers must also meet other eligibility requirements to received assistance.

Additional information about U.S. Department of Agriculture hurricane assistance is available at USDA Service Centers nationwide and online at www.usda.gov/HurricaneInfo.xml.

Blend Price Declines

The uniform blend price in Hillsborough County, FL, was \$14.36 per hundredweight for milk at 3.5 percent butterfat for the month of April. This represents a decrease of \$1.05 from the previous month and is \$2.94 lower when compared with April 2005. Class I utilization was 79.12 percent in April, a decrease of 1.64 percent compared to the previous month, but a fraction of a percent higher than April 2005.

National Dairy Situation

USDA estimates that the total U.S. production of milk in March was 15.95 billion pounds, an increase of 4.9 percent from March 2005 and an increase of 1.1 percent when compared with February 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 810 million pounds, 1.5 percent above March 2005 and 12.3 percent above February 2006. Butter production was 142 million pounds, 16.0 percent above March 2005 and 3.7 percent above February 2006. Nonfat dry milk production was 28 million pounds in March, 17.2 percent more than March 2005 and a decrease of 1.2 percent versus February 2006 on a daily average basis.

National Dairy Situation

The U.S. Department of Agriculture's National Organic Program (NOP) published an Advanced Notice of Proposed Rulemaking (ANPR) in the Federal Register April 13, exploring the role of pasture in organic management of ruminant animals—particularly dairy animals. It gives a history of the pasture issue, the development of the NOP standards and a discussion surrounding the issue since the standards were implemented in October 2002. The ANPR also contains questions that interested parties might consider for making formal comments. The comment period is open for 60 days, ending June 12. Visit the NOP website at www.ams.usda.gov/nop under Today's News for April 10 for more details.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in April 2006 is \$14.36 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.26 per hundredweight plus 3.5 times the uniform butterfat price of \$1.2726 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In April, Class I use accounted for 80.37% of all producer skim milk (priced to handlers at \$7.02 per hundredweight, plus the Class I differential and 46.07% of producer butterfat (priced to handlers at \$1.2715 per pound plus Class I differential). Class II use accounted for 6.27% of all producer skim milk (\$7.28 per hundredweight) and 33.45% of producer butterfat (\$1.2413 per pound). Class III use accounted for 6.46% of all producer skim milk (\$6.85 per hundredweight) and 5.15% of producer butterfat (\$1.2343 per pound). Class IV use accounted for 6.90% of all producer skim milk (\$6.26 per hundredweight) and 15.33% of producer butterfat (\$1.2343 per pound).

Receipts of producer milk during April 2006 totaled 278.9 million pounds, 4.8 million pounds less than was pooled in April of last year. Florida producers supplied 216.7 million pounds of milk in March 2006 to pool plants or 72.34% of the total producer milk pooled in Florida. In March 2005 Florida producers supplied 75.75% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for April 2006. In-area Class I route disposition totaled 262.5 million pounds in March 2006, 2.9 million pounds less than March 2005. This is a decrease of 1.69 percent after making adjustments for calendar composition.

2005 U.S. Production of Dairy Products

Last year, U.S. milk production rose 3.5 percent compared with 2004. The chart above shows how dairy markets allocated milk to the four products used in Federal Order pricing formulas: butter, nonfat dry milk, dry whey and Cheddar cheese. Not shown but included in 'Total Cheese' is the other major style of cheeses in this country, 'Italian-type' cheeses, production of which grew nearly twice as fast (3.9 percent) as 'American-type' cheeses (2.0 percent) in 2005 compared with 2004. June 2006

Volume 7—No. 6

Recommend Decision Issued Regarding Fluid Milk Product Definition

The U. S. Department of Agriculture (USDA) has issued a recommended decision to amend the fluid milk product definition for all Federal milk marketing orders. This recommended decision was based on the record of a public hearing held June 20-23, 2005, in Pittsburgh, Pennsylvania.

Specifically, the decision recommends maintaining the current 6.5 percent nonfat milk solids criteria and incorporating an equivalent 2.25 percent true protein criteria in determining if a product meets the fluid milk product definition. These criteria are not intended to be absolute determinates of whether a product meets the fluid milk product definition. The form and intended use of the product will be the primary criteria used by USDA for determining whether a product meets the fluid milk product definition. The decision also proposes to clarify how milk and milk-derived ingredients should be priced under all orders.

USDA is also proposing that, regardless of packaging, "drinkable" yogurt products containing at least 20 percent yogurt, kefir and products designed to be meal replacements be exempted from the fluid milk product definition.

The recommended decision was published in the May 17 Federal Register and is available on the Agricultural Marketing Service website at www.ams.usda.gov/dairy/class_I_definition.htm.

Public comments are due July 17, 2006 and should be sent to the Hearing Clerk, Stop 9200-Room 1031, U.S. Department of Agriculture, 1400 Independence Ave., S.W., Washington, D.C. 20250-9200. Comments may also be submitted at the Federal E-Rulemaking portal at www.regulations.gov or through e-mail to amsdairycomments@usda.gov.

For a copy of the present Florida Federal Milk Order language, visit www.fmmlanta.com or contact this office at (770)-682-2501.

Blend Price Levels Off

The uniform blend price in Hillsborough County, FL, was \$14.28 per hundredweight for milk at 3.5 percent butterfat for the month of May. This represents a decrease of \$0.08 from the previous month and is \$3.00 lower when compared with May of last year. It is also the smallest month-to-month decrease in the blend price in the past five months, a period over which the blend price fell an average of \$0.67 per hundredweight per month.

Class I utilization was 80.43 percent in May, a decrease of 1.31 percent compared to the previous month and 7.14 percent lower than May of last year.

National Dairy Situation

USDA estimates that the total U.S. production of milk in April was 15.53 billion pounds, an increase of 3.2 percent from April 2005 and a decrease of 2.8 percent when compared with March 2006. But note that on a daily average basis, production in April 2006 was 0.5 percent higher than March 2006. Total cheese output (excluding cottage cheese) was 780 million pounds in April, 3.3 percent above April 2005 but 4.0 percent less than March 2006. Production of butter in the U.S. was 128 million pounds in April, 9.2 percent above April 2005 but 10.0 percent less than March 2006.

Nonfat dry milk production was 129 million pounds in April, 23.0 percent more than April 2005 and an increase of 0.8 percent versus March 2006. However, on a daily average basis, nonfat dry milk production was 4.1 percent higher in April than in March.

The milk-feed price ratio, the number of pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.33 in May. This is the lowest value computed in nearly three years, when in mid-2003 milk prices reached historic, post-Order Reform lows.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in May 2006 is \$14.28 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.20 per hundredweight plus 3.5 times the uniform butterfat price of \$1.2681 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In May, Class I use accounted for 81.63% of all producer skim milk (priced to handlers at \$6.90 per hundredweight, plus the Class I differential and 48.06% of producer butterfat (priced to handlers at \$1.2331 per pound plus Class I differential). Class II use accounted for 7.31% of all producer skim milk (\$6.94 per hundredweight) and 34.22% of producer butterfat (\$1.2652 per pound). Class III use accounted for 8.72% of all producer skim milk (\$6.66 per hundredweight) and 5.34% of producer butterfat (\$1.2582 per pound). Class IV use accounted for 2.34% of all producer skim milk (\$6.14 per hundredweight) and 12.38% of producer butterfat (\$1.2582 per pound).

Receipts of producer milk during May 2006 totaled 271.0 million pounds, 13.2 million pounds less than was pooled in May of last year. Florida producers supplied 203.5 million pounds of milk in April 2006 to pool plants or 72.97% of the total producer milk pooled in Florida. In April 2005 Florida producers supplied 75.92% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for May 2006. In-area Class I route disposition totaled 241.4 million pounds in April 2006, 2.7 million pounds less than April 2005. This is a decrease of 1.11 percent after making adjustments for calendar composition.

Government Purchases of Nonfat Dry Milk

The Milk Price Support Program purchases cheese, butter and nonfat dry milk (NFDM) to ensure the annual average price of milk is at least \$9.90 per hundredweight for milk 3.67 percent butterfat. The program is operated by the Commodity Credit Corporation (CCC), which stands ready to purchase nonfortified NFDM at \$0.80 per pound, fortified NFDM at \$0.81 per pound and instant NFDM at \$0.96 per pound. The chart above shows recent CCC purchases, and the NFDM price as surveyed by the National Agricultural Statistics Service (NASS) for use in Federal Order Class I and Class II skim milk pricing. The last time CCC purchased NFDM was in November 2004.

USDA to Reconvene Hearing on Class III and IV Price Formulas

The U. S. Department of Agriculture has announced its intent to reconvene a national public hearing to amend the Class III and Class IV price formulas. USDA will reconvene the national hearing, originally held January 24 to 27, 2006, in Alexandria, Virginia, to assure that any changes made to manufacturing allowance factors used in Federal Order Class III and Class IV product price formulas are appropriate and reflective of manufacturing costs.

USDA also welcomes additional proposals addressing the Federal Order Class III and Class IV price formulas for further consideration in the reconvened hearing. The additional proposals are due into the Department of Agriculture on or before September 30, 2006.

The notice of intent to reconvene the hearing was published as a proposed rule in the June 28 Federal Register. Copies of the notice may be obtained from the USDA/AMS/Dairy Programs, STOP 0231 - Rm. 2971, 1400 Independence Avenue, SW, Washington, D.C. 20250-0231. The notice for this hearing is also available at www.fmmlatlanta.com under 'What's New'.

Retail Price Survey Summary Available

A summary of retail milk prices has been made available by USDA's Dairy Programs for 2001 through 2005. The survey was performed by Federal Milk Marketing Order staff throughout the nation at specific marketing outlets (such as the largest food store chain and largest convenience store chain) in 32 selected cities for whole milk and reduced fat (2%) milk. While the survey does have certain limitations, it is the only source providing information on national retail milk prices over time. The report may be found by visiting www.ams.usda.gov/dairy and clicking first on 'Milk Marketing Order Statistics' and then on 'Other Related Information'.

Blend Price Declines

The uniform blend price in Hillsborough County, FL, was \$14.14 per hundredweight for milk at 3.5 percent butterfat for the month of June. This represents a decrease of \$0.14 from the previous month and is \$2.66 lower when compared with June of last year. Class I utilization was 80.84 percent in June, a slight increase of 0.41 percent compared to the previous month and 4.09 percent lower than June of last year.

National Dairy Situation

USDA estimates that the total U.S. production of milk in May was 16.07 billion pounds, an increase of 2.4 percent from May 2005 and an increase of 3.5 percent when compared with April 2006. However, on a daily average basis, total production of milk during May 2006 was 0.1 percent higher than during April 2006. Total cheese output (excluding cottage cheese) was 807 million pounds in May, 3.0 percent more than May 2005 and 2.6 percent above April 2006. Butter production during May was 129 million pounds, 7.3 percent higher than May 2005 and 1 percent more than April 2006.

Nonfat dry milk production was 132 million pounds in May, 6.0 percent more than May 2005 and an increase of 2.3 percent compared with April 2006. However, on a daily average basis, production of nonfat dry milk was actually 1.0 percent lower in May than in April.

The milk-feed price ratio, the number of pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 2.44 in June. This is a slight improvement over the previous month based on an all-milk price that inched higher (\$12.10 per hundredweight in June, up \$0.10 from May) and lower feed prices across the board. Even with the improvement in the ratio, it remains at a low level historically speaking and would tend to discourage increases in milk output.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in June 2006 is \$14.14 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.03 per hundredweight plus 3.5 times the uniform butterfat price of \$1.2757 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In June, Class I use accounted for 84.03% of all producer skim milk (priced to handlers at \$6.57 per hundredweight, plus the Class I differential and 50.79% of producer butterfat (priced to handlers at \$1.2610 per pound plus Class I differential). Class II use accounted for 7.34% of all producer skim milk (\$6.86 per hundredweight) and 37.20% of producer butterfat (\$1.2506 per pound). Class III use accounted for 5.04% of all producer skim milk (\$7.19 per hundredweight) and 2.81% of producer butterfat (\$1.2436 per pound). Class IV use accounted for 3.59% of all producer skim milk (\$6.08 per hundredweight) and 9.20% of producer butterfat (\$1.2436 per pound).

Receipts of producer milk during June 2006 totaled 251.1 million pounds, 8.2 million pounds less than was pooled in June of last year. Florida producers supplied 200.4 million pounds of milk in May 2006 to pool plants or 73.95% of the total producer milk pooled in Florida. In May 2005 Florida producers supplied 76.47% of the total producer milk pooled on the Florida market.

There were 11 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for June 2006. In-area Class I route disposition totaled 240.6 million pounds in May 2006, 2.6 million pounds less than May 2005. This is a decrease of 3.14 percent after making adjustments for calendar composition.

August 2006

Volume 7—No. 8

Through June, FL Production Down 5.7%

The National Agricultural Statistics Service (NASS) has recently released estimates for June milk production, allowing a comparison of cumulative production through the mid-point of the year. The State of Florida is estimated to have produced 1.202 billion pounds of milk from January to June of this year, down 5.7 percent from the same period last year. If the remainder of the year continues at this pace, 2006 total milk production could be as low as that of the early to mid-1980's.

Taken as a whole, states that are either in part or in total located inside the Southeast Marketing Area (see "SE States" in the chart below) produced 3.6 percent less milk in the first half of 2006 compared with the first half of 2005. While some southeast states have managed to maintain production levels of late (Georgia and Missouri in particular), none have thus far kept pace with national production growth of 3.7 percent. See the chart on page four of this publication for a longer view of milk production trends within Florida and the states of the Southeast Marketing Area.

Milk Produced By State

(in millions of pounds)

	1st Half 2005	2nd Half 2005	1st Half 2006	1st Half '06 v. '05

US Total	89,181	87,589	92,449	3.7%

Blend Price Declines

The uniform blend price in Hillsborough County, FL, was \$14.65 per hundredweight for milk at 3.5 percent butterfat for the month of July. This represents an increase of \$0.51 from the previous month but is \$2.82 lower when compared with July of last year.

Class I utilization was 84.86 percent in July, a 4.02 percent increase compared with the previous month and a 3.27 percent increase versus July of last year.

National Dairy Situation

USDA estimates that the total U.S. production of milk in June was 15.30 billion pounds, an increase of 1.4 percent from June 2005 and a decrease of 4.7 percent when compared with May 2006. On a daily average basis, total production of milk during June 2006 was only 1.5 percent lower than during May 2006, however this is still an encouraging sign for those who would like milk price levels to rise. Total cheese output (excluding cottage cheese) was 793 million pounds, 3.8 percent above June 2005 but 2.3 percent below May 2006. Butter production was 101 million pounds, 5.3 percent below June 2005 and 21.2 percent below May 2006.

Nonfat dry milk production was 116 million pounds in June, 6.2 percent less than June 2005 and a decrease of 12.1 percent compared with May 2006. Though the government has made no purchases of nonfat dry milk under the Price Support Program in four weeks, the cumulative pounds of milk powder purchased thus far in fiscal year 2006 already doubles what was purchased during the entire fiscal year 2005.

The milk-feed price ratio was 2.35 in July 2006 compared with June 2006, which was recently revised downward to 2.35.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in July 2006 is \$14.65 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.62 per hundredweight plus 3.5 times the uniform butterfat price of \$1.2571 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In July, Class I use accounted for 86.07% of all producer skim milk (priced to handlers at \$7.24 per hundredweight, plus the Class I differential and 52.04% of producer butterfat (priced to handlers at \$1.2430 per pound plus Class I differential). Class II use accounted for 7.44% of all producer skim milk (\$6.76 per hundredweight) and 37.38% of producer butterfat (\$1.2298 per pound). Class III use accounted for 1.81% of all producer skim milk (\$6.88 per hundredweight) and 2.46% of producer butterfat (\$1.2228 per pound). Class IV use accounted for 4.68% of all producer skim milk (\$6.15 per hundredweight) and 8.12% of producer butterfat (\$1.2228 per pound).

Receipts of producer milk during July 2006 totaled 244.3 million pounds, 4.8 million pounds less than was pooled in July of last year. Florida producers supplied 186.0 million pounds of milk in June 2006 to pool plants or 74.07% of the total producer milk pooled in Florida. In June 2005 Florida producers supplied 75.37% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for July 2006. In-area Class I route disposition totaled 229.4 million pounds in June 2006, 0.4 million pounds less than June 2005. This is a decrease of 1.60 percent after making adjustments for calendar composition.

Packaged Class I Route Sales in Marketing Area

Volume 7—No. 9

Appalachian and Southeast Order Transportation Credit Decision Issued

The USDA has announced a tentative partial decision that recommends amendments to the transportation credit provisions of the Appalachian and Southeast Federal milk marketing orders. This decision is based on testimony and evidence given at a public hearing held in Louisville, Kentucky, on January 10 – 12, 2006.

This decision adopts, on an interim final and emergency basis, proposals to amend certain features of the transportation credit provisions of the Appalachian and Southeast Federal milk marketing orders. Specifically, the decision will:

1. Establish a variable mileage rate factor using a diesel fuel cost adjustor to determine transportation credit payments;
2. Increase the maximum transportation credit assessment rate on Class I milk from 9.5 cents to 15 cents per hundredweight in the Appalachian Order and from 10 cents to 20 cents per hundredweight in the Southeast Order; and
3. Establish a zero diversion limit standard on all milk for which transportation credits are requested.

Interested persons have until November 13, 2006 to file comments in response to the tentative partial decision. The USDA will determine if producers in the Appalachian and Southeast marketing areas approve the amended order, a copy of which may be found at www.fmmatlanta.com under the link 'What's New'.

A separate decision will be issued addressing other proposals heard at the public hearing in January concerning producer milk provisions and transportation credits on intra-market movement of milk within the Appalachian and Southeast marketing areas. Questions concerning this decision may be directed to this office at 770-682-2501.

No Change in Blend Price

The uniform blend price in Hillsborough County, FL, was \$14.65 per hundredweight for milk at 3.5 percent butterfat for the month of August. This is the same price as the previous month but is \$3.22 lower when compared with August of last year.

Class I utilization was 88.32 percent in August, a 3.46 percent increase compared with the previous month and a 0.69 percent increase versus August of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in July was 15.20 billion pounds, an increase of 1.5 percent from July 2005 and a decrease of 0.7 percent when compared with June 2006. However, when examined on a daily average basis, total production of milk during July 2006 was 3.9 percent lower than during June 2006. The nearly four percent decline is more in-line with expectations than the calendar based 0.7 percent decline given the hot weather conditions that afflicted much of country during July. Total cheese output (excluding cottage cheese) was 768 million pounds, 3.9 percent above July 2005 but 3.3 percent below June 2006. Butter production was 92.7 million pounds, 3.3 percent below July 2005 and 8.0 percent below June 2006.

Nonfat dry milk production was 88.2 million pounds in July, 24.0 percent lower than July 2005 and a decrease of 18.9 percent compared with the previous month. The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.48 in August, a decline of 0.50 from August 2005 but up 0.13 compared with July 2006's 2.35 feed price ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in August 2006 is \$14.65 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.54 per hundredweight plus 3.5 times the uniform butterfat price of \$1.2806 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In August, Class I use accounted for 89.73% of all producer skim milk (priced to handlers at \$6.96 per hundredweight, plus the Class I differential and 51.31% of producer butterfat (priced to handlers at \$1.2154 per pound plus Class I differential). Class II use accounted for 7.03% of all producer skim milk (\$6.82 per hundredweight) and 38.15% of producer butterfat (\$1.3078 per pound). Class III use accounted for 0.18% of all producer skim milk (\$6.74 per hundredweight) and 3.35% of producer butterfat (\$1.3008 per pound). Class IV use accounted for 3.06% of all producer skim milk (\$6.31 per hundredweight) and 7.19% of producer butterfat (\$1.3008 per pound).

Receipts of producer milk during August 2006 totaled 243.5 million pounds, 5.7 million pounds less than was pooled in August of last year. Florida producers supplied 175.4 million pounds of milk in July 2006 to pool plants or 71.80% of the total producer milk pooled in Florida. In July 2005 Florida producers supplied 71.12% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for August 2006. In-area Class I route disposition totaled 229.3 million pounds in July 2006, 6.9 million pounds less than July 2005. This is a decrease of 2.90 percent after making adjustments for calendar composition.

Summary of Recent USDA Actions

The USDA has issued several decisions, in addition to the tentative partial decision discussed on the front page of this publication, and has announced and held a reconvened public hearing in the past few weeks. All hearing activity can be tracked in detail at www.ams.usda.gov/dairy/hearings.htm, but here is a quick summary of recent departmental actions:

- Announced the reconvening of the Class III and Class IV manufacturing make allowance hearing for September 14 in Strongsville, OH. The hearing was set to take into evidence only data on plant manufacturing costs compiled by Cornell University and any other pertinent data or information specifically addressing plant manufacturing costs that are publicly available.
- Issued a final decision on pooling provisions in the Mideast Order. The decision establishes limits on the volume of milk handlers may pool to a percentage (either 115 percent or 120 percent depending on the month) of their previous month's volume.
- Issued a final decision on pooling provisions in the Upper Midwest Order. The decision establishes limits on the volume of milk handlers may pool to a percentage (either 125 percent or 135 percent depending on the month) of their previous month's volume.
- Issued a final decision on pooling provisions in the Central Order. The decision establishes limits on the volume of milk handlers may pool to a 125 percent of their previous month's volume. The decision also adopted amendments to increase supply plant performance standards, amend features of the "touch-base" provision, amend certain features of the "split plant" provision and decrease the diversion limit standards of the order.

October 2006

Volume 7—No. 10

'07 Outlook Forecasts Modest Producer Gains

As the final quarter of 2006 arrives, forecasts about 2007 become more abundant and, hopefully, more accurate. The latest estimates from the World Agricultural Outlook Board, the USDA's main economic forecasting unit, project average annual producer milk prices in 2007 between \$13.00 and \$13.90 per hundredweight, approximately \$0.70 higher than 2006. The producer price improvements should range from \$0.25 to \$1.15 higher. The 2007 Class III price should range between \$12.10 and \$13.00 per hundredweight while the Class IV price is projected to range from \$10.45 to \$11.45 per hundredweight.

Milk Promotion Programs Announcements

The USDA has made recent announcements regarding both the producer and processor milk promotion programs. The National Dairy Promotion and Research Board, composed of 36 dairy farmers representing 13 regions of the country, administers a coordinated program of promotion, research and nutrition education. Seven new members and five incumbent members were reappointed to serve three-year terms through 2009. Region 8 (the states of FL, GA, NC, SC and VA) remain represented by John M. Larson of Okeechobee, FL.

The USDA is asking fluid milk processors and other interested parties to nominate candidates for the National Fluid Milk Processor Promotion Board, the program of advertising and education designed to promote fluid milk products. Five of the positions on the Board represent geographic regions, and two are at-large processor positions. All nominees must be active owners or employees of a fluid milk processor for all regional positions and both at-large positions. Visit www.ams.usda.gov/dairy/dairyprp.htm for more details on the nomination process.

Blend Price Rises

The uniform blend price in Hillsborough County, FL, was \$14.70 per hundredweight for milk at 3.5 percent butterfat for the month of September. This represents a \$0.05 increase compared with the previous month but is \$2.77 per hundredweight lower when compared with September of last year.

Class I utilization was 88.52 percent in September, a 0.20 percent increase compared with the previous month and a 0.15 percent decrease versus September of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in August was 15.13 billion pounds, an increase of 1.5 percent from August 2005 and a decrease of 0.52 percent when compared with July 2006. Estimated total cheese output (excluding cottage cheese) in August was 787 million pounds, 3.9 percent above August 2005 and 2.5 percent above July 2006. Butter production was 89.2 million pounds, 4.3 percent below August 2005 and 5.7 percent below July 2006. Nonfat dry milk production was estimated at 74.4 million pounds in August, 14.2 percent lower than August 2005 and a decrease of 18.6 percent compared with the previous month.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.57 in September, a decline of 0.70 from September 2005 but an increase of 0.10 compared to a revised August 2006 feed price ratio of 2.47.

Through August, cumulative sales of packaged fluid milk products into Florida were 1.950 billion pounds. Compared with last year (1.988 billion pounds), total packaged sales were lower by 1.9 percent. Pool plant sales have actually increased by 0.9 percent, but, in the aggregate, were offset by nonpool plant sales that were down 19.0 percent.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in September 2006 is \$14.70 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$10.28 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3670 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In September, Class I use accounted for 89.99% of all producer skim milk (priced to handlers at \$6.64 per hundredweight, plus the Class I differential and 50.56% of producer butterfat (priced to handlers at \$1.2703 per pound plus Class I differential). Class II use accounted for 6.67% of all producer skim milk (\$6.99 per hundredweight) and 36.02% of producer butterfat (\$1.4261 per pound). Class III use accounted for 0.23% of all producer skim milk (\$7.59 per hundredweight) and 6.17% of producer butterfat (\$1.4191 per pound). Class IV use accounted for 3.11% of all producer skim milk (\$6.36 per hundredweight) and 7.25% of producer butterfat (\$1.4191 per pound).

Receipts of producer milk during September 2006 totaled 231.8 million pounds, 4.6 million pounds more than was pooled in September of last year. Florida producers supplied 151.6 million pounds of milk in August 2006 to pool plants or 62.27% of the total producer milk pooled in Florida. In August 2005 Florida producers supplied 66.33% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for September 2006. In-area Class I route disposition totaled 251.1 million pounds in August 2006, 5.4 million pounds less than August 2005. This is a decrease of 1.4 percent after making adjustments for calendar composition.

Dairy Disaster Payment Program

Sign-up began November 1, 2006, for the 2005 Dairy Disaster Assistance Payment Program (DDAP-II), which will provide \$17 million to help dairy producers recover from 2005 hurricane losses. To be eligible for participation, a dairy producer must have suffered dairy production and spoilage losses from August through December 2005 due to the 2005 hurricanes Katrina, Ophelia, Wilma or Rita (or related conditions), and suffered the losses in an eligible DDAP-II county. A fact sheet on the payment program is available at www.fsa.usda.gov/Internet/FSA_File/ddap06.pdf.

DDAP-II participants will receive immediate payments to help pay operating expenses and meet other financial obligations. An eligible dairy operation's payment is calculated by multiplying the payment rate, which varies by state, by the operation's total eligible milk production losses.

Dairy producers can apply for the program at local Farm Service Agency (FSA) offices. Applications are available at FSA offices and online at www.sc.egov.usda.gov (Form number CCC-743). In addition, FSA provides two online worksheets to assist producers with calculating eligible losses, available at www.fsa.usda.gov (click on 'Price Support').

Interim Final Rule Issued

Having received the approval of Appalachian and Southeast Order dairy farmers, the USDA has issued an interim final rule amending current provisions of both marketing orders. Effective December 1, 2006, these two Federal orders will be amended to:

- 1) Establish a variable mileage rate factor using a diesel fuel cost adjustor to determine transportation credit payments;
- 2) Increase the maximum transportation credit assessment rate on Class I milk from 9.5 cents to 15 cents per hundredweight in the Appalachian Order and from 10 cents to 20 cents per hundredweight in the Southeast Order; and
- 3) Establish a zero diversion limit standard on all milk for which transportation credits are requested.

»»»»» Special Announcement «««««

The USDA is holding a public information session in Washington, DC on December 5, 2006 to address proposals it has received that seek to amend the Federal order Class III and Class IV product price formulas. See page four of this publication for more details.

Blend Price Up \$1.03

The uniform blend price in Hillsborough County, FL, was \$15.73 per hundredweight for milk at 3.5 percent butterfat for the month of October. This represents a \$1.03 increase compared with the previous month but is \$1.96 per hundredweight lower compared with October of last year.

Class I utilization was 84.60 percent in October, a 3.92 percent decrease compared with the previous month and a 2.57 percent decrease compared to October of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in September was 15.49 billion pounds, an increase of 1.6 percent from September 2005 and a decrease of 0.72 percent when compared with August 2006 on a daily average basis. Estimated total cheese output (excluding cottage cheese) was 785 million pounds, 5.3 percent above September 2005 but 0.5 percent below August 2006. Butter production was 103 million pounds, 2.0 percent above September 2005 and 16.3 percent above August 2006. Nonfat dry milk production was estimated at 64.9 million pounds in September, 8.5 percent lower than September 2005 and a decrease of 12.8 percent compared with the previous month.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.42 in October, a decline of 0.16 from last month.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in October 2006 is \$15.73 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.08 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4396 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In October, Class I use accounted for 86.02% of all producer skim milk (priced to handlers at \$7.72 per hundredweight, plus the Class I differential and 47.74% of producer butterfat (priced to handlers at \$1.4207 per pound plus Class I differential). Class II use accounted for 7.56% of all producer skim milk (\$7.06 per hundredweight) and 35.71% of producer butterfat (\$1.4219 per pound). Class III use accounted for 0.19% of all producer skim milk (\$7.64 per hundredweight) and 2.45% of producer butterfat (\$1.4149 per pound). Class IV use accounted for 6.23% of all producer skim milk (\$6.80 per hundredweight) and 14.10% of producer butterfat (\$1.4149 per pound).

Receipts of producer milk during October 2006 totaled 249.9 million pounds, 20.7 million pounds more than was pooled in October of last year. Florida producers supplied 141.3 million pounds of milk in September 2006 to pool plants or 60.97% of the total producer milk pooled in Florida. In September 2005 Florida producers supplied 64.35% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for October 2006. In-area Class I route disposition totaled 236.7 million pounds in September 2006, 10.5 million pounds less than September 2005. This is a decrease of 6.7 percent after making adjustments for calendar composition.

Pre-Hearing Public Information Session Regarding Class III and Class IV Price Formulas

The USDA has announced a public information session will be held to address proposals it has received that seek to amend the Federal order Class III and Class IV product price formulas. The purpose of the pre-hearing information session is for interested parties to learn about the intent of proposals that have been submitted to amend Class III and Class IV product price formulas and how the proposals would accomplish that intent. The session is intended to clarify the intent and effect of proposed amendments. The session will enable proponents to better prepare testimony and evidence in support of, or in opposition to, proposals that may be included in the Hearing Notice announcing the Class III and Class IV product price formulas hearing.

The Department recognizes the importance of Class III and IV product pricing formulas and is hosting this pre-hearing public information session to ensure that all proposals received are fully understood. The information session will not become part of an official hearing record and will be conducted outside of ex-parte rules thus allowing government officials to freely discuss proposed amendments. Participation in the information session is strongly encouraged by all parties who have submitted proposals.

The session will begin at 8:30 a.m. on December 5, 2006 and will be held in the USDA Whitten Building, 1400 Independence Avenue, SW., Room 107-A, Washington, DC 20250.

Submitted proposals and information regarding the purpose and procedure of the information session are available through the Dairy Programs web site at www.ams.usda.gov/dairy.

Volume 7—No. 12

Class III and Class IV Product Price Formulas Tentative Final Decision Issued

The U.S. Department of Agriculture (USDA) has announced a tentative final decision to amend the manufacturing (make) allowances contained in the Class III and Class IV product price formulas in all Federal milk marketing orders. The decision was based on the record of the first session of an emergency public hearing held in Alexandria, VA, on January 24-27, 2006, and a second session held in Strongsville, OH, on September 14-15, 2006.

The decision amends the manufacturing (make) allowances for cheese, butter, nonfat dry milk (NFD) and dry whey. Specifically, this decision adopts the following increased manufacturing allowances: cheese -- \$0.1682 per pound; butter -- \$0.1202 per pound; NFD -- \$.1570 per pound; and dry whey -- \$0.1956 per pound. These amendments are subject to producer approval before they can be implemented. A vote is currently underway to determine if producers approve of the decision.

The tentative final decision was published in the November 22 Federal Register. A link to the decision text at the AMS Dairy Programs website has been provided under "What's New" at www.fmmatlanta.com. Public comments are due 60 days after publication in the Federal Register, on January 22, 2007.

Hearing Held On Class I and II Price Formulas

The USDA recently held a hearing on proposed amendments to the Class I and Class II milk price formulas applicable to all Federal milk marketing orders. The hearing, held on December 11 in Pittsburgh, Pennsylvania, was requested by the National Milk Producers Federation (NMPF). The proposed changes would effectively increase the Class I and Class II price movers to account for increases in marketing costs associated with serving these markets, according to the NMPF. A link to more information on the hearing is available at www.fmmatlanta.com under "What's New".

Blend Price Increases

The uniform blend price in Hillsborough County, FL, was \$15.88 per hundredweight for milk at 3.5 percent butterfat for the month of November. This represents a \$0.15 increase compared with the previous month but is \$1.83 per hundredweight lower compared with November of last year. The blend price has risen a total of \$1.74 since June, when it had reach a low of \$14.14 per hundredweight.

Class I utilization was 87.86 percent in November, a 3.26 percent increase compared with the previous month and a 0.37 percent decrease compared to November of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in October was 14.86 billion pounds, an increase of 1.7 percent from October 2005 and a decrease of 0.76 percent when compared with September 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 800 million pounds, 5.2 percent above October 2005 and 2.0 percent above September 2006. Butter production in October was 118 million pounds, 8.5 percent above October 2005 and 13.9 percent above September 2006. Nonfat dry milk production was estimated at 72.7 million pounds in October, 1.2 percent lower than October 2005 and a decrease of 8.4 percent compared with the previous month on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.34 in November, a decline of 0.19 from the revised October milk-feed ratio of 2.53.

Total U.S. sales of fluid milk products were estimated at 4.8 billion pounds in October, up 0.1 percent from the previous month after adjusting for calendar composition.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in November 2006 is \$15.88 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.32 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4162 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In November, Class I use accounted for 89.28% of all producer skim milk (priced to handlers at \$7.77 per hundredweight, plus the Class I differential and 51.01% of producer butterfat (priced to handlers at \$1.4004 per pound plus Class I differential). Class II use accounted for 8.12% of all producer skim milk (\$7.37 per hundredweight) and 35.59% of producer butterfat (\$1.3922 per pound). Class III use accounted for 0.09% of all producer skim milk (\$8.28 per hundredweight) and 3.01% of producer butterfat (\$1.3852 per pound). Class IV use accounted for 2.51% of all producer skim milk (\$7.52 per hundredweight) and 10.39% of producer butterfat (\$1.3852 per pound).

Receipts of producer milk during November 2006 totaled 251.2 million pounds, 3.9 million pounds more than was pooled in November of last year. Florida producers supplied 151.9 million pounds of milk in October 2006 to pool plants or 60.78% of the total producer milk pooled in Florida. In October 2005 Florida producers supplied 66.18% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for November 2006. In-area Class I route disposition totaled 244.9 million pounds in October 2006, 2.2 million pounds more than October 2005. This is a increase of 0.78 percent after making adjustments for calendar composition.

Packaged Class I Route Sales in Marketing Area

Product Description	Pounds	Percent
October 2006		
Whole Milk	91,717,852	37.44%
Fat Free Milk	34,317,396	14.01%

Total Disposition by Nonpool Plants	26,999,268	11.02%
Total Disposition in Marketing Area	244,948,613	100.0%

New Market Information Available

Recently, the U. S. Department of Agriculture made available two new sources of market information. The first of these is an updated survey of milk handlers in Federal milk marketing orders who package Class I products. Handlers were asked to submit information on the containers in which fluid milk products are sold, and the methods of distribution used to market such products. "*Packaged Fluid Milk Sales in Federal Milk Order Markets: By Size and Type of Container and Distribution Method during November 2005*" is available at the AMS Dairy Programs website (www.ams.usda.gov/dairy) under 'Milk Marketing Order Statistics' and the 'Special Reports' link.

The second new source of dairy market information is the Over-Order Price Report. Federal milk marketing orders set minimum prices for regulated handlers that purchase milk. These prices are not necessarily what sellers of milk receive, as cooperatives and independent dairy producers can negotiate prices higher than Federal order minimums. Any higher than minimum price is known as an over-order price, which is the effective price processors pay for milk. This information, collected in the Over-Order Price Report, is obtained from the price lists issued by cooperatives or pricing agencies (including all the credits that milk processors can earn), billing statements of the cooperatives or pricing agencies, and producer payrolls for cooperatives and independent producers alike. All milk pooled and priced by an order is included in the report.

The Over-Order Price Report contains information for all Federal milk marketing orders, except for the Northeast Order. The reports list over-order charges for each class of milk and for all classes combined by Federal milk order marketing area on a monthly basis. For example, the report shows that in July the over-order charge in the Florida Order for Class I milk was \$3.32, Class II was \$1.19, Class III was \$0.62 and Class IV was \$0.02 for an average on all classes of \$2.93 per hundredweight.

This report is available at the AMS Dairy Programs website (www.ams.usda.gov/dairy) under 'Milk Marketing Order Statistics' and the 'Class and Producer Prices and Component Prices' link.

"The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer."
