January 2007

Volume 8—No. 1

New Class III and IV Product Price Formulas

The U.S. Department of Agriculture has issued an interim order amending the manufacturing (make) allowances contained in the Class III and Class IV product price formulas affecting all Federal milk marketing orders. The interim order was approved by dairy farmers in all 10 Federal milk marketing orders.

The interim order implements new make allowances for cheese, butter, nonfat dry milk (NFD) and dry whey. Specifically, the interim order adopts the following increased manufacturing allowances: cheese -- \$0.1682 per pound; butter -- \$0.1202 per pound; NFD -- \$0.1570 per pound; and dry whey -- \$0.1956 per pound. A copy of the interim order is available at www.fmmlatlanta.com under 'What's New'.

The interim order will become effective on February 1, 2007. As announced on November 20, 2006, public comments and exceptions to the tentative final decision are due on or before January 22, 2007. Comments may be submitted via e-mail to amsdairycomments@usda.gov, making reference to the title of action (Milk in the Northeast and Other Marketing Areas; Tentative Final Decision') and the docket number (AO-14-A74, et al.; DA-06-01).

USDA will consider the comments and exceptions and issue a final decision.

Request Seeks Changes in Pooling Provisions in Southeast Marketing Area

The Market Administrator has received a request to change producer delivery day requirements and diversion limits for the Southeast Marketing Area, making them equivalent to provisions of the Florida Order. The Market Administrator invites written comments regarding this request, submitted by February 16, 2007. Visit www.fmmlatlanta.com and click on 'What's New' for details on this request.

No Change in Blend Price

The uniform blend price in Hillsborough County, FL, was \$15.88 per hundredweight for milk at 3.5 percent butterfat for the month of December. Last month's blend price was also \$15.88, but December's blend price is \$1.01 per hundredweight lower compared with December of last year.

Class I utilization was 85.10 percent in December, a 2.76 percent decrease compared with the previous month and a 3.22 percent fall compared with December of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in November was 14.50 billion pounds, an increase of 2.0 percent from November 2005 and an increase of 0.86 percent when compared with October 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 790 million pounds, 3.1 percent above November 2005 but 1.3 percent below October 2006. Butter production was 116 million pounds, 4.3 percent above November 2005 but 2.5 percent below October 2006. Nonfat dry milk production was estimated at 79.3 million pounds in November, 11.0 percent lower than November 2005 and a decrease of 5.3 percent compared with the previous month on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.42 in December, a decline of 0.04 from the previous month.

The USDA estimates total U.S. sales of fluid milk products were 4.69 billion pounds in November, up 1.8 percent from November of last year after adjusting for calendar composition. Year-to-date packaged milk sales through November are estimated to be 1.1 percent higher than the same period of last year.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in December 2006 is \$15.88 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$11.43 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3857 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In December, Class I use accounted for 86.40% of all producer skim milk (priced to handlers at \$7.89 per hundredweight, plus the Class I differential and 51.21% of producer butterfat (priced to handlers at \$1.3770 per pound plus Class I differential). Class II use accounted for 5.82% of all producer skim milk (\$8.09 per hundredweight) and 28.26% of producer butterfat (\$1.3551 per pound). Class III use accounted for 2.19% of all producer skim milk (\$9.07 per hundredweight) and 2.42% of producer butterfat (\$1.3481 per pound). Class IV use accounted for 5.59% of all producer skim milk (\$7.86 per hundredweight) and 18.11% of producer butterfat (\$1.3481 per pound).

Receipts of producer milk during December 2006 totaled 264.7 million pounds, 2.7 million pounds more than was pooled in December of last year. Florida producers supplied 160.7 million pounds of milk in November 2006 to pool plants or 63.99% of the total producer milk pooled in Florida. In November 2005 Florida producers supplied 66.56% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for December 2006. In-area Class I route disposition totaled 242.3 million pounds in November 2006, 4.3 million pounds less than November 2005. This is a decrease of 1.73 percent after adjusting for calendar composition.

February 2007

Volume 8—No. 2

New Class III and IV Product Price Formulas Hearing Announced

The U. S. Department of Agriculture has announced that it will hold a national public hearing to consider proposals seeking to amend the Class III and Class IV product price formulas applicable to all Federal milk marketing orders. The hearing will begin at 9:00 a.m. on February 26, 2007, at the Holiday Inn Select - Strongsville, 15471 Royalton Road, Strongsville, Ohio 44136.

USDA requested proposals from the industry that would examine all features of the Class III and Class IV product price formulas. Both producer cooperatives and milk product manufacturers submitted proposals.

The hearing notice was published in the February 9 Federal Register. Copies of the hearing notice may be obtained from the USDA/AMS/Dairy Programs, STOP 0231 - Rm. 2971, 1400 Independence Avenue, SW, Washington, D.C. 20250-0231. The hearing notice is available on the AMS web site at www.ams.usda.gov/dairy. In addition, USDA has made available a preliminary economic analysis of the proposals which will be heard in the upcoming hearing.

Anyone interested in participating in the hearing should notify a USDA official upon arrival. The hearing notice and additional information is available at www.fmmlanta.com under 'What's New'. If you have any questions concerning this announcement, please contact this office.

Implementing New Make Allowances Delayed

The USDA has temporarily withheld the implementation of a decision altering Class III and IV manufacturing make allowances due to pending litigation. USDA stated "As long as the Interim Final Rule is not enjoined as a result of the litigation, Federal order minimum prices...will be computed using the revised manufacturing allowances" for February's Class III and IV prices.

Blend Price Increases

The uniform blend price in Hillsborough County, FL, was \$16.77 per hundredweight for milk at 3.5 percent butterfat for the month of January. The represents an increase of \$0.89 compared with the previous month and is \$0.06 higher than January 2006.

Class I utilization was 82.92 percent in January, a 2.18 percent decrease compared with the previous month and a 2.50 percent fall compared with January of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in December was 15.22 billion pounds, an increase of 2.4 percent from December 2005 and an increase of 1.27 percent when compared with November 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 829 million pounds, 3.8 percent above December 2005 and 4.8 percent above November 2006. Butter production was 138 million pounds, 9.5 percent above December 2005 and 17.3 percent above November 2006.

Nonfat dry milk production was estimated at 115.0 million pounds in December, 10.6 percent higher than December 2005 and an increase of 40.3 percent compared with the previous month on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.34 in January, a decrease of 0.07 from the previous month.

New Fluid Milk Board Appointments

The National Fluid Milk Processor Promotion Board has receive several new appointments, including Randy Dean Mooney, Rogersville, Missouri and Charles L. Gaither, Jr., Asheville, North Carolina. Terms for these appointees are will begin July 1, 2007, and expire June 30, 2010.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in January 2007 is \$16.77 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$12.49 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3471 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In January, Class I use accounted for 84.29% of all producer skim milk (priced to handlers at \$9.17 per hundredweight, plus the Class I differential and 46.78% of producer butterfat (priced to handlers at \$1.3547 per pound plus Class I differential). Class II use accounted for 6.44% of all producer skim milk (\$8.57 per hundredweight) and 28.04% of producer butterfat (\$1.3079 per pound). Class III use accounted for 3.09% of all producer skim milk (\$9.33 per hundredweight) and 1.57% of producer butterfat (\$1.3009 per pound). Class IV use accounted for 6.18% of all producer skim milk (\$8.27 per hundredweight) and 23.61% of producer butterfat (\$1.3009 per pound).

Receipts of producer milk during January 2007 totaled 288.3 million pounds, 9.7 million pounds more than was pooled in January of last year. Florida producers supplied 180.1 million pounds of milk in December 2006 to pool plants or 68.04% of the total producer milk pooled in Florida. In December 2005 Florida producers supplied 69.76% of the total producer milk pooled on the Florida market.

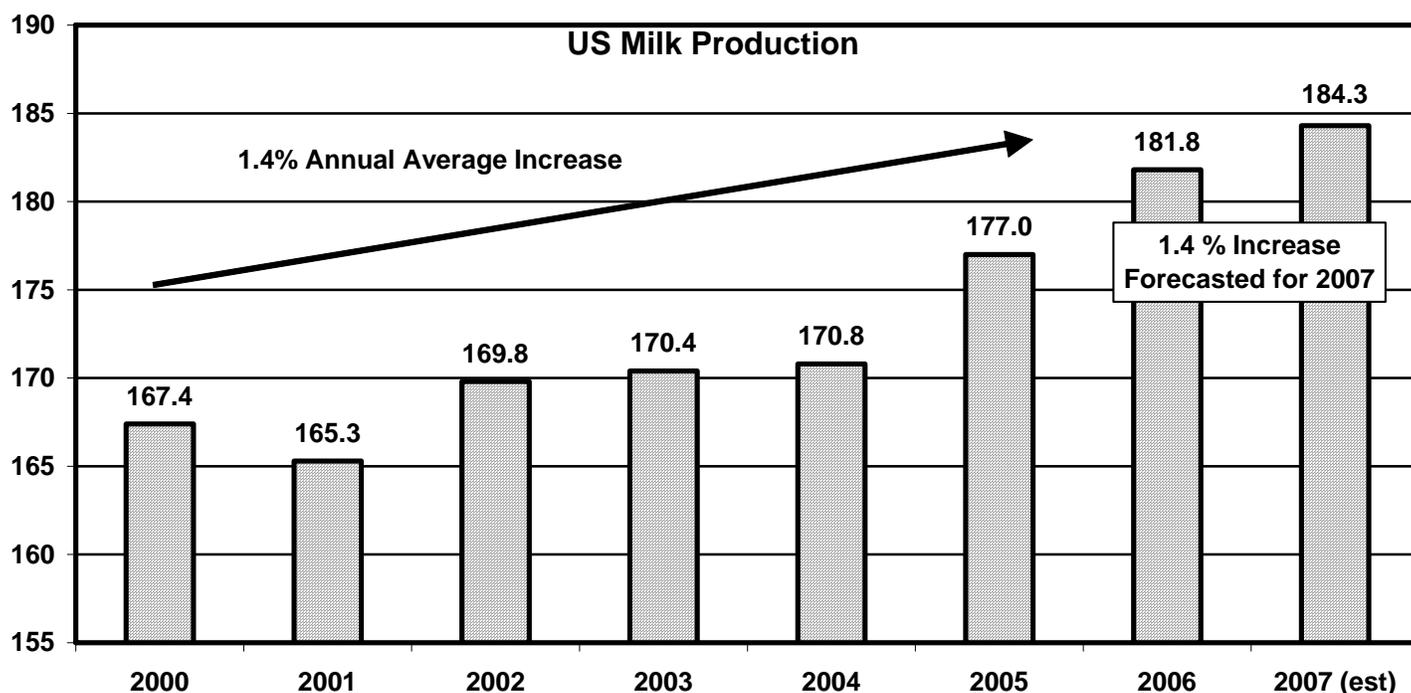

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for January 2007. In-area Class I route disposition totaled 249.0 million pounds in December 2006, 6.2 million pounds less than December 2005. This is a increase of 0.08 percent after adjusting for calendar composition.

US Milk Production: 2000 to 2007

The latest USDA estimate of milk production in the US for last year is 181.8 billion pounds, an increase of 2.7 percent compared to 2005. This level of growth in the milk supply, which almost doubles the 1.4 percent annual average increase in milk production since 2000, greatly contributed to low producer prices last year. USDA projects that in 2007, dairy farmers will produce 184.3 billion pounds of milk, 1.4 percent more milk than 2006.

WASDE Dairy Report 1/

The milk production forecasts for 2006 and 2007 are raised from last month. The recent Milk Production and Cattle reports indicated that the dairy herd remains above last year and producers reported a slightly larger number of replacement dairy heifers. Thus, forecast cow numbers are increased from last month, but the increase will likely be tempered by the recently announced herd buyout by Cooperatives Working Together and higher feed costs. The 2007 forecast continues to assume a declining cow herd from the previous year, albeit at a slower pace than forecast last month. With a slight increase in milk per cow growth and higher overall cow numbers, the milk production forecast is increased 1.3 billion pounds from last month. Despite higher production, milk prices are forecast higher. Demand for dairy products remains firm, although the butter price is reduced slightly on expectations of ample supplies. Cheese price forecasts are slightly higher compared with last month as demand remains strong. However, nonfat dry milk (NDM) and whey price forecasts are raised sharply. Demand for NDM and whey for both domestic ingredient use and international sales support strong prices. Supplies of these products in international markets are expected to remain tight until at least the second half of the year when the next production season in Oceania begins. The all milk price forecast for 2007 is raised to \$14.35 to \$15.05.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

New Make Allowances Implemented After Judge Denies Injunction

A U. S. District Court Judge in Ohio ruled against Bridgewater Dairy, LLC, et. al., and in favor of the Department of Agriculture in a case that sought to prevent new manufacturing make allowances from being used in Federal order pricing formulas. Accordingly, as of February 22, 2007 the manufacturing allowances used to compute the Federal order minimum advance Class I and Class II prices and Federal order minimum prices for Class III and Class IV milk prices will be the revised manufacturing allowances contained in the Interim Final Rule published in the Federal Register on December 29, 2006 (71 FR 78333-78335).

The Interim Final Rule established new make allowances for cheese, butter, nonfat dry milk (NFDM) and dry whey. Specifically, the rule adopts the following increased manufacturing allowances: cheese -- \$0.1682 per pound; butter -- \$0.1202 per pound; NFDM -- \$.1570 per pound; and dry whey -- \$0.1956 per pound. These were the make allowances used to calculate advance Class I and Class II prices for March and the Class III and Class IV milk prices for February.

More information on the judge's ruling is available at www.ams.usda.gov/dairy/hearings.htm under 'National Hearings—Class III/IV Price Make-Allowances'.

Comments on Southeast Order Pooling Provisions Available

On December 22, 2006, the Market Administrator issued an invitation for comments on a request to change producer delivery day requirements and diversion limits for the Southeast Marketing Area. Each of the comments that have been received are currently under consideration. Visit www.fmmatlanta.com, and click on 'Hearings & Proposals' to view copies of the comments received by the Market Administrator.

Blend Price Falls

The uniform blend price in Hillsborough County, FL, was \$16.71 per hundredweight for milk at 3.5 percent butterfat for the month of February. This represents a decrease of \$0.06 compared with the previous month but is \$0.37 higher than February 2006.

Class I utilization was 81.18 percent in February, a 1.74 percent decrease compared with the previous month and a 1.15 percent decline when compared with February 2006.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in January was 15.51 billion pounds, an increase of 1.1 percent from January 2006 and an increase of 1.8 percent when compared with December 2006 on a daily average basis. Total cheese output (excluding cottage cheese) was 824 million pounds, 6.7 percent above January 2006 but 0.8 percent below December 2006 on a daily average basis. Butter production was 151 million pounds, 2.5 percent above January 2006 and 10.0 percent above December 2006 on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.32 in February, a decrease of 0.10 from last month, and a decrease of 0.61 from February 2006.

2006 Annual Production Statistics

The annual production of milk for the U.S. during 2006 was 182 billion pounds, 2.8 percent higher than 2005. Production per cow in the U.S. last year averaged 19,951 pounds, 2.0 percent above 2005. For perspective, the average annual rate of milk production per cow has increased 18.3 percent from 1997, just over 2.0 percent per year. The average number of milk cows on farms in the U.S. during 2006 was 9.11 million head, up 0.8 percent from 2005.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in February 2007 is \$16.71 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$12.52 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3222 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In February, Class I use accounted for 82.52% of all producer skim milk (priced to handlers at \$9.19 per hundredweight, plus the Class I differential and 45.36% of producer butterfat (priced to handlers at \$1.2906 per pound plus Class I differential). Class II use accounted for 6.17% of all producer skim milk (\$8.77 per hundredweight) and 26.82% of producer butterfat (\$1.3182 per pound). Class III use accounted for 5.76% of all producer skim milk (\$9.94 per hundredweight) and 2.84% of producer butterfat (\$1.3112 per pound). Class IV use accounted for 5.55% of all producer skim milk (\$8.42 per hundredweight) and 24.98% of producer butterfat (\$1.3112 per pound).

Receipts of producer milk during February 2007 totaled 268.8 million pounds, 6.9 million pounds more than was pooled in February of last year. Florida producers supplied 190.1 million pounds of milk in January 2007 to pool plants or 65.93% of the total producer milk pooled in Florida. In January 2006 Florida producers supplied 71.09% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for February 2007. In-area Class I route disposition totaled 258.9 million pounds in January 2007, 0.8 million pounds more than January 2006. This is an increase of 1.84 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE-444 - March 9, 2007

Milk supply and use estimates for 2006 are adjusted to reflect revisions to production and stock data as well as December trade data. Production in first quarter 2007 is lowered because of reduced milk per cow as growth in January output per cow was lower than expected. Production forecasts for the remaining quarters are unchanged. Despite improved milk prices, relatively weak milk-feed ratios are expected to result in a gradual decline in herd numbers through much of the year. Beginning year stocks are higher than last month but demand for dairy products is expected to absorb the additional quantities. Nonfat dry milk (NDM) and whey demand, for both domestic use and exports, remains strong with international markets expected to remain tight through the entire year. Hence, prices for these products are raised from last month and are major drivers of the increase in the Class III and Class IV price forecasts. Butter prices are reduced slightly as butter supplies are relatively large and may grow as increased NDM demand supports increased butter production. Cheese price forecasts are slightly higher than last month as demand is firm. The all milk price forecast for 2007 is raised to \$15.05 to \$15.65.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

FLORIDA Fluid Milk Report

Sue L. Mosley
Market Administrator

Florida Marketing Area
Federal Order No. 6

www.fmmatlanta.com

April 2007

Volume 8—No. 4

Class Prices Revised for March

On April 6, the Agriculture Marketing Service (AMS) announced a revision of the Class and Component Prices for March 2007 that were announced on March 30. Federal order language requires these prices be based on weekly prices announced by the National Agricultural Statistics Service (NASS) on or before the 5th day of the month. AMS failed to note that NASS was releasing the "Dairy Products Prices" report on Thursday, April 5th. AMS determined that prices need to be recalculated using the five weeks of survey prices published in the April 5th NASS report. As a result, prices and volumes for the survey week ending March 31st are included in the re-calculation. The March revised prices at 3.5 percent butterfat are: Class II, \$13.60; Class III, \$15.09; and Class IV, \$13.71.

Decision Regarding Southeast Order Pooling Provisions Issued

On April 11, the Market Administrator published a decision regarding a request to lower diversion limits and increase producer delivery day requirements on the Southeast Order. That decision states: *"From the comments received, there is near unanimous concern over the plight of local dairy farmers and maintaining a supply of milk near the fluid markets of the Southeast Order. However, there is a significant lack of consensus over how to change Federal order provisions to address these concerns. Given this lack of consensus... no action will be taken on the request to change diversion limits and delivery day requirements at this time."*

A public hearing on the marketing environment of the Southeast Order is likely to be held in the near future. At such time, parties are urged to review diversion limits and delivery day requirements and other order provisions which could be altered to improve the operation of the Southeast Order."

To obtain a copy of the decision issued by the Market Administrator, visit www.fmmatlanta.com, and click on the 'Hearings & Proposals' link.

Blend Price Higher

The uniform blend price in Hillsborough County, FL, was \$17.57 per hundredweight for milk at 3.5 percent butterfat for the month of March. This represents an increase of \$0.86 compared with the previous month and is \$2.16 higher than March 2006.

Class I utilization was 78.19 percent in March, a 2.99 percent decrease compared with the previous month and a 2.57 percent decline when compared with March 2006.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in February was 14.30 billion pounds, an increase of 0.4 percent from February 2006 and an increase of 1.8 percent when compared with January 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 745 million pounds, 3.3 percent above February 2006 but 0.1 percent below January 2007 on a daily average basis. Butter production was 134 million pounds, 2.0 percent below February 2006 and 1.6 percent below January 2007 on a daily average basis.

USDA has recently begun reporting nonfat dry milk in a new way. Skim milk powder, which includes protein standardized and blends of dry skim milk, is now reported as a separate category. Accordingly, nonfat dry milk powder production was 98.1 million pounds, 16.5 percent below February 2006 and 0.2 percent below January 2007 on a daily average basis. Skim milk powder production was 11.0 million pounds, 57.0 percent below February 2006 and 13.0 percent above January 2007 on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.41 in March, an increase of 0.10 from last month, and a decrease of 0.29 from March 2006.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in March 2007 is \$17.57 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.24 per hundredweight plus 3.5 times the uniform butterfat price of \$1.3691 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In March, Class I use accounted for 79.42% of all producer skim milk (priced to handlers at \$10.00 per hundredweight, plus the Class I differential and 44.95% of producer butterfat (priced to handlers at \$1.3135 per pound plus Class I differential). Class II use accounted for 7.86% of all producer skim milk (\$9.07 per hundredweight) and 34.06% of producer butterfat (\$1.3839 per pound). Class III use accounted for 9.27% of all producer skim milk (\$10.64 per hundredweight) and 4.27% of producer butterfat (\$1.3769 per pound). Class IV use accounted for 3.45% of all producer skim milk (\$9.21 per hundredweight) and 16.72% of producer butterfat (\$1.3769 per pound).

Receipts of producer milk during March 2007 totaled 309.7 million pounds, 10.1 million pounds more than was pooled in March of last year. Florida producers supplied 182.1 million pounds of milk in February 2007 to pool plants or 67.72% of the total producer milk pooled in Florida. In February 2006 Florida producers supplied 72.35% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for March 2007. In-area Class I route disposition totaled 237.9 million pounds in February 2007, 1.1 million pounds less than February 2006. This is an decrease of 0.48 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE-445 – April 10, 2007

Milk production forecasts for 2007 are lowered as growth in milk per cow continues to lag historical growth. Prices are forecast higher as demand for dairy products remains strong. Tight international supplies have pushed nonfat dry milk (NDM) and dry whey prices higher as exporters compete with domestic users for relatively tight supplies. With growth in international supplies expected to remain limited through the year, price forecasts for NDM and whey are raised from last month. Cheese and butter price forecasts are also raised to reflect slower production growth and robust demand. Class III and Class IV price forecasts are raised to reflect higher product prices. The all milk price forecast for 2007 is raised to \$15.55 to \$16.05.

Also:

U.S. corn ending stocks for 2006/07 are projected at 877 million bushels, up 125 million from last month based on lower projected feed and residual use. The season-average farm price is projected at \$3.00 to \$3.20 per bushel, 20 cents per bushel lower on the top end of the range reflecting higher projected carryout, larger 2007 intended area, and prices received by producers to date.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

Hearing Announced for Appalachian, Florida, and Southeast Orders

The U.S. Department of Agriculture has announced that it will hold a public hearing to consider proposals to amend the Appalachian, Florida, and Southeast Orders. The hearing will begin at 1:00 p.m. on Monday, May, 21, 2007, at the Sheraton Suites Tampa Airport, 4400 West Cypress Street, Tampa, Florida, 33607. The telephone number is 800-325-3535.

The proposals seek to amend the Appalachian, Florida, and Southeast Orders by temporarily adjusting the Class I pricing surface for each county within each of the three milk marketing orders until such time that USDA is able to comprehensively address the Class I pricing surface on a national scale.

Proposals also include changing the diversion percentage limits, the producer delivery days, and the transportation credit provisions of the Appalachian and Southeast orders. Other proposals would change the maximum rates for each of the three orders the market administrator may charge for the administration of the orders from 5 cents per hundredweight to as much as 8 cents per hundredweight. Testimony will be taken to determine if any of the proposals should be handled on an emergency basis.

The hearing notice was published as a proposed rule in the May 8 Federal Register. Copies of the hearing notice may be obtained from the USDA/AMS/Dairy Programs, STOP 0231 – Room 2971-A, 1400 Independence Avenue, SW, Washington, DC 20250-0231. Additionally, copies the hearing notice may be obtained online at www.fmmlanta.com by clicking on 'What's New'.

If you have any questions concerning this announcement, please contact this office.

Blend Price Increases \$0.78

The uniform blend price in Hillsborough County, FL, was \$18.35 per hundredweight for milk at 3.5 percent butterfat for the month of April. This represents an increase of \$0.78 compared with the previous month and is \$3.99 higher than April 2006. The blend price has increased \$1.64 over the past two months. Class I utilization was 75.15 percent in April, a 3.04 percent decrease compared with the previous month and a 3.97 percent decline when compared with April 2006.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in March was 16.11 billion pounds, an increase of 0.9 percent from March 2006 and an increase of 1.8 percent when compared with February 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 837 million pounds, 1.9 percent above March 2006 and 11.8 percent above February 2007. Butter production was 140 million pounds, 1.1 percent below March 2006 but 4.4 percent above February 2007.

Nonfat dry milk powder production was 118.0 million pounds in March, 8.8 percent below March 2006 and 8.6 percent above February 2007 on a daily average basis. Skim milk powder production was 10.2 million pounds, 52.8 percent below March 2006 and 16.2 percent below February 2007 on a daily average basis.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.54 in April, an increase of 0.14 from last month, and an increase of 0.06 from April 2006.

2nd Reconvened Hearing Announced

A second reconvened hearing regarding Class III and Class IV product price formulas will be held in Pittsburg, PA on July 9, 2007. To find out more, visit www.fmmlanta.com and click on 'What's New'.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in April 2007 is \$18.35 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$13.75 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4529 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In April, Class I use accounted for 76.33% of all producer skim milk (priced to handlers at \$10.50 per hundredweight, plus the Class I differential and 43.24% of producer butterfat (priced to handlers at \$1.3896 per pound plus Class I differential). Class II use accounted for 8.61% of all producer skim milk (\$9.69 per hundredweight) and 35.52% of producer butterfat (\$1.4727 per pound). Class III use accounted for 9.60% of all producer skim milk (\$11.36 per hundredweight) and 7.18% of producer butterfat (\$1.4657 per pound). Class IV use accounted for 5.46% of all producer skim milk (\$11.39 per hundredweight) and 14.06% of producer butterfat (\$1.4657 per pound).

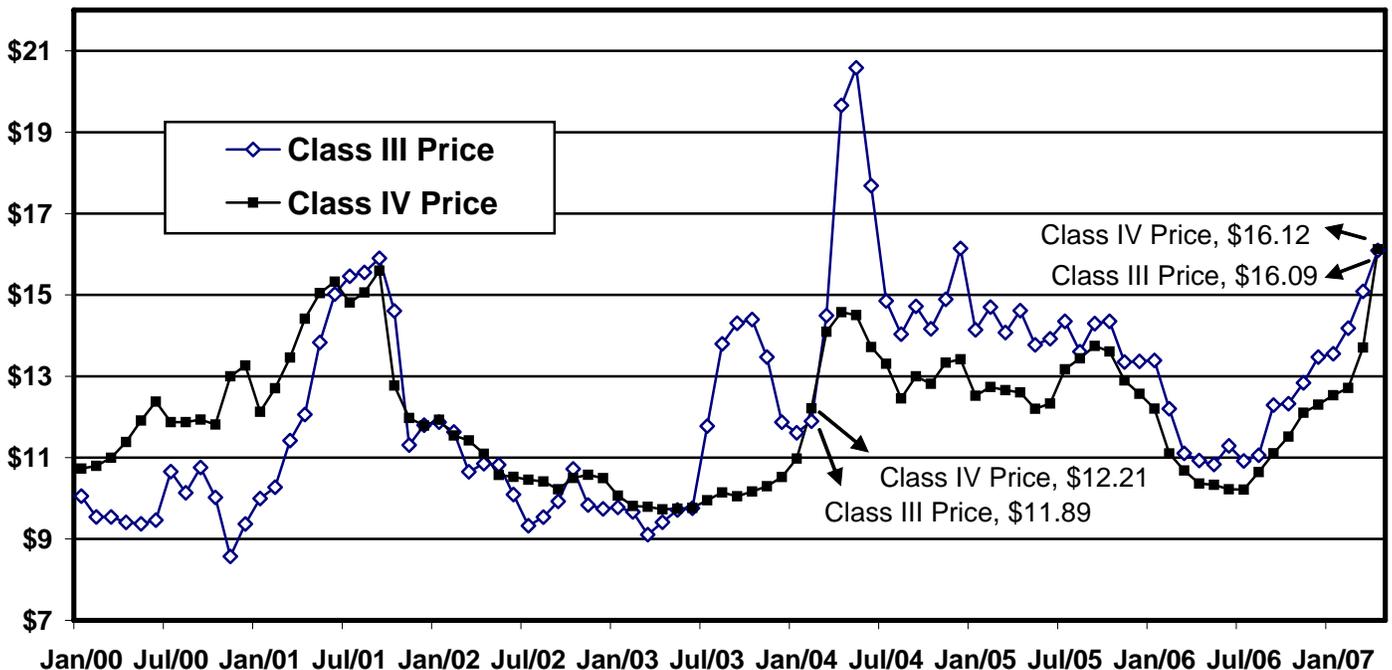

Receipts of producer milk during April 2007 totaled 292.7 million pounds, 13.8 million pounds more than was pooled in April of last year. Florida producers supplied 207.5 million pounds of milk in March 2007 to pool plants or 67.0% of the total producer milk pooled in Florida. In March 2006 Florida producers supplied 74.5% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for April 2007. In-area Class I route disposition totaled 264.3 million pounds in March 2007, 0.08 million pounds less than March 2006. This is a decrease of 0.03 percent after adjusting for calendar composition.

Packaged Class I Route Sales in Marketing Area

Product Description	Pounds	Percent
March 2007		
Whole Milk	96,697,694	36.59%

Class IV Price Exceeds Class III Price

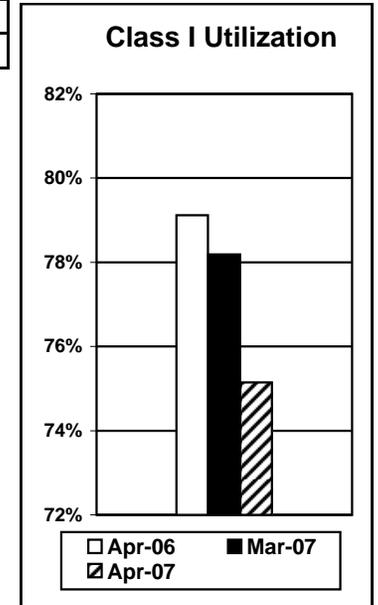

In March, the Class IV price was higher than the Class III price, the first time this has occurred since February 2004. Over this 37 month period, the Class III price was, on average, \$1.45 per hundredweight higher than the Class IV price, but strong demand for nonfat dry milk has pushed the Class IV price \$0.03 above the cheese-based Class III price.

WASDE Dairy Report 1/

WASDE - 446 May 11, 2007

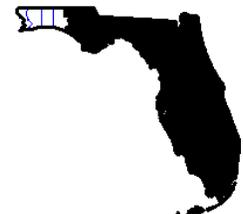

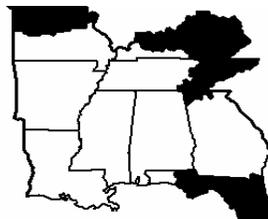

Milk production is forecast to increase in 2008 reflecting strong milk prices and expected improved availability of hay. Milk cow numbers are likely to be only fractionally below 2007 and milk per cow growth should increase more rapidly than in 2007. Commercial use of fat and skim solids is expected to remain strong and commercial stocks will likely tighten. Butter prices are forecast to increase in 2008 but cheese prices are forecast to decline slightly. Continued strength in export demand as well as domestic use of nonfat dry milk (NDM) and whey will help support prices with the annual average price of NDM above 2007. Whey prices are expected to decline modestly from 2007 with increased supplies but will remain above historical prices. In the face of slightly weaker product prices, the Class III price is forecast to decline slightly from 2007 but, supported by continued strength in NDM prices, the Class IV price is expected to increase from 2007. The all milk price is forecast at \$17.00 to \$18.00 per cwt in 2008.

Forecast milk supply in 2007 is raised from last month as higher milk prices are expected to slow the pace of decline in cow numbers. Price forecasts for all products are raised sharply from last month as demand for all products remains strong and production growth is expected to lag the past several years. Class III and Class IV prices are raised and the all milk price is forecast to average \$17.05 to \$17.55 per cwt.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

'07 Commodity Prices Soar

Manufactured dairy product prices have been rising dramatically over the past several months. In fact, since the beginning of the year, labeled '1/6/07' in the charts below for the first week of 2007, the four major commodities have increased from 27 to over 80 percent according to National Agricultural Statistics Service (NASS) weekly reports. Nonfat dry milk powder (NFDM) prices are up 82 percent, dry whey prices are up 73 percent, Cheddar Cheese prices (blocks and barrels combined) have increased 33 percent and butter prices have risen 27 percent between January 6, 2007 and June 9, 2007.

Source: NASS

Source: NASS

Blend Price Increases \$1.20

The uniform blend price in Hillsborough County, FL, was \$19.55 per hundredweight for milk at 3.5 percent butterfat for the month of May. This represents an increase of \$1.20 compared with the previous month and is \$5.27 higher than May 2006. The blend price has increased \$2.84 over the past three months.

Class I utilization was 74.78 percent in May, a 0.37 percent decrease compared with the previous month and a 5.65 percent decline when compared with May of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in April was 15.74 billion pounds, an increase of 1.3 percent from April 2006 and an increase of 0.9 percent when compared with March 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 803 million pounds, 1.2 percent above April 2006 but 4.1 percent below March 2007. Butter production was 134 million pounds, 5.2 percent above April 2006 but 2.8 percent below March 2007.

Nonfat dry milk powder production was 128.0 million pounds in April, 2.2 percent below April 2006 and 8.5 percent above March 2007. Skim milk powder production was 15.6 million pounds in April, 11.1 percent below April 2006 and 52.9 percent above March 2007.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.52 in May, an increase of 0.02 from last month, and an increase of 0.2 from May 2006.

Hearing Transcripts Available

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in May 2007 is \$19.55 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$14.70 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5332 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In May, Class I use accounted for 75.91% of all producer skim milk (priced to handlers at \$11.28 per hundredweight, plus the Class I differential and 44.10% of producer butterfat (priced to handlers at \$1.4389 per pound plus Class I differential). Class II use accounted for 8.78% of all producer skim milk (\$11.50 per hundredweight) and 38.08% of producer butterfat (\$1.5776 per pound). Class III use accounted for 11.14% of all producer skim milk (\$12.54 per hundredweight) and 6.82% of producer butterfat (\$1.5706 per pound). Class IV use accounted for 4.17% of all producer skim milk (\$13.45 per hundredweight) and 11.00% of producer butterfat (\$1.5706 per pound).

Receipts of producer milk during May 2007 totaled 287.2 million pounds, 16.2 million pounds more than was pooled in May of last year. Florida producers supplied 197.3 million pounds of milk in April 2007 to pool plants or 67.4% of the total producer milk pooled in Florida. In April 2006 Florida producers supplied 75.3% of the total producer milk pooled on the Florida market.

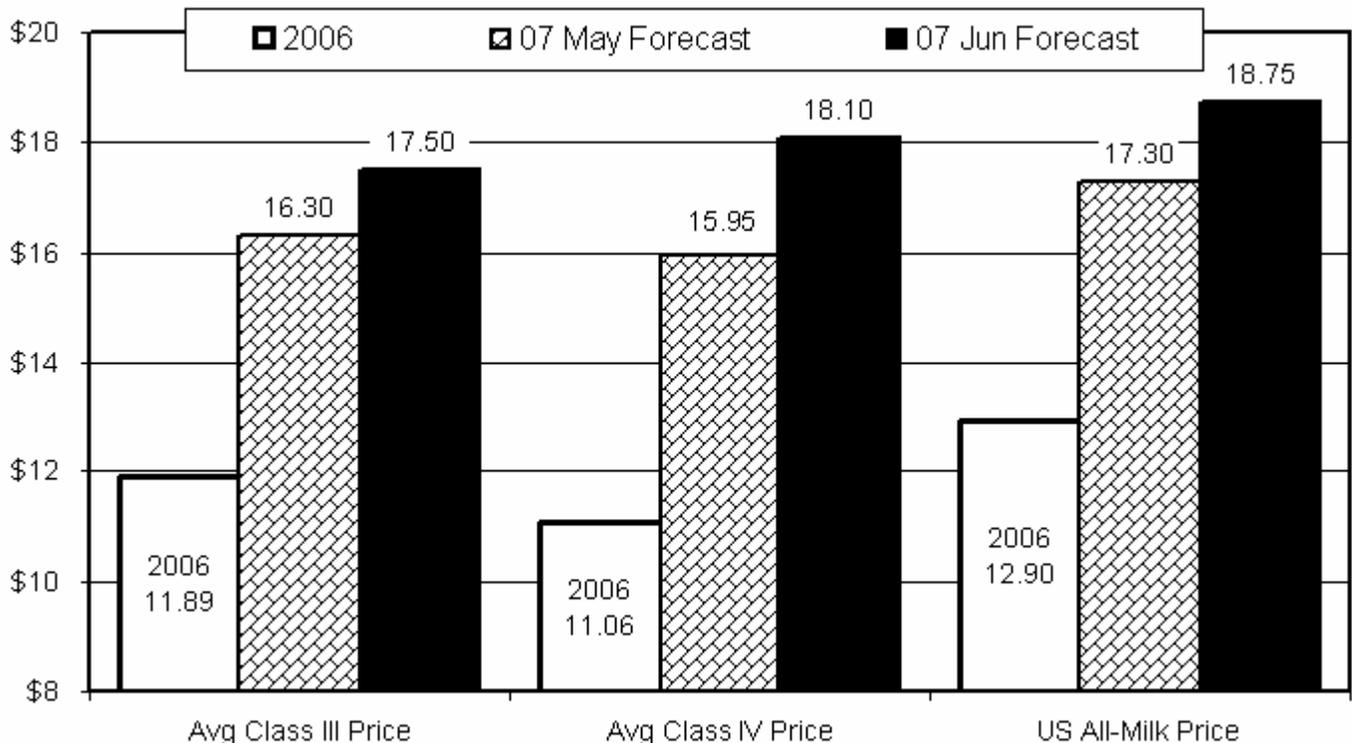

There were 13 regulated pool distributing plants and 4 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for May 2007. In-area Class I route disposition totaled 247.5 million pounds in April 2007, 6.1 million pounds more than April 2006. This is an increase of 1.99 percent after adjusting for calendar composition.

USDA's Price Forecasts Revised Up, Way Up

This chart shows how Class III and IV price forecasts for 2007 have increased in recent weeks. USDA's price forecasts are up \$1.20 and \$2.15 since May for Class III and IV, respectively, which would push the all-milk price to an all-time record average of \$18.75. See the last page of this publication for more on the WASDE Dairy Report.

WASDE Dairy Report 1/

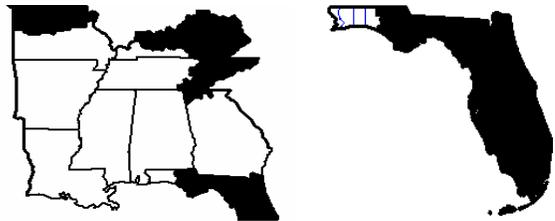

WASDE - 447 June 11, 2007

Strong demand for dairy products and limited ability to adjust production in the short term has resulted in significantly higher price forecasts this month. Milk production forecasts for both 2007 and 2008 are raised from last month but relatively high feed costs are expected to limit growth into 2008. Cow numbers are forecast higher than last month, with the cow herd in 2007 averaging about the same as 2006, and expanding in 2008. Output per cow is forecast to continue to increase modestly in both 2007 and 2008.

However, in the face of continued strong demand for dairy products and expected tightness in international supplies, most product prices for 2007 and 2008 are forecast higher than last month. Forecast nonfat dry milk prices are increased significantly, which coupled with higher forecast butter prices, support a stronger Class IV price forecast. Although cheese prices are also forecast higher, a reduced forecast for whey prices limits the increase in the Class III price forecast for both 2007 and 2008. With strong Class prices, the forecast for all milk is also raised. In 2007, the all milk price is forecast to average a record \$18.55 to \$18.95 per cwt, and then decline to \$17.90 to \$18.90 per cwt in 2008.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

July 2007

Volume 8—No. 7

Rule Issued Establishes Mandatory Reporting of Dairy Product Prices

The USDA has issued an interim final rule establishing a Dairy Product Mandatory Reporting Program as required by law. The Dairy Market Enhancement Act of 2000, and certain provisions of the 2002 Farm Bill amend the Agricultural Marketing Act of 1946 to establish the program.

The mandatory reporting program will provide timely, accurate, and reliable market information to facilitate more informed marketing decisions and promote competition in the dairy product manufacturing industry. The program will: (1) Require persons engaged in manufacturing dairy products to report certain information including the price, quantity, and moisture content where applicable, of dairy products sold by the manufacturer; and (2) Require persons storing dairy products to report information on the quantity of dairy products stored. Under the interim final rule, USDA's National Agricultural Statistics Service (NASS) will collect the information. Any manufacturer that processes and markets less than 1 million pounds of dairy products per year is exempt from the reporting requirements.

USDA's Agricultural Marketing Service (AMS) will implement a plan to verify the price information submitted to NASS. AMS will visit butter, nonfat dry milk, cheese and dry whey manufacturers that file reports. AMS will verify that eligible sales transactions agree with information reported to NASS and will check for eligible sales transactions that were not reported.

The interim final rule was published in the Federal Register on July 3, a copy of which is posted at www.fmmatlanta.com under 'What's New'. Public comments are due September 4, 2007 and may be filed by visiting www.regulations.gov, or submitted to the mailing address listed in the interim final rule. USDA will issue a final rule once public comments have been received.

Blend Price Increases Over \$2

The uniform blend price in Hillsborough County, FL, was \$21.62 per hundredweight for milk at 3.5 percent butterfat for the month of June. This represents an increase of \$2.07 compared with the previous month and is \$7.48 higher than June 2006. The blend price has increased four consecutive months, and is up 29 percent since January and 53 percent over the past twelve months. Additionally, June is the third highest uniform blend price for the Florida Order and marks the just the fourth time that the blend price has exceeded \$21.00 since January 2000.

Class I utilization was 79.18 percent in June, a 4.40 percent increase compared with the previous month, but a 3.66 percent decline when compared with June of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in May was 16.2 billion pounds, an increase of 0.8 percent from May 2006 and a decrease of 0.5 percent when compared with April 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 820 million pounds, slightly below May 2006 but 2.2 percent above April 2007. Butter production was 125 million pounds, 2.8 percent below May 2006 and 7.0 percent below April 2007.

Nonfat dry milk powder production was 116.0 million pounds in May, 12.9 percent below May 2006 and 9.4 percent below April 2007. Skim milk powder production was 13.0 million pounds in May, 34.3 percent below May 2006 and 16.7 percent below April 2007.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 2.76 in June, an increase of 0.22 from last month, and an increase of 0.31 from June 2006.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in June 2007 is \$21.62 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$16.53 per hundredweight plus 3.5 times the uniform butterfat price of \$1.6204 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In June, Class I use accounted for 80.35% of all producer skim milk (priced to handlers at \$12.88 per hundredweight, plus the Class I differential and 48.04% of producer butterfat (priced to handlers at \$1.5466 per pound plus Class I differential). Class II use accounted for 9.45% of all producer skim milk (\$13.58 per hundredweight) and 39.45% of producer butterfat (\$1.6527 per pound). Class III use accounted for 6.24% of all producer skim milk (\$14.93 per hundredweight) and 4.33% of producer butterfat (\$1.6457 per pound). Class IV use accounted for 3.96% of all producer skim milk (\$15.54 per hundredweight) and 8.18% of producer butterfat (\$1.6457 per pound).

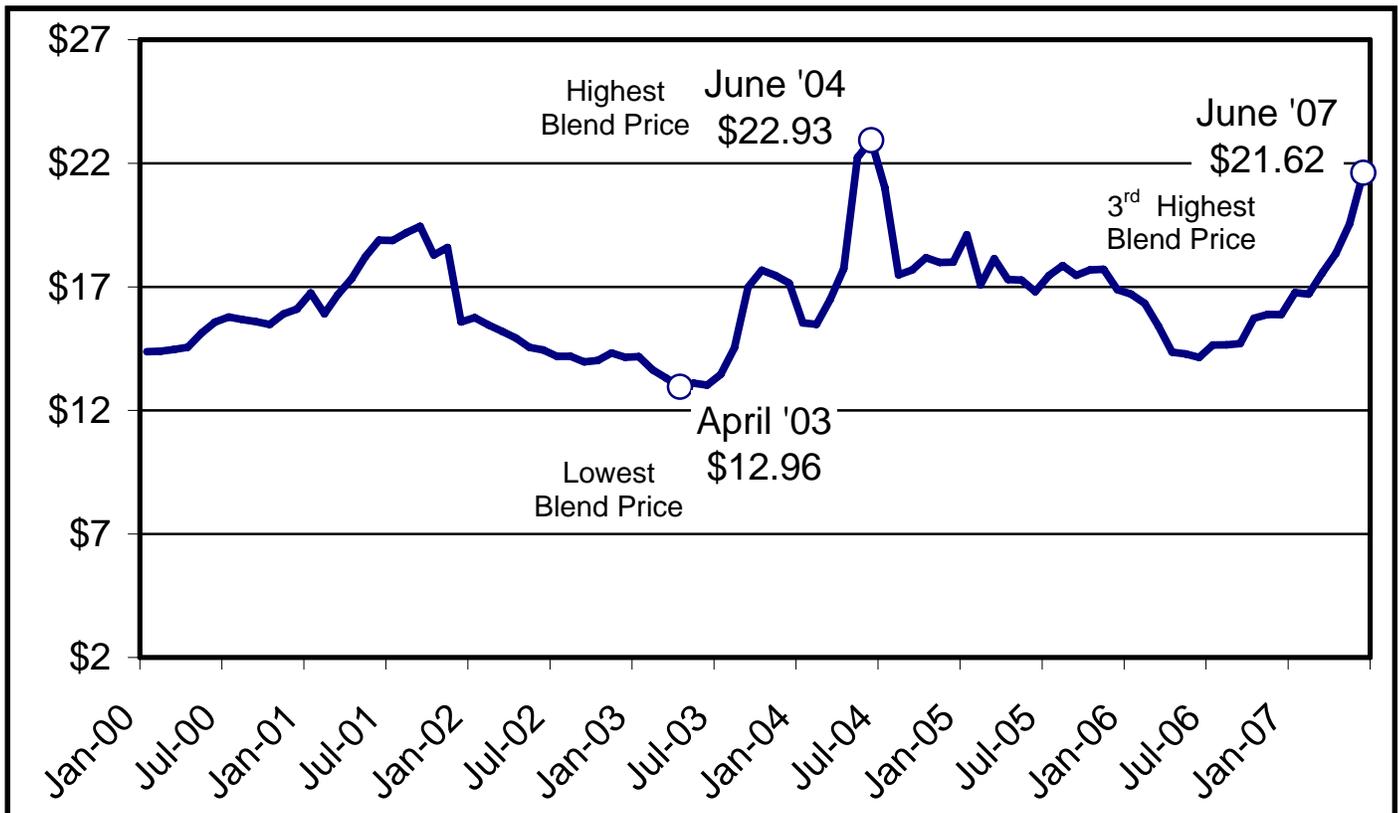

Receipts of producer milk during June 2007 totaled 258.5 million pounds, 7.4 million pounds more than was pooled in June of last year. Florida producers supplied 199.3 million pounds of milk in May 2007 to pool plants or 69.41% of the total producer milk pooled in Florida. In May 2006 Florida producers supplied 73.95% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 6 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for June 2007. In-area Class I route disposition totaled 236.2 million pounds in May 2007, 4.5 million pounds less than May 2006. This is a decrease of 1.11 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE - 448 July 12, 2007

Milk production and use forecasts are virtually unchanged for both 2007 and 2008. Cow numbers are forecast higher than last month as producers are expected to respond to favorable returns, but output per cow is reduced slightly as growth continues to lag expectations. The July 20 USDA Cattle report will provide further indications of producer expansion plans. Dairy prices remain strong as both domestic and international demand remains firm.

Cheese and nonfat dry milk (NDM) price forecasts are raised from last month, but butter prices are forecast lower. Class III and Class IV price forecasts are raised due to higher cheese and NDM prices. However, the increase in Class IV prices is moderated by the lower forecast for butter. The forecast for all milk is also raised. In 2007, the all milk price is forecast to average a record \$19.00 to \$19.30 per cwt, and then decline to \$18.20 to \$19.20 per cwt in 2008.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

Global Dairy Markets Help Push Federal Order Prices to Record Levels

While domestic consumption of dairy products has been strong and domestic milk production growth has been slow, the primary reason milk prices are currently at record levels is the world's demand for US dairy products. Due to several causes, chief among them a drought in Australia, the removal of European dairy exports subsidies, and the growing demand for dairy products from expanding middle class populations in countries such as China, world dairy prices have skyrocketed over the past several months. As seen in the chart below, compared with one year ago, butter prices are up over 110 percent, skim milk powder prices are up nearly 150 percent and Cheddar prices are up over 75 percent on Oceania markets. Similar price increases have been seen throughout the world for dairy products. (Source: Dairy Market News; www.ams.usda.gov/dairy/mncls/INTER.HTM).

Jan. 2006-Aug. 2007 Oceania Export Prices

(US dollars / Metric ton: Oceania=Australia, New Zealand, etc.)

Feed and diesel fuel prices have driven up milk production costs and slowed US milk production growth (up just 1.0 percent in the first half of 2007 compared to an average annual growth rate of 1.8 percent from 1997 to 2006). However, the recent producer price gains are due more to increases in demand rather than constrictions of milk supply.

Blend Price Posts New High

The uniform blend price in Hillsborough County, FL, was \$24.22 per hundredweight for milk at 3.5 percent butterfat for the month of July. This represents an increase of \$2.60 compared with the previous month and is \$9.57 higher than July 2006. The blend price has increased five consecutive months to its highest value ever, \$1.28 higher than the previous record (\$22.93 in June 2004). The twelve month period from July 2006 to July 2007 produced the second largest swing in blend prices, second only to the increase in prices between June 2003 and June 2004.

Class I utilization was 80.05 percent in July, a slight 0.87 percent increase compared with the previous month, but a 4.81 percent decline when compared with July of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in June was 15.5 billion pounds, an increase of 1.0 percent from June 2006 and a decrease of 1.4 percent when compared with May 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 790 million pounds, 0.8 percent below June 2006 and 3.7 percent below May 2007. Butter production was 110 million pounds, 9.3 percent above June 2006 but 11.2 percent below May 2007.

Nonfat dry milk powder production was 119 million pounds in June, 2.1 percent above June 2006 and 2.6 percent above May 2007. Skim milk powder production was 16.4 million pounds in June, 31.2 percent below June 2006 and 26.2 percent above May 2007.

The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 3.19 in July. This is the first time since January 2006, 16 months ago, that the ratio has exceeded 3.0.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in July 2007 is \$24.22 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$19.07 per hundredweight plus 3.5 times the uniform butterfat price of \$1.6625 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In July, Class I use accounted for 81.23% of all producer skim milk (priced to handlers at \$15.61 per hundredweight, plus the Class I differential and 48.78% of producer butterfat (priced to handlers at \$1.6708 per pound plus Class I differential). Class II use accounted for 7.96% of all producer skim milk (\$16.31 per hundredweight) and 35.55% of producer butterfat (\$1.6180 per pound). Class III use accounted for 4.54% of all producer skim milk (\$16.31 per hundredweight) and 5.94% of producer butterfat (\$1.6110 per pound). Class IV use accounted for 6.27% of all producer skim milk (\$16.58 per hundredweight) and 9.73% of producer butterfat (\$1.6110 per pound).

Receipts of producer milk during July 2007 totaled 248.2 million pounds, 3.9 million pounds more than was pooled in July of last year. Florida producers supplied 170.0 million pounds of milk in June 2007 to pool plants or 65.79% of the total producer milk pooled in Florida. In June 2006 Florida producers supplied 76.51% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 5 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for July 2007. In-area Class I route disposition totaled 227.1 million pounds in June 2007, 1.8 million pounds less than June 2006. This is a decrease of 1.04 percent after adjusting for calendar composition.

WASDE Dairy Report 1/

WASDE - 448 August 10, 2007

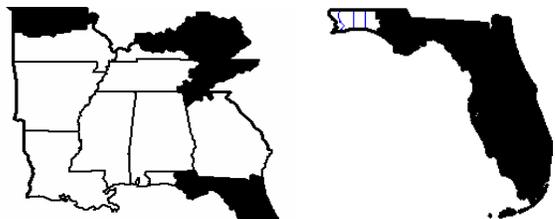

Forecast milk production for 2007 is unchanged but raised for 2008. Cow numbers are forecast higher as USDA's Cattle report indicated that producers held 3 percent more heifers for milk cow replacement. High replacement heifer and dairy cow prices indicate strong demand for dairy cows. However, milk production growth is tempered by slower-than-expected gains in milk output per cow. Milk per cow growth is slowed due to continued tight supplies of alfalfa hay and lower rBST use than previously assumed.

Demand for dairy products remains firm with strong world prices continuing to support U.S. prices. Cheese and nonfat dry milk price forecasts are raised for both 2007 and 2008. Butter price forecasts are increased in 2007 but lowered in 2008. Whey price forecasts are reduced both years. Despite higher cheese forecasts, the Class III price forecasts are reduced slightly because of lower whey prices. The Class IV price forecast for 2007 is increased, and unchanged in 2008. The forecasts for all milk are raised from last month. In 2007, the all milk price is forecast to average a record \$19.15 to \$19.35 per cwt, and then decline to \$18.25 to \$19.25 per cwt in 2008.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

September 2007

Volume 8—No. 9

Producer Milk Volumes, Number of Farms Pooled Climbs Higher

In each of the first five months of this year, a new record volume of producer milk pooled on the Florida Order has been established. And in June and July, producer milk volumes were fewer than one million pounds below the highest monthly totals, both set in 2005. For the January through July period, the average volume of producer milk pooled this year exceeds last year by nearly ten million pounds, and the 2005 average by over six million pounds. The chart below shows the monthly average number of farms pooled between January and July of each year since 2000 (when the three Florida Orders consolidated into one), and the monthly average number of milk pounds pooled. So far this year, the average number of farms meeting the pooling requirements of this Order, which are the most stringent of the Federal Order system, are greater than in any previous year.

Florida Order: January to July, 2000 to 2007
Average Number of Farms
& Average Number of Pounds Pooled (in millions)

Blend Price Posts Another New High

The uniform blend price in Hillsborough County, FL, was \$25.24 per hundredweight for milk at 3.5 percent butterfat for the month of August. This represents an increase of \$1.02 compared with the previous month and is \$10.59 higher than August 2006. The blend price has increased six consecutive months, setting a new record high price for the second month in a row.

Class I utilization was 86.72 percent in August, a 6.67 percent increase compared with the previous month, but a 1.60 percent decline when compared with August of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in July was 15.7 billion pounds, an increase of 3.7 percent from July 2006 and a decrease of 1.6 percent when compared with June 2007 on a daily average basis. Note that July 2006 was an unusually low milk production month due to extremely hot weather conditions in the Western U.S., overstating the production gains from July 2006 to July 2007. Total cheese output (excluding cottage cheese) was 795 million pounds, 2.6 percent higher than July 2006 and 0.6 percent above June 2007. Butter production was 115 million pounds, 21.8 percent above July 2006 and 5.2 percent above June 2007.

Nonfat dry milk powder production was 121 million pounds in July, 36.7 percent higher than July 2006 and 1.7 percent higher than June 2007. Dry whey production was 95.2 million pounds in July, a slight increase from July 2006 and 0.6 percent greater than June 2007. The milk-feed price ratio, the number of pounds of 16% mixed dairy feed equal in value to one pound of whole milk, was 3.24 in August, an increase of 0.07 points from the revised 3.17 ratio recorded for July 2007.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in August 2007 is \$25.24 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$20.29 per hundredweight plus 3.5 times the uniform butterfat price of \$1.6175 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In August, Class I use accounted for 88.09% of all producer skim milk (priced to handlers at \$16.74 per hundredweight, plus the Class I differential and 50.50% of producer butterfat (priced to handlers at \$1.6010 per pound plus Class I differential). Class II use accounted for 7.77% of all producer skim milk (\$17.44 per hundredweight) and 38.53% of producer butterfat (\$1.5942 per pound). Class III use accounted for 2.01% of all producer skim milk (\$14.79 per hundredweight) and 4.24% of producer butterfat (\$1.5872 per pound). Class IV use accounted for 2.13% of all producer skim milk (\$16.91 per hundredweight) and 6.73% of producer butterfat (\$1.5872 per pound).

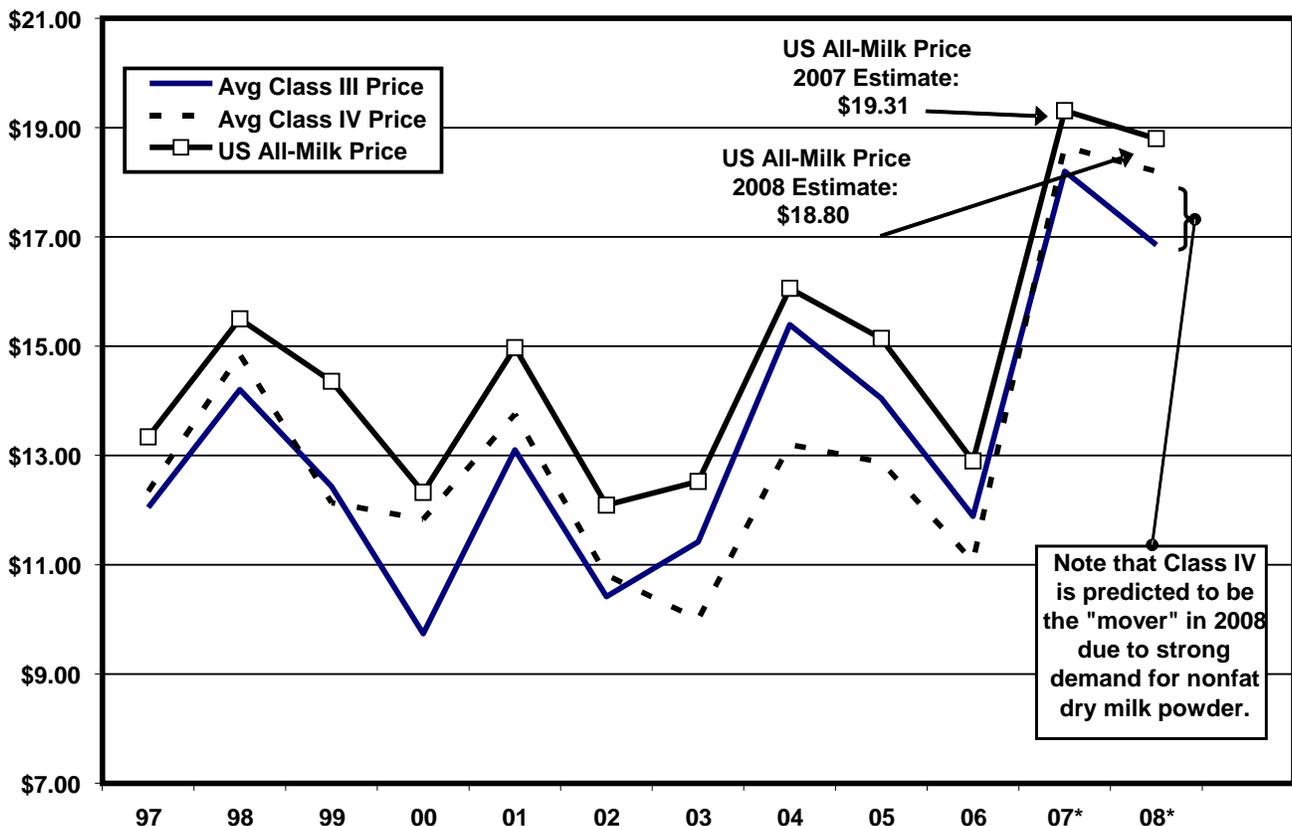

Receipts of producer milk during August 2007 totaled 246.3 million pounds, 2.8 million pounds more than was pooled in August of last year. Florida producers supplied 161.8 million pounds of milk in July 2007 to pool plants or 65.18% of the total producer milk pooled in Florida. In July 2006 Florida producers supplied 74.08% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 8 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for August 2007. In-area Class I route disposition totaled 224.5 million pounds in July 2007, 4.7 million pounds less than July 2006. This is a decrease of 2.2 percent after adjusting for calendar composition.

Packaged Class I Route Sales in Marketing Area

WASDE Dairy Report 1/

WASDE - 450 September 12, 2007

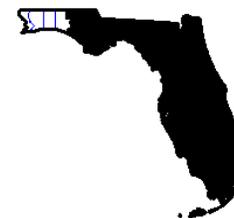

Forecast milk production for 2007 and 2008 is raised as producers respond to strong milk prices by expanding cow herds through next year. High replacement heifer and dairy cow prices indicate strong demand for dairy animals. Milk cow numbers and milk per cow growth in July were higher than expected, but continued tight supplies of alfalfa hay are expected to moderate growth in output per cow into 2008. Despite higher milk production forecasts, demand is expected to continue to support milk prices at record levels in 2007 and near record levels in 2008. World dairy supplies are expected to remain relatively tight and demand for U.S. dairy products, both domestically and internationally, is forecast to help absorb higher production levels. However, stock forecasts are raised in both years reflecting the stronger production growth forecasts.

Cheese and nonfat dry milk (NDM) price forecasts are raised for both 2007 and 2008 as demand for these products will remain strong. Butter and whey price forecasts are decreased for both 2007 and 2008. The Class III price forecast is raised for 2007 as a higher cheese price forecast more than offsets lower expected whey prices, but the forecast for 2008 is lowered due to weaker whey prices. The Class IV price forecast for both 2007 and 2008 is raised due to the increased forecast for NDM prices. For 2007 and 2008, the all milk price forecasts are raised, with prices in 2007 forecast to average a record \$19.20 to \$19.40 per cwt, and then decline to \$18.30 to \$19.30 per cwt in 2008.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

Comparing Retail and Producer Milk Prices

Retail milk prices have increased considerably this year, following the increases in producer prices. But how do the increases faced by consumers compare with the increases in producer prices? Examining two different retail price surveys, one conducted by the U.S. Department of Agriculture (USDA) and one conducted by the U.S. Department of Labor suggests the answer depends on where the milk is sold. While the Class I base price has increased \$0.72 per gallon (or, \$8.32 per hundredweight) from January to September, the retail price of whole milk has increased \$0.60 in New Orleans, LA, \$0.86 in Miami, FL and \$0.90 in Atlanta, GA according to the USDA survey. The U.S. Department of Labor's more comprehensive survey demonstrates that the

(continued on Page 4 of this publication)

Nominations Sought for Fluid Milk Board

The USDA is asking fluid milk processors and other interested parties to nominate candidates for the National Fluid Milk Processor Promotion Board. Nominees must be active owners or employees of a fluid milk processor in one of the fifteen regions that are currently open for reappointment, including: Region 5 (Florida) and Region 11 (Arkansas, Iowa, Kansas, Missouri, Nebraska, and Oklahoma).

To nominate an individual, please submit originals of both the nomination form and a signed background form for each nominee by Oct. 31, 2007, to: Promotion and Research Branch, Dairy Programs, AMS, MRP, USDA, 1400 Independence Ave., S.W., Stop 0233, Room 2958-S, Washington, D.C. 20250-0233. To obtain forms or additional information, call (202) 720-6909. Blank forms are available on the Dairy Promotion and Research Branch's website at <http://www.ams.usda.gov/Dairy>.

Blend Price Tops \$25

The uniform blend price in Hillsborough County, FL, was \$25.08 per hundredweight for milk at 3.5 percent butterfat for the month of September. This represents a decrease of \$0.16 compared with the previous month but is \$10.38 higher than September 2006. While September's decline in the blend price breaks the streak of six consecutive months of new record high prices, it does mark only the second time in history the Florida blend price has exceeded twenty-five dollars.

Class I utilization was 84.40 percent in September, a 2.32 percent decrease compared with the previous month and a 4.12 percent decline when compared with August of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in August was 15.6 billion pounds, an increase of 3.4 percent from August 2006 and a decrease of 1.1 percent when compared with July 2007. Total cheese output (excluding cottage cheese) was 795 million pounds, 0.1 percent below August 2006 and 0.1 percent below July 2007. Butter production was 110 million pounds, 23.6 percent above August 2006 but 4.9 percent below July 2007.

Nonfat dry milk powder production was 103 million pounds in August, 40.7 percent higher than August 2006 and 14.9 percent less than July 2007. Dry whey production was 94.6 million pounds in August, a 3.4 percent increase from August of last year and a 0.9 percent decrease compared with July 2007.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 3.21 in September. This is an increase of 0.03 points from the revised 3.17 ratio recorded for August 2007.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in September 2007 is \$25.08 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$20.21 per hundredweight plus 3.5 times the uniform butterfat price of \$1.5924 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In September, Class I use accounted for 85.80% of all producer skim milk (priced to handlers at \$16.76 per hundredweight, plus the Class I differential and 47.47% of producer butterfat (priced to handlers at \$1.6382 per pound plus Class I differential). Class II use accounted for 6.69% of all producer skim milk (\$17.46 per hundredweight) and 30.79% of producer butterfat (\$1.5171 per pound). Class III use accounted for 3.31% of all producer skim milk (\$15.32 per hundredweight) and 5.75% of producer butterfat (\$1.5101 per pound). Class IV use accounted for 4.20% of all producer skim milk (\$16.92 per hundredweight) and 15.99% of producer butterfat (\$1.5101 per pound).

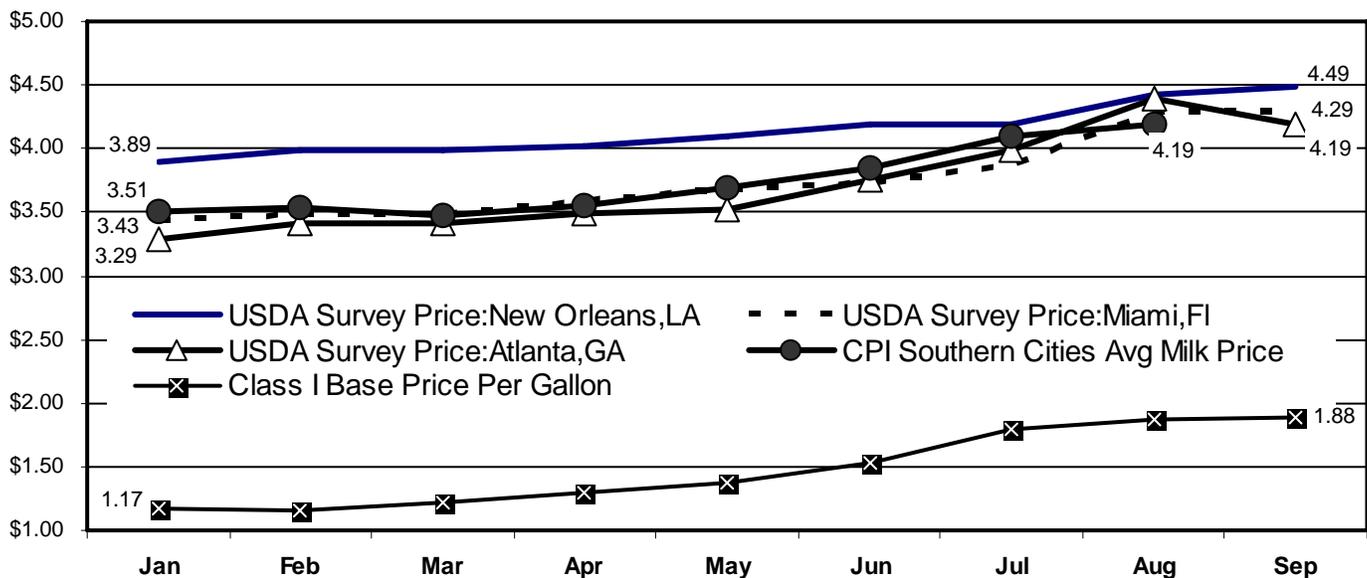

Receipts of producer milk during September 2007 totaled 236.0 million pounds, 4.2 million pounds more than was pooled in September of last year. Florida producers supplied 143.3 million pounds of milk in August 2007 to pool plants or 58.17% of the total producer milk pooled in Florida. In August 2006 Florida producers supplied 64.43% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 8 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for September 2007. In-area Class I route disposition totaled 236.5 million pounds in August 2007, 14.6 million pounds less than August 2006. This is a decrease of 6.4 percent after adjusting for calendar composition.

2007 Retail Whole Milk & Federal Order Class I Base Prices (per gallon)

Source: USDA, AMS, Dairy Programs; Department of Labor, Bureau of Labor Statistics

((from Page 1) price of whole milk has increased an average of \$0.68 per gallon from January to August in its survey of Southern cities. (September data was not available at time of printing). It seems reasonable to assume some cities would have increases above the average reported, \$0.68, and some would be below it as well.

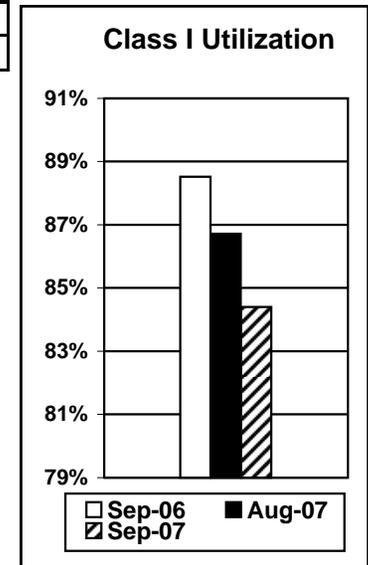

Note: The chart above is meant to show changes in milk prices over time, not necessarily their absolute values. The line "Class I Base Price Per Gallon", also known as "the mover" shows how Federal Order prices have increased this year and is valid for all locations. While Class I price differentials (for example, \$3.10 per hundredweight, or \$0.27 per gallon, in Atlanta, GA) are not shown, including differentials would not alter the analysis.

WASDE Dairy Report 1/

WASDE - 451 October 12, 2007

Milk production forecasts for 2007 and 2008 are raised. Producers continue to respond to high milk prices with high replacement heifer and calf prices pointing to continued expansion plans. Milk per cow growth into 2008 is expected to be moderated by tight supplies of alfalfa hay and relatively high feed prices. Stocks, both on a fat and skim-solids basis, are forecast higher than last month reflecting increased supplies of butter and stocks of nonfat dry milk (NDM). Although NDM stocks are expected to dissipate somewhat as product moves into export channels, increased production of dairy products in 2008 likely will result in somewhat higher fat and skim-solids basis stocks than forecast last month.

Higher milk production is expected to pressure prices despite relatively robust demand. Cheese, butter, and whey prices are reduced as supplies are expected to build. NDM prices should remain relatively strong despite increased production as world supplies are expected to remain tight through much of 2008. Dry whey prices are lowered as prices have dropped significantly. As a result of generally reduced product price forecasts, Class price forecasts are reduced. The Class III price forecasts are lowered for 2007 and 2008 due to lower cheese and whey prices. The Class IV price forecast for both years is lowered as a lower butter price forecast more than offsets slightly higher forecast NDM prices. For 2007 and 2008 the all milk price forecasts are also reduced, with prices in 2007 forecast to average a record \$18.95 to \$19.05 per cwt, and decline to \$17.70 to \$18.60 per cwt in 2008.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

USDA Reopens Comment Period for Mandatory Reporting Program

The U.S. Department of Agriculture (USDA) has announced that it is reopening the comment period for the interim final rule for the Dairy Product Mandatory Reporting program. The rule was published on July 3, 2007 and became effective August 2, 2007. The original comment period ended September 4, 2007.

Under this action, additional comments are due December 3, 2007. Comments submitted during the first comment period need not be resubmitted. The reopening of the comment period will provide interested parties with an additional opportunity to submit comments on all aspects of the mandatory reporting program. USDA's Agricultural Marketing Service (AMS) will review and consider all submitted comments as it writes a final rule.

The Dairy Market Enhancement Act of 2000, and certain provisions of the 2002 Farm Bill amended the Agricultural Marketing Act of 1946 to establish the program. The mandatory reporting program is intended to provide timely, accurate, and reliable market information to facilitate more informed marketing decisions and promote competition in the dairy product manufacturing industry.

The program: (1) Requires persons engaged in manufacturing dairy products to report certain information including the price, quantity, and moisture content where applicable, of dairy products sold by the manufacturer; and (2) Requires persons storing dairy products to report information on the quantity of dairy products stored. USDA's National Agricultural Statistics Service (NASS) collects the information. Any manufacturer that processes and markets less than 1 million pounds of dairy products (*continued on Page 4 of this report*)

Blend Price Declines

The uniform blend price in Hillsborough County, FL, was \$24.81 per hundredweight for milk at 3.5 percent butterfat for the month of October. This represents a decrease of \$0.27 compared with the previous month, but despite this decline the uniform blend price remains at an historically high level. Comparing this October to October of last year, the current blend price is \$9.08 higher.

Class I utilization was 85.33 percent in October, an increase of 0.93 percent when compared with the previous month and a 0.73 percent increase when compared with October of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in September was 14.85 billion pounds, an increase of 2.6 percent from September 2006 and a decrease of 1.2 percent when compared with August 2007 on a daily average basis. Total cheese output was 778 million pounds, 1.4 percent below September 2006 and 2.3 percent below August 2007. Butter production was 112 million pounds, 7.3 percent above September 2006 and 2.0 percent above August 2007.

Nonfat dry milk powder production was 90.3 million pounds in September, a 42.7 percent increase from September 2006 and a 12.3 percent decrease versus August 2007. Dry whey production was 88.1 million pounds this September, an increase of 2.1 percent from September of last year and a 6.9 percent decrease compared with August 2007.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 3.05 in October. This is a decrease of 0.12 points from the revised 3.17 ratio of September 2007.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in October 2007 is \$24.81 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$20.33 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4841 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In October, Class I use accounted for 86.78% of all producer skim milk (priced to handlers at \$16.86 per hundredweight, plus the Class I differential and 47.45% of producer butterfat (priced to handlers at \$1.5209 per pound plus Class I differential). Class II use accounted for 7.92% of all producer skim milk (\$17.56 per hundredweight) and 36.42% of producer butterfat (\$1.4162 per pound). Class III use accounted for 2.99% of all producer skim milk (\$14.27 per hundredweight) and 4.58% of producer butterfat (\$1.4092 per pound). Class IV use accounted for 2.31% of all producer skim milk (\$16.97 per hundredweight) and 11.55% of producer butterfat (\$1.4092 per pound).

Receipts of producer milk during October 2007 totaled 253.9 million pounds, 4.0 million pounds more than was pooled in October of last year. Florida producers supplied 136.9 million pounds of milk in September 2007 to pool plants or 58.00% of the total producer milk pooled in Florida. In September 2006 Florida producers supplied 63.08% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 7 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for October 2007. In-area Class I route disposition totaled 224.2 million pounds in September 2007, 12.5 million pounds less than September 2006. This is a decrease of 1.76 percent after adjusting for calendar composition.

USDA Reopens Comment Period for Establishment of the Dairy Product Mandatory Reporting Program

(from Page 1) per year is exempt from the reporting requirements.

AMS has implemented a plan to verify the price information submitted to NASS. AMS visits butter, nonfat dry milk, cheese and dry whey manufacturers that file reports. AMS verifies that eligible sales transactions agree with information reported to NASS and will check for eligible sales transactions that were not reported.

Details of the reopening of the comment period for the interim final rule were published in the November 2, 2007 Federal Register and are available at www.fmmatlanta.com under 'What's New'. Comments should be sent to John R. Mengel, Chief Economist, USDA/AMS/Dairy Programs, Office of the Chief Economist, STOP 0229-Room 2753, 1400 Independence Ave., SW, Washington, DC 2025—0229. Comments may also be submitted through the Federal eRulemaking portal at <http://www.regulations.gov>.

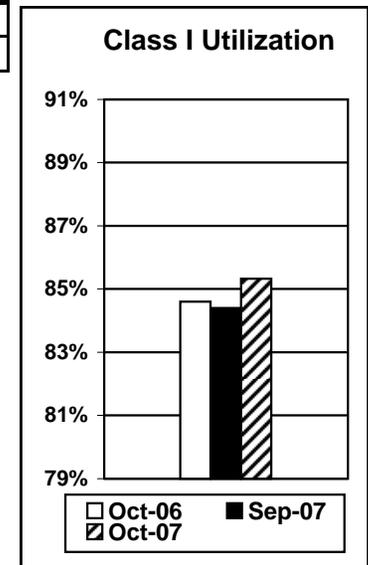

If you have any questions concerning this announcement, please contact this office.

WASDE Dairy Report 1/

WASDE – 452 November 9, 2007

Milk Forecast milk production for 2007 and 2008 is reduced. Cow herds and milk per cow are expanding gradually although USDA's Milk Production report released in October indicated that the pace is slightly below earlier expectations. Imports are reduced for both 2007 and 2008. A weak U.S. dollar and tight milk supplies in major exporting countries are expected to result in lower imports on both a fat and skim-solids basis. Ending stocks for 2007 on a fat basis are forecast higher than last month reflecting continued large supplies of butter. Skim-solids stocks are unchanged from last month as nonfat dry milk (NDM) stocks are expected to diminish as product moves into export channels.

Dairy product prices are changed slightly in 2007 and 2008. Cheese price forecasts are raised in both years reflecting good demand and modest growth in supplies. Butter prices are reduced for 2007 and early 2008 as supplies have been building. NDM prices are reduced for 2007 on rising inventories. Dry whey prices are little changed. As a result of stronger cheese price forecasts, the Class III price forecast is raised for 2007 and 2008. The Class IV price forecast is lowered for 2007, but unchanged in 2008. The all milk price is forecast at \$18.95 to \$19.05 per cwt for 2007 and \$17.70 to \$18.60 per cwt for 2008, unchanged from last month.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.

Volume 8—No. 12

Sign-up Begins for Dairy Disaster Program

Eligible dairy producers can sign up for the Dairy Disaster Assistance Program (DDAP-III) at local U.S. Department of Agriculture Farm Service Agency (FSA) service centers beginning Monday, December 3, 2007.

DDAP-III will help dairy producers recover production losses resulting from a variety of adverse weather conditions in the last few years. The program provides \$16 million in benefits to dairy producers for production losses that occurred between January 1, 2005, and February 28, 2007, because of qualifying natural disasters. It compensates producers for production losses that resulted from lost herds or dumped milk when dairy plants closed or the natural disaster damaged containment equipment. Additionally, power outages, fuel shortages, and infrastructure damage may have temporarily interrupted the flow of dairy products to markets.

To be eligible for DDAP-III, dairy producers must have suffered losses in primary and contiguous counties declared or designated a natural disaster. Also, producers in counties receiving an FSA Administrator's Physical Loss Notice determination are eligible.

Under proposed rules, USDA will calculate payments to eligible producers by multiplying the eligible pounds by the average price received for commercial milk production in the affected areas during the disaster for 2005 and 2006, and for the months of January and February 2007. If the total amount of funding (less any reserve established for disputed claims) is insufficient to compensate eligible producers for losses, then USDA will pay losses at two levels in an effort to more equitably distribute the limited funds and maximize the effectiveness of the program.

USDA provides more information on proposed DDAP-III provisions in a fact sheet posted at the following website: <http://disaster.fsa.usda.gov>.

Blend Price Rises

The uniform blend price in Hillsborough County, FL, was \$24.89 per hundredweight for milk at 3.5 percent butterfat for the month of November. This represents an increase of \$0.08 compared with the previous month. Comparing this November to November 2006, the current blend price is \$9.01 higher.

Class I utilization was 86.87 percent in November, an increase of 1.54 percent when compared with the previous month and a 0.99 percent decrease when compared with November of last year.

National Dairy Situation

The USDA estimates that the total U.S. production of milk in October was 15.38 billion pounds, an increase of 3.5 percent from October 2006 and an increase of 0.1 percent when compared with September 2007 on a daily average basis. Total cheese output (excluding cottage cheese) was 825 million pounds, 1.6 percent above October 2006 and 6.4 percent above September 2007. Butter production was 130 million pounds, 9.1 percent above October 2006 and 16.3 percent above September 2007. Nonfat dry milk powder production was 98.9 million pounds in October, 41.4 percent higher than October 2006 and 9.8 percent higher compared with September 2007. Dry whey production was 88.8 million pounds in October, a 1.6 percent increase from October of last year and a 0.8 percent increase compared with September 2007.

For the year, cheese output is up 1.4 percent, butter production is up 5.5 percent nonfat dry milk is up 6.2 percent and dry whey is up 2.2 percent over 2006.

The milk-feed price ratio, the pounds of 16 percent mixed dairy feed equal in value to one pound of whole milk, was 3.00 in November, down 0.09 points from October 2007's ratio.

Florida Market Summary

The minimum order uniform price for payment to producers supplying the Florida Order marketing area in November 2007 is \$24.89 per hundredweight for milk with a 3.5% butterfat test in Hillsborough County. This is .965 times the uniform skim milk price of \$20.56 per hundredweight plus 3.5 times the uniform butterfat price of \$1.4426 per pound. Payment to producers may be adjusted by location differentials, if applicable, and by properly authorized deductions.

Uniform prices are the result of marketwide pooling; all producer milk was classified and priced according to the milk's use. In November, Class I use accounted for 88.29% of all producer skim milk (priced to handlers at \$17.04 per hundredweight, plus the Class I differential and 50.15% of producer butterfat (priced to handlers at \$1.4318 per pound plus Class I differential). Class II use accounted for 7.37% of all producer skim milk (\$17.74 per hundredweight) and 33.57% of producer butterfat (\$1.4147 per pound). Class III use accounted for 2.36% of all producer skim milk (\$14.81 per hundredweight) and 5.47% of producer butterfat (\$1.4077 per pound). Class IV use accounted for 1.98% of all producer skim milk (\$16.03 per hundredweight) and 10.81% of producer butterfat (\$1.4077 per pound).

Receipts of producer milk during November 2007 totaled 249.7 million pounds, 1.4 million pounds less than was pooled in November of last year. Florida producers supplied 133.5 million pounds of milk in October 2007 to pool plants or 52.58% of the total producer milk pooled in Florida. In October 2006 Florida producers supplied 60.78% of the total producer milk pooled on the Florida market.

There were 12 regulated pool distributing plants and 6 cooperative associations submitting reports of receipts and utilization that were included in the computation of the uniform prices for November 2007. In-area Class I route disposition totaled 245.8 million pounds in October 2007, 0.8 million pounds more than October 2006. This is a decrease of 1.90 percent after adjusting for calendar composition.

Packaged Class I Route Sales in Marketing Area

Product Description	Pounds	Percent
October 2007		
Whole Milk	86,425,929	35.17%
Fat Free Milk	32,173,770	13.09%
Lowfat Milk (incl. 1%)	28,710,391	11.68%
Reduced Fat Milk (incl. 2%)	73,523,731	29.92%
Cultured Fluid Milk (incl. Buttermilk)	1,065,811	0.43%
Flavored Drinks and Milk	23,869,952	9.71%
Total Disposition in Marketing Area	245,769,584	100.00%
Total Disposition by Pool Plants	216,858,035	88.24%
Total Disposition by Nonpool Plants	28,911,549	11.76%
Total Disposition in Marketing Area	245,769,584	100.00%

WASDE Dairy Report 1/

WASDE – 453 December 11, 2007

Forecasts for 2007 and 2008 milk production are raised slightly as milk per cow rates are recovering from early year weakness. Ending stocks on a fat basis are unchanged from last month, but skim-solids stocks are raised because nonfat dry milk (NDM) stocks have remained higher than expected.

Dairy prices are changed in 2007 and 2008. Stronger cheese price forecasts are expected to result in higher Class III price forecasts in both years. The Class IV price forecast is lowered for 2007 but unchanged for 2008. Forecast butter prices are raised slightly in both years. Weaker NDM prices in November and December result in a lower Class IV price for 2007. However, a weaker forecast NDM price in the first half of 2008 is largely offset by a higher forecast NDM price in the second half of the year as world supplies remain tight. The 2007 all milk price is forecast 10 cents higher than last month at \$19.05 to \$19.15. In 2008, the all milk price is forecast at \$18.00 to \$18.80 per cwt.

1/The World Agricultural Supply and Demand Estimates (WASDE) report provides USDA's comprehensive forecasts of supply and demand for major U.S. and global crops and U.S. livestock, including dairy. The most recent WASDE report is available at www.usda.gov/oce/commodity/wasde/index.htm.
